Eurofins:
Network of laboratories

Each laboratory offers analytical services and customer support, however, some services are centralised. Through excellent logistics and information technology, Eurofins can deliver a full range of expertise through any one of its laboratories.

In this directory, services listed are specific to the respective laboratories and are described as follows:

- International Division/ International Business Line
- Country (by alphabetical order)
- Laboratory - Marketing name
- Laboratory description/ Services/ Analysis/ Offers
- Full contact information:
  - Legal name of the laboratory
    - Full address and phone number(s)
    - Email(s)
    - Website

**FOOD & FEED TESTING**

Eurofins is the world leading food and feed testing laboratory group, deploying a comprehensive range of state-of-the-art analytical techniques in order to support its clients' increasingly stringent quality and safety standards.

The Group has built up a global network of food testing laboratories and Competence Centres that perform more than 100 million assays per year to establish the safety, composition, authenticity, origin, traceability and purity of food.

Eurofins thus offers the broadest portfolio of any food testing lab and makes this unique offer available globally from any of our laboratories using optimised processes, logistics and IT.

**Eurofins Agoscience Testing**

Eurofins Agoscience Testing is a contract laboratory specialising in the analysis of agrochemicals, veterinary medicines and their residues in crops, animal tissues and environmental samples.

The team at Eurofins Agroscience Testing has experience with the analysis of most developmental agrochemicals and hence is in a position to offer sound advice for the analysis of the same compounds in food and environmental samples.

**Services:**

- Residue Field studies (GLP)
- Veterinary Drug Residue studies (GLP)
- Method Development and validation
- Pesticide analysis of fruit, vegetables
- Formulation analysis (GLP)
- Storage Stability studies (GLP)
- Physical Parameter Testing (GLP)

**Accreditations:**

- OECD GLP
- ISO 17025
- APVMA licensed
- AQIS facility

**AUSTRIA**

**Eurofins Lebensmittelanalytik Österreich**

Eurofins Lebensmittelanalytik Österreich was founded in 2006 as a subsidiary of Eurofins Scientific and Österreichisches Forschungsinstitut – ofi, and was originally the “Milchwirtschaftsfond” in the middle of the last century. It is the direct descendant of OLab Austria (ownership: Agrarmarkt Austria - AMA Gütesiegel).

Eurofins-ofi is one of the leading laboratories in the field of food law and labelling within the CEE Region.

The site in Vienna carries out a broad range of chemical, biological and pesticide residue analyses and consultancy on foodstuffs, packaging materials, biopharmaceuticals, cosmetics and consumer goods, with a special focus on the area of retailing. In addition, a countrywide network for sampling and sample-shipment offers our customers a “one stop” service.

Furthermore Eurofins-ofi provides industrial partners with a full quality assurance programme for outsourcing their internal QA activities (e.g. shelf life testing, backup sample storage).

**Services:**

- General food Chemistry:
- Chemical and physical analysis: chromatography (pesticides, mycotoxins, preservatives etc.), chemistry (fat, protein, dry matter etc.), microbiology
- Marketability and Translation: in over 45 countries but with the main focus on CEE Europe
- Sensory Analysis: sensory panels for all market relevant product groups
- Accredited sensory methods
- Special panels for dairy products and wine
- Experts with DLG-sensory certificate
- Inspection/Hygiene:
- 3rd Party Audits
- Hygiene checks
- Expert sampling
- HACCP Consulting
- Issuance of a certificate
- Food Law: §73 experts with competence in food law, labelling and food supplements

**Accreditations:**

**BRAZIL**

**Eurofins São Paulo**

Eurofins do Brasil has been offering a complete Eurofins GeneScan GMO portfolio since 2001. The analytical portfolio has increased to offer a wider and complete service solution to Brazilian market.

We offer analyses to the food, feed and agribusiness industries. Microbiology, pesticides and veterinary drug residues, mycotoxins, GMO and animal species identification are the main areas.

Technologies include PCRs and chromatographs - LC/MS-MS, GCs and HPLCs coupled with several different detectors.

Eurofins do Brasil combines the best practices and worldwide expertise of the Eurofins network, offering an international portfolio locally, and delivering high quality services for its customers.

**Eurofins Recife**

Eurofins Recife was opened in July 2014, focused on Northeast/ North regional market coverage.

This Unit offers both Microbiology and General Food Chemistry Laboratories, offering optimized scope for short TAT analysis and reception of samples for specialized laboratories.

The facility is strategically located in Recife, Pernambuco State, attending important industry sectors; fruits, beverages, dairy and meat.

The building is around 500m² and is prepared to meet ISO17025 and further quality regulation needs in the next months.

**CHILE**

**Eurofins GCL Santiago**

Eurofins GCL joined the Eurofins Group in 2013. GCL companies have a long track record in the delivery of laboratory services, consulting and training, mainly focused on the food industry.

**Services:**
Testing services are offered in accordance with the Food Health Regulations for companies involved in food: cooked dishes, food processors and surfaces. GCL also offers testing for pathogens in raw materials and finished products: VIDAS automated methods for Listeria monocytogenes, Salmonella, E. coli O157 H7.

Other services include:
- Water testing
- ILW and lifetime studies in real time.
- Residues of Pesticides
- Antibiotics
- Cholesterol and Fatty Acids
- Vitamins
- Mycotoxins
- Water and ILW
- Alcohol
- Preservatives and Antioxidants
- Composition of foods, nutrients and heavy metals
- Fertilizers
- Water and Waste Waters
- Sensory evaluations
- Nutritional labelling
- Testing of own brand products

**Accreditations:**
- ISO 17025

**CHINA**

**Eurofins Suzhou Laboratory**

Eurofins Technology Service (Suzhou) Co., Ltd. is a subsidiary in China wholly owned by Eurofins Scientific Group.

With a laboratory accredited by DAkkS (Germany), CNAS, CMA & AQSIQ (China) in Suzhou and sales offices in Dalian, Qingdao, Xiamen, Kunming, Tianjin, Chengdu, Guangzhou, Hong Kong and Taiwan, Eurofins offers the full spectrum of the Eurofins portfolio to its clients throughout Greater China.

**Services:**
- Pesticide analyses based on QUECHERS GC-MS & LC-MS/MS
- Pesticide analyses for organic foods
- Organic contaminant analyses, including Melamine/ Cyanuric acid
- Veterinary Drug residue analyses
- Mycotoxins analyses in foods
- Nutritional fact analyses
- Physical & chemical analyses
- Microbiological analyses
- Heavy metals analyses
- Radioactivity analyses
- Allergens analyses
- Illegal dyes analyses
- Premix vitamin analyses
- GMO qualitative & quantitative analyses
- Identity Preservation/ Non-GMO
- Supply Chain Control Programme Consulting and Certification
- Food Safety programmes (IFS, BRC, ISO 22000, etc.)
- Consulting / Auditing / Certifications
- Pre-shipment Inspections and hygiene auditing programme against recognised standards

**Accreditations:**
- DAkkS (Germany)
- CNAS
- CMA
- AQSIQ (China)
**CZECH REPUBLIC**

**Eurofins CZ**

Eurofins CZ has a basic food and feed testing laboratory located in Prague accredited to ISO 17025.

The Group has a service offices in Prague and in Brno which they provide support in the Czech Republic and Slovakia for hardware and software products related to SNIF-NMR® and other isotopic analyses. The offices also offer authenticity testing as well as consultancy in this field. The company offers food labelling service and consulting to the food industry.

**Services:**
- Basic food and feed microbiology testing, water testing, labelling, food consulting and retail cooperation.

**Accreditations:**
- Eurofins CZ is accredited according to ČSN EN ISO 17 025 by CIA (Czech accreditation body).

**EUROFINS STEINS LABORATORIUM**

Ladelundvej 85

**EUROFINS GENOSKAN A/S**

GenoSkan A/S uses a variety of advanced biotechnologies for genotyping and sequencing.

The Infinium HD assay technology from Illumina is a flexible platform which makes it possible to genotype a large amount of SNP markers for one individual at a time.

With this technology it is possible to use both customized SNP assays and to design own SNP assays. GenoSkan A/S offers customized SNP-assays for most species (human, cattle, pig, sheep, dog, etc.).

**Services:**
- Genomics in animals/veterinary testing

**FINLAND**

**Eurofins Scientific Finland, Raisio Laboratory Site**

The Raisio laboratory unit is focused on food and feed testing, including microbiological and chemical laboratory testing and sensory analysis. Our specific competence area is fat related analyses. Additionally, the complete biopharmaceutical and food testing service offering of Eurofins Scientific Group is available to our clients via the Raisio site.

**Services:**
- General food chemistry, fat analyses (including special analyses like sterol/sterol ester analyses, trans fatty acids, etc.)
- Microbiological analyses

**Accreditations:**
- ISO 17025
- Approval by Finnish Food Safety Authority (EVIRA)

**Eurofins Scientific Finland, Raisio site**

Raisonkaari 55
FI-21200 Raisio
Finland
Phone: +358 44 030 65 00

**DENMARK**

**Eurofins Steins Laboratorium**

Eurofins Steins performs sampling, laboratory analyses and consultancy services focusing on the food, feed, agro, and dairy industries. Our laboratory in Vejen services a broad range of companies, authorities and organisations.

**Services:**
- Food and feed testing, more specifically consists of testing contents and contamination – vitamins, amino acids, mycotoxins, pesticides, heavy metals, medicine residues, pathogenic micro-organisms, etc.
- European Vitamin Competence Centre, BSE-testing and consultancy on hygiene - i.e. HACCP.

**Accreditations:**
- The laboratories are accredited according to the ISO 17025 standard. The laboratories are appointed as national reference laboratories within specific areas.

**FRANCE**

**Eurofins Analytics France**

**Services:**
- Chemical and nutritional testing of food products for industry and the retail sector
- Determination of additives, preserving agents, colourings etc.
- Determination of mycotoxins, detection of melanine and acrylameide
- Determination of heavy metals (Pb, Cd, As, Hg)
- Determination of pesticides
- Isotopic analyses by SNIF-NMR® and IRMS – powerful tools in the detection of adulteration of fruit juices, alcoholic beverages, vinegar, honey, flavours, caffeine, e.g. added sugar in fruit juices or sugar-containing products, such as honey and maple syrup; added vitamin C in orange juice; added malic acid in apple juice, tartaric acid in grape juice, citric acid in lemon juice; mislabelling of alcohol origin in alcoholic beverages; fraud concerning the natural origin of flavours such as vanillin, benzaldehyde, anethole and linalool.
- Product profiling by 1H-NMR allowing monitoring of large numbers of samples for validation of the composition and detection of atypical components
- A complete offer for quality control of fruit juices and fruit products (including anthocyanin profile, oligosaccharides, flavour profile by enantioselective HRGC-MS etc.)
- Validation of the origin of bioethanol
- Chemical and nutritional testing of feed products (raw materials and finished products)

**Molecular biology**
- GMO testing from seeds to finished products across the food and agricultural chain (farm to fork concept) using the most innovative and proprietary technology including real-time PCR detection, identification and quantification of a complete range of genetically modified plants such as maize, canola, soybean and vegetables. A combination of optimised protocols, state-of-the-art technology and a highly skilled team enable rapid processing times tailored to the customers’ requirements.
- Genetic fingerprinting for tracing of beef supplies (Eurofins TAG™)
- Species identification by DNA chip: determination of the presence of 21 meat species in one single analysis
- Allergen detection: Eurofins offers a comprehensive testing scheme covering all allergens listed on the “EU – Allergen Hit list”. Eurofins can offer both ELISA and PCR technology and advises customers which method is most appropriate for their products and production line
- Training and consulting concerning allergen analyses and risk management (Recognition by VITAL®)
- Detection of genetic resistance to scrapie
- Seed purity testing and quality control
- SSR / SNP development and routine analyses
- Marker Assisted Selection (MAS / MAB)
- Divergence studies (genetic resources management, varietal identification, EDV - Essentially Derived Varieties)
- Contract research (marker conversion, development of specific tests, project management)

**Accreditations:**

The laboratory is accredited by COFRAC, the French accreditation organisation, in accordance with ISO 17025, under the reference 1-5766 (accreditation scope available on www.cofrac.fr).

**Eurofins Laboratory Contaminants Sud**

Eurofins Laboratory Contaminants Sud specialises in determination of pesticide residues in fruit and vegetables.

**Services:**
Pesticide analysis with short turnaround time

**Accreditations:**

The laboratory is accredited by COFRAC, the French accreditation organisation, in accordance with ISO 17025, under the reference 1-5766 (accreditation scope available on www.cofrac.fr).

**Eurofins Certification**

Eurofins Certification is a certification body accredited according to ISO 17065 (accreditation scope available on www.cofrac.fr).

Eurofins Certification provides certification audits for feed and food industry, against Global Food Safety Initiative (GFSI) benchmarked standards such as IFS, BRC. Eurofins Certification also conducts third party audits against ISO 22000,ISO 9001 or gluten free standards.

Furthermore, it develops specific supply chain standards for the industry, such as non-GMO identity preservation Non GMO IP standard). This standard is relevant for food/
feed supply chains to ensure that traceability measures are implemented to avoid cross contamination of GMOs and allows for co-existence with GMO supply chains.

Certification committee members are representatives of interested parties (food industry and retailers). This committee strengthens the independency and recognition of the issued certificates.

Eurofins Certification has also developed and implemented an online food safety information system organised by food sectors. Vigial® (www.vigial.com) integrates the three key elements of a complete information monitoring system:
• Recalls and withdrawals of products in Europe, USA and parts of Asia
• News of food safety initiatives involving government and industry professionals
• European regulations and their implementation in local laws

Eurofins Certification also provides its clients with high level training courses addressed towards:
• Auditors: regarding relevant standards of quality and safety management in the food industry

Accreditations:
Eurofins Certification is a legal entity accredited to ISO 17065 which is the relevant international standard for certification bodies. (accreditation reference 5-0070, scope available on www.cofrac.fr).

Eurofins Cervac Sud
Eurofins Cervac Sud performs chemical and microbiological testing of food and water as well as sampling. It will, from September 2016, be specialising in microbiological testing

Services:
• Macroscopic analyses, metrology, determination of defects
• Microbiological analyses of food (salmonella by PCR, enterobacteriaceae…)
• Microbiological analyses of water.

Accreditations:
The laboratory is accredited by COFRAC, the French accreditation organisation, for programmes 60-80-81-82 , LAB GTA23 and LAB GTA59 (accreditation reference 1-1822, scope available on www.cofrac.fr)

Eurofins Laboratoires de Microbiologie Ouest
Eurofins Laboratoires de Microbiologie Ouest is the biggest of the French Eurofins laboratories for microbiological testing, analysing several hundred thousand samples each year and conducting method development and R&D projects in the field of microbiological testing.

Services:
Microbiological analyses of all types of food products are performed for clients in the food industry, retailers and caterers.

A wide range of methods are employed, including rapid methods with very short turn-around-times using immunoenzymatic techniques, especially for pathogenic bacteria e.g. Salmonella and molecular biology methods (PCR Salmonella and Listeria).

A network of technicians conducts sampling at production sites, delivering samples directly to the laboratory in less than 24 hours

Accreditations:
The laboratory is accredited by COFRAC, the French accreditation organisation in accordance with ISO 17025, under the reference 1-1147 (accreditation scope available on www.cofrac.fr)

A wide range of methods are employed, including rapid methods with very short turn-around-times using immunoenzymatnic techniques, molecular biology methods (PCR), especially for pathogenic bacteria e.g. Salmonella.

ELC is the competence centre for challenge tests within the food division, with a public recognition delivered by French agriculture ministry. The laboratory is also specialized in tailor made analytical solutions for specific needs, including off-site analyses.

Accreditations:
The laboratory is accredited by COFRAC, the French accreditation organisation, in accordance with ISO 17025, under the reference 1-2243 (accreditation scope available on www.cofrac.fr).

Eurofins Laboratoire Nord

European Fis Nord performs chemical and microbiological testing for the food and feed industries, retailers and caterers.

Services:
In microbiology, a wide range of methods are employed, including rapid methods with very short turn-around-times such as immunoenzymatnic techniques and molecular biology methods (PCR), especially for pathogenic bacteria e.g. Salmonella.

A nationwide network of technicians conducts sampling at production sites, delivering samples directly to the laboratory in less than 24 hours.

The laboratory also has specific expertise and experience for determinations on sugars and related products, for chemical testing and microbiology (including TAB – Thermophilic Acidophilic Bacteria).

Services:
• Animal health testing: microbiology, PCR for BSE and animal blood testing
• Food safety using microbiology testing and PCR virus detection

Accreditations:
The laboratory is accredited by COFRAC, the French accreditation organisation, in accordance with ISO 17025, under the reference 1-2243 (accreditation scope available on www.cofrac.fr).

Eurofins Laboratoire Coeur de France

Eurofins Laboratoire Coeur de France is a private - public structure, the result of the takeover of IPL activities by Eurofins in 2011. It analyses several hundred thousand samples each year.

Services:
• Animal health testing: microbiology, PCR for BSE and animal blood testing
• Environmental water testing
• Food safety using microbiology testing and PCR virus detection

Accreditations:
The laboratory is accredited by COFRAC, the French accreditation organisation, in accordance with ISO 17025, under the reference 1-2452 (accreditation scope available on www.cofrac.fr).

Eurofins Laboratoire Central d’Analyses de la Moselle

Eurofins LCAM is the result of the takeover of IPL activities in 2011. It is a former public laboratory.

Services:
• Food microbiology testing.
• Animal health testing: PCR for BSE, animal blood testing

More than one hundred thousand samples are analysed each year.

Accreditations:
The laboratory is accredited by COFRAC, the French accreditation organisation, in accordance with ISO 17025, under the reference 1-2286 (accreditation scope available on www.cofrac.fr).

Eurofins Laboratoire de Pathologie Végétale

Eurofins Laboratoire de Pathologie Végétale specialises in plant pathology, pest detection on plants and territory monitoring. In that context, thousands of analyses are performed each year to comply with national surveillance programs of major plant quarantine diseases.

Services:
The laboratory offers diagnosis services, as well as expertise in the following fields;
• Nematology
• Mycology
• Bacteriology
• Virology

Using conventional methods of isolation and identification to advanced immunoenzymatnic and molecular biology techniques, the laboratory can provide a wide range of services aimed at seed and agrochemical firms as well as co-operatives and food manufacturing companies.

Accreditations:
The laboratory is accredited by COFRAC, the French accreditation organisation, in accordance with ISO 17025, under the reference 1-5364 (accreditation scope available on www.cofrac.fr).
Eurofins Biosciences Hygiène Alimentaire

Eurofins Biosciences is dedicated to providing food safety support to our customers in retail, catering and warehousing.

A nationwide network of technicians conducts sampling at production sites, delivering samples directly to the laboratory in less than 24 hours.

Eurofins Biosciences also operates a large food safety consultancy department. About 100 auditors and sample takers perform audits at production sites, restaurants and retail outlets, checking compliance with current legislation in the field of food safety. They provide advice in implementing improvement plans and ensure that HACCP instructions are strictly implemented on site.

This unit conducts training sessions on hygiene and food safety for operators and professional managers in retail and catering. Several hundred thousand training/coaching/consulting hours are delivered each year.

Accreditations:

All sampling operations are done under full ISO 17025 accreditation delivered by the French accreditation organisation COFRAC. Impartial inspections are guaranteed by an ISO 17020 accreditation (accreditation reference 3-0826, scope available on www.cofrac.fr).

Eurofins Consulting

Eurofins provides outstanding supplier auditing and consulting for food safety management systems. Several hundred food manufacturer’s sites are audited yearly in several countries on behalf of retailers, caterers or manufacturers.

A large network of experts provide training to the food industry and consulting to support food chain stakeholders in managing and controlling their processes and in order to comply with relevant international standards for food safety. Eurofins Consulting is also offers expertise to the food industry for product labelling checks in compliance with food regulations in countries of destination.

GERMANY

Eurofins BioTesting Services Nord

In autumn of 2013 Eurofins BioTesting Services Nord started to operate in Hamburg. The specialisation of the laboratory lies in microbiological analyses of food and feed, raw materials, final products, ingredients, food contact materials (FCS), water, packaging materials as well as commodities.

Services:

Testing for the complete range of microorganisms relevant to the food industry:
• Pathogenic organisms (e.g. Salmonella spp, Listeria spp, Staph. Aureus, Campylobacter spp, Vibrio spp)
• Spoilage organisms (e.g. Yeast and Mould, Bacillus spp, Clostridium spp, Pseudomonas spp)
• Technologically relevant microorganisms (e.g. Lactobacilli)
• Microscopic analysis
• Hygienic checks

The laboratory is able to analyse all kinds of food with the following methods:

Classic cultural methods (ISO, §64 LFGB, ICUMSA), PCR, Petrifilm, Inhibitory substance, Strain identification

Accreditations:

Eurofins BioTesting Service Nord is accredited according to DIN EN ISO/EC 17025 and is designed for a high sample performance with short analytical times due to advanced equipment and a "lean management" methodology.

Eurofins Analytik

Eurofins Analytik carries out chemical, sensory and molecular biological analyses and provides consultancy and certification on foodstuffs.

Being the competence centre for allergen, irradiation and sensory testing, Eurofins Analytik assists producers and retailers in questions regarding foodstuffs and pet food.

Services:

Our services in general food analyses and consultancy contain:
• Consultancy for marketability and storage durability
• Testing and consultancy in respect of quality control systems/ HACCP/
Northern Germany.

proximity to major import

Eurofins Analytik is located in close

Free Sales and Health Certificates.

Eurofins Analytik has a network for international labelling checks covering most EU countries, USA, Canada, China etc.

• Nutritional testing
• Molecular biology testing (determination of animal species and allergens)
• Irradiation testing (analysis for the application of ionising radiation on food and biopharmaceutical products); all 5 EU-methods are offered
• Sensory analysis of food and food contact materials with a wide scope of different methods; highly experienced and trained experts, including panels for various matrices as well as product-specific seminars

Expert analyses and consultancy for following industry sectors:

• Oil seeds; oils and fats of vegetable and animal origin, including the analysis of all relevant fat attending compounds and profiles; determination of adulteration, ageing, oxidation;
• Olive oil
• Dried fruits
• Nuts
• Convenience products
• Cereals
• Coffee
• Sweets
• Retail
• Novel food, food supplements and health food
• Pet food

Eurofins Analytik also provides assistance to companies in the food business with respect to selecting and coordinating analyses for their special needs. This includes designing sampling and inspection plans as well as setting up testing schemes as a basis for the issue of a quality seal. In addition, Eurofins Analytik offers coordinated offers for sampling (also in the country of origin e.g. Turkey) and advice on individual products in the context of quality management.

Eurofins Analytik serves importers with rapid analyses of parameters needed for trade and import. The laboratory also has appointed and sworn chemists at its disposal to issue Free Sales and Health Certificates.

Eurofins Analytik is located in close proximity to major import-terminals in Northern Germany.

Accreditations:

Eurofins Analytik is accredited according to DIN EN ISO/IEC 17025:2005 and engages authorised experts for double and cross checks according to § 43 LFGB (German Food and Feed Code).

Eurofins Dr. Specht Laboratorien

For more than 50 years, Dr. Specht Laboratorien has specialized in the analysis of pesticide residues, and is one of the most experienced laboratories in this field in the world.

As the competence centre for the analysis of pesticides in foods and tobacco, we offer customized solutions in the field of residue analysis - from the basic legal requirements right through to our "all inclusive" packages.

Our portfolio of validated methods for the analysis of residues ranges from the two most effective multi-residue methods (DFG S19 and QuEChERS) via group methods, through to individual methods by means of which we are able to analyse more than 900 pesticides and their metabolites.

Our specialists, using innovative technologies, can also develop effective new procedures for you in a very short time.

As the industry laboratory for fruit and vegetables, baby food, tea and tobacco, we can find a solution for you, especially in these fields, whatever your requirements may be.

Our team of experts will be happy to help you further with a broad range of questions, including general issues, such as sampling, auditing and much more.

Services:

• Competence Centre for pesticide analyses

• Competence Centre for fresh fruits & vegetables, baby food, tea and tobacco
• Competence Centre for flowers and ornamental plants
• Performance of express-analysis (8, 12, 24, 48 hour-testing)
• Pesticide analysis for GMP-studies (Ph. Eur. / USP)
• Analyses for import and export requirements
• International sampling
• QS GmbH accreditation for feed and food pesticide analysis

Accreditations:

• DIN EN ISO/EC 17025.

Eurofins WEJ Contaminants

With more than 160 employees. Eurofins WEJ Contaminants is the Competence Centre of the Eurofins Group for the analysis of organic and inorganic contaminants, mycotoxins & plant toxins and veterinary drug residues in food and feed.

In addition, Eurofins WEJ Contaminants hosts the centre of expertise for the analysis of nanomaterials in food, feed, cosmetics, packaging and consumer products.

Eurofins WEJ Contaminants is a well-equipped laboratory using state-of-the-art techniques. It is a member of many national and international associations and working groups such as DIN, § 64 Working Groups, CEN, AOAC Working Groups and participates in different national and international EU projects (AveQ, Biocofos, Biocop, MoniQA, European certification campaigns, Mycotoxin Awareness Network, NanoDefine, KOMBI SPEC).

Services:

Eurofins WEJ Contaminants hosts the following units:
1) Mycotoxin & Plant Toxins Competence Centre:

Analysis of all regulated mycotoxins and as well as a broad spectrum of further relevant mycotoxins and plant toxins such as Alternaria toxins, ergot alkaloids, citrinin, moniliformin, sterigmatocystin, enniatins, beauvericin, pyrrolizidine alkaloids and tropane alkaloids.

2) Veterinary Drug Residues Competence Centre:

Analysis of more than 250 different veterinary drugs, such as nitrofurans, CAP, macrolides, lactames, sulfonamides, tetracyclines, quinolones, coccidiostats, benzimidazoles, nitroimidazoles, hormones and tranquilizers.

3) Organic Contaminants Competence Centre:

Portfolio of more than 100 different parameters, such as PAHs, BTEX, furan, acrylamide, 3-MCPD and its esters, glycidylesters, nicotine, plasticisers, bisphenol A, BADGE/NOGE, sudan and other illegal dyes, residual solvents, low volatile chlorinated hydrocarbons and mineral oil hydrocarbons (MOSH/POSH/MOAH).

4) Inorganic Contaminants Production Centre:

Analysis of a vast number of (heavy) metals and trace elements with lead, cadmium, mercury and (inorganic) arsenic amongst them, metal speciation and analysis of radionuclides (caesium 134 and 137 and iodine 131).

5) Nanotechnology Centre of Expertise:

Analysis of inorganic nanoparticles, such as silver, gold, titanium dioxide, zinc oxide, and silicon dioxide with other parameters to follow.

State-of-the-art laboratory equipment:

Gas chromatography with mass spectrometry (GC-MS, GC-MS/MS), flame ionisation detection (GC-FID), high performance liquid chromatography with fluorescence detection (HPLC-FLD), UV-Detection (HPLC-UV), diode-array detection (HPLC-DAD) or mass spectrometric detection (HPLC-MS/MS), high-resolution LC-MS, online-HPLC-GC-FID, atomic absorption spectrometry (AAS), (high-resolution) inductive coupled plasma with mass spectrometric detection or optical emission spectrosopy ((HR-)ICP-MS, ICP-OES), LC-ICP-MS, gamma-spectrometry, single-particle-ICP-MS, Dynamic Light Scattering Detector (DLS), Field-Flow-Fractionation (FFF).

Accreditations:

• DIN EN ISO/IEC 17025:2005
• Authorised experts for double and cross checks according to § 43 LFGB (German Food and Feed Code).

Eurofins GeneScan

Eurofins GeneScan looks back at over 25 years of history in the field of biomolecular methods.

Eurofins GeneScan is recognised worldwide for its expertise and leading performance in the field of biomolecular testing for Genetically Modified Organisms (GMOS) and animal species identification in food, feed and agricultural raw materials.

The company offers the broadest portfolio of GMO testing services, testing kits and GMO related consulting worldwide. Eurofins GeneScan has a global presence with its network of partners in the USA, Brazil and China as well as with further partner laboratories in Australia and South Africa.

Therefore, Eurofins GeneScan is able to cover the whole agricultural value chain and to offer its high quality portfolio wherever it is most efficient for clients.

Services:

• GMO Testing

Eurofins GeneScan is the Competence Centre for GMO analyses within the Eurofins Group.

GMO testing services cover the qualitative screening, the qualitative identification, and the quantification of all relevant GM events. Specific analytical strategies are developed according to the individual needs of clients.

• Species Identification

Eurofins GeneScan offers identification of plant and animal species and special customer requirements (e.g. testing for Halal compliance) are included in the scope of these services.

• Residual DNA Testing

Residual DNA testing services are offered for the food, feed and pharma industries.

• Kits and Products

Eurofins GeneScan test kits (PCR and ELISA) are the result of extensive experience in its own testing laboratories.

• Method Development

Contract projects for the development of analytical methods and custom-designed testing – also under GxP requirements – e.g.: method development in the context of EU regulatory approval of GMOs, molecular pathogen detection or residual DNA analysis.

Accreditations:

• ISO17025 certification
• ISO 9001 accreditation
• Approval for GLP/GMP compliant analysis
• QS-Approval

The high standards of the testing methods and test kits are readily confirmed internally and externally via participation in national and international ring trials and proficiency tests (e.g. USDA-GIPSA, JRC etc.).

Additionally, Eurofins GeneScan is audited regularly by major clients - many of them worldwide leaders in their markets. Last but not least, Eurofins GeneScan has been and continues to be an active member of several worldwide regulatory and standardisation committees.
## Eurofins GeneScan Technologies

Eurofins GeneScan Technologies is specialised in the production of kits and their application for the food and feed testing industry. Two decades of expertise in the development of molecular biology kits and their application in Eurofins laboratories on all continents have led to competitive products, which set standards worldwide.

Based on in depth knowledge of the current market situation and the requirements of the food and feed industry, Eurofins GeneScan Technologies adapts its kit portfolio to meet the most recent market demands. Laboratories all over the world trust in the quality of these products which help them to fulfill their customers' demands.

### Services:

- **GMO testing kits**: screening, identification, quantification with real-time PCR multiplex technology
- **Plant pathogen detection kits**
- **Plant species identification kits**: comprehensive screening and specific detection of defined plant species
- **Animal species screening and identification kits**: authenticity testing for most domestic animal species as well as taxonomic groups of animals
- **Pathogen testing kits**: fast and reliable detection of food pathogens like Salmonella or Listeria
- **DNA extraction kits**: kits optimised for different food and feed matrices
- **Application support on-site**
- **Customer trainings and webinars**

### Accreditations:

- **ISO 9001:2008 certification**
- **AFNOR certified kits**
- **AOAC certified kits**
- **Eurofins GeneScan methods** found in national and international standards

---

## Eurofins Global Control

Eurofins Global Control is an international inspection company offering supply chain control solutions to achieve product quality and safety from the origin to the consumer. This applies to food, pet food, chemicals and non-food products. Major control systems have been established in Argentina, Australia, Bolivia, Brazil, Bulgaria, Cambodia, Chile, China, Costa Rica, Germany, Dominican Republic, Ecuador, Egypt, Greece, Guatemala, India, Indonesia, Israel, Italy, Japan, Kenya, Colombia, Mexico, Mayanmar, Netherlands, Pakistan, Paraguay, Peru, Philippines, Poland, Romania, Sweden, Switzerland, Spain, Sri Lanka, South Africa, South Korea, Thailand, Taiwan, Turkey, UAE, Ukraine, Uruguay, United States and Vietnam. More countries on request.

On request, tailor-made solutions can be provided in most countries worldwide. For identity control of the goods, innovative DNA-based methods are applied from start to finish.

### Services:

- Pre-shipment inspections (PSI) and sampling, loading supervision, audits at outlet, factory and farm level and arrangement of analytical services in Eurofins laboratories worldwide.
- Auditing services are offered in Central Europe, China, Pakistan, India, Sri Lanka, Philippines and Ecuador. These cover internal and second party audits within the criteria of international standards for quality and food safety management, Good Agricultural Practice and Organic Agriculture (ISO/FSSC 22000, IFS, BRC, SQF, GlobalGAP).
- Audits are performed by trained personnel, e.g., IRCA certified lead auditors for ISO/FSSC 22000.

### Accreditations:

- **ISO 9001:2008 certification**
- **AFNOR certified kits**
- **AOAC certified kits**
- **Eurofins GeneScan methods** found in national and international standards

---

## Eurofins SOFIA

SOFIA is a well-equipped laboratory using state-of-the-art technology.

The laboratory focuses on residue analysis, and the chemical analysis of organic contaminants, especially pesticides, mycotoxins, industrial chemicals, food born contaminants, veterinary drugs, etc. SOFIA mainly analyses food, feed, water and soil but also many other matrices.

Our highly educated staff has a lot of experience in dealing with special analytical questions. SOFIA is able to develop the analysis of new substances very quickly.

### Services:

- All-in-one analytical partner for nutrients, residues & contaminants
and microbiology
• Analysis of macro- and micronutrients in complex food matrices
• Specific analysis for permissible limits in inorganic and organic trace analyses of residues and contaminants
• Microbiological methods for the complete range of food-related bacteria including special baby relevant microbes
• Separated lab environment where material with low level contamination is handled exclusively
• Tailor made consultancy services to improve food quality, safety and analytical performance

Accreditations:
• DIN EN ISO/IEC 17025:2015

Eurofins Inlab

Inlab was founded in 1992 as a food microbiology laboratory, and in 2017 celebrated its 25th anniversary. The laboratory and the team around business unit manager Dr. H.G. Leusch, are recognised for their proactive role in the development and implementation of new methods and techniques, as well as for their collaboration on national boards for microbiology.

Services:
Microbiological testing, expert advice, sample drawing and further services in the following areas and segments:
• Food (final, intermediate products and raw materials), feedstuff, articles of daily use including passing of rapid analyses
• Drinks and dispensing equipment
• Sanitary products, cosmetics and commercially available drugs
• Drinking and mineral water, bath water etc.
• Hygiene of companies
• Challenge tests
• Food relevant viruses (HAV, HEV, norovirus etc.)
• Training courses, inspections, hygiene advice

Accreditations:
• DIN/EN ISO/IEC 17025 (DAkkS for second governmental samples)
• § 43 IfSG (permission for working with pathogens according to NRW-governmental permission) drinking water laboratory and admitted laboratory of the "composite quality control association" for analysis of salmonella.

Eurofins Institut Dr. Rothe

For more than 60 years, food and non-food products have been analyzed accompanied with excellent customer service. The laboratory offers a broad spectrum of analyses and the corresponding judgement of food, cosmetics and consumer goods (e.g. hygiene papers, detergents) for the retail business as well as for trading companies and for producers.

Services:
Food:
General food analysis
Analysis of nutritional values
Cosmetics:
Analysis of ingredients such as active agents (e.g. organic and inorganic UV-filters, anti-dandruff agents, vitamins, deodorant agents)
Consumer goods:
Hygiene Paper: Analysis of parameters which reflect the price-performance ratio (e.g. mass, thickness, water absorption, tensile strength)
Analysis of organic residues and contaminants (e.g. formaldehyde, MCPD and DCP)
Detergents: Analysis of ingredients such as active agents

Accreditations:
• DIN EN ISO/IEC 17025 (DAkkS for second governmental samples)
• § 43 IfSG (permission for working with pathogens according to NRW-governmental permission) drinking water laboratory and admitted laboratory of the "composite quality control association" for analysis of salmonella.

Eurofins Food Control Services

Founded in 2015 but based on more than 20 years of experience Eurofins Food Control Services offers its services nationwide. Eurofins FCS provides food safety and hygiene audits as well as consultancy on food safety systems and related custom-tailored training to clients ranging from producer, logistics, retail to catering.

In 2017 we will acquire our accreditation for DIN EN ISO/EC 17065 to be able to offer certification services for IFS and QS standards.

Services:
• Food safety audits
• Internal audits
• Supplier audits
• Food safety audits
• Consultancy and implementation of food safety management systems (e.g HACCP, IFS, BRC ISO 22.000)
• Risk management
• Customized training
• Interim management
• Sample taking

Accreditations:
• DIN EN ISO/EC 17065 (in progress - target 2017)

Eurofins Genomics

Eurofins Genomics' expertise in DNA analysis of food and food products is 
regularly requested from clients all over the world.

Eurofins Genomics is internationally renowned for the quality and reliability of its services. Nearly all test methods are ISO 17025:2005 accredited.

Eurofins Genomics uniquely combines long-term expertise in food testing, veterinary testing and forensic/genetics making Eurofins Genomics an internationally leading European laboratory in "Food Forensics".

The site comprises one of Europe’s largest providers for industrial scale production of oligonucleotides, gene synthesis, DNA sequencing, Applied Genetics, genotyping, Pharmacogenomics and DNA Forensics. We are further closely connected with other Eurofins Genomics sites in Europe, USA, India and Asia.

For food authenticity testing and other food testing applications, we work tightly with experts from other Eurofins Food testing laboratories to deliver optimal service packages and cost-efficient solutions. Our approach to our clients is highly service oriented.

**Services:**

- Food authenticity testing
  - Species and breed/variety identification
  - Compositional analysis including quantification
  - Residual DNA Testing
  - All sample materials from raw material to all processing stages up to instant meals or health products
  - All species (animals, plants, microorganisms, human)

- (Semi-quantitative) Meat testing for products such as sausages, minced meat including quantification
- Fish and seafood testing
- Authenticity testing of Basmati and Thai rice with high quantitative accuracy
- Authenticity testing of pine nuts
- Assay setup and validation in all stages, from marker discovery up to ISO 17025
- Establishment of new methods as a contracted and collaborative laboratory
- Consultancy
- Court expert witness service from highly experienced scientists

**Accreditations:**
- ISO 17025
- ISO 9001

- The laboratory is regularly audited by clients, including the biopharmaceutical industry and the food & feed industry
- Regular and long-term participation in numerous ring trials

**Eurofins GfA Lab Service**

With over 30 years of experience, Eurofins GfA Lab Service is the world’s leading dioxin laboratory. The main focus of the analytical portfolio is the analysis of persistent organic contaminants (e.g. dioxins, PCB, flame retardants, PFCs, Stockholm POPs). Representative for a number of parameters, chlorinated, brominated, mixed-halogenated dioxins and furans, polychlorinated biphenyls (PCBs), brominated flame retardants, poly/per-fluorinated chemicals (PFCs) as well as organotin compounds are examined in almost every matrix.

Eurofins GfA Lab Service is a state-of-the-art laboratory using techniques such as HRGC/HRMS systems, GC/MS systems, GC/MS systems, API-GC/MS/MS system and LC/MS/MS systems.

**Services:**

- The Eurofins GfA Lab Service laboratory hosts the following units.
  1.) Dioxins NG

48h-analytical service for dioxins and PCBs in selected food and feed matrices offers fast processing times in line with Regulation (EU) No. 589/2014 (food) and No. 709/2014 (feed).

2.) Dioxin Competence Center

The analytical portfolio includes the analysis of dioxins for a wide range of matrices for food/feed and for environmental samples on ultra trace levels.

---

**Eurofins GfA Lab Service is in a position to analyse all 209 PCBs including the dioxin-like PCBs / WHO-PCBs and the DIN / Indicator and ndl-PCBs (non dioxin-like) as required by the California Proposition 65, in our own laboratory.**

3.) POPs Competence Center

Eurofins GfA Lab Service is one of the few laboratories worldwide that is able to analyze all 27 POP substances banned or regulated in the Stockholm Convention in its own laboratory.

4.) Special Project-based Services

In addition to the standardised services offered in our high performance laboratory, Eurofins GfA Lab Service has many years of experience and the scientific and technical know-how for providing special services beyond the established procedures. Custom-tailored analysis, special project support, method development, method validation as well as data interpretation and publication on scientific platforms and in journals will be of special value for processing of scientific projects of governmental authorities and non-governmental organisations.

5.) Provision of sampling material

On top of carrying out different analyses, Eurofins GfA Lab Service GmbH also provides sampling material, especially for air-monitoring purposes such as cartridges filled with polyurethane foam (PUF) or XAD resin, pre-spiked or non-spiked, following the requirements of EN 1948 (part 1 to 3 (dioxins) or part 4 (PCBs)) or CEN/TS 1948-5.

**Accreditations:**

- Officially acknowledged measuring site according to §29b Federal Emission Control Act (BImSchG), group I-Nr.1 and group IV for specific analysis of substances requiring special complexity for sampling or analysis
- Examination laboratory for soil and sewage sludge according to § 3 Sewage Sludge Ordinance (AbfKlärV)
- Officially acknowledged by the French environmental ministry for the measurement of PCDD/F in emission samples
- Analysis in compliance with EU-
guidelines, international recognised standards, e.g. EN 1948, EPA and other accredited methods
• GOED member (Global Organization for EPA and DHA Omega-3)
• IFFO member (International Fishmeal and Fish Oil Organisation)
• Expert for official counter samples according to §43 LFGB, chemical-physical and microbiological examination of food
• QS approval as laboratory in the field of feed monitoring for the parameters, dioxins, PCBs, heavy metals, aflatoxins, DON, ZEA, PAH, animal ingredients, pesticides, salmonellae, ochratoxins and methanol.

Eurofins Institute Dr. Appelt Hilter

Eurofins Institute Dr. Appelt Hilter GmbH carries out chemical, physical, sensorial and microbiological analyses. Sampling and hygiene testing can also be offered.

Furthermore Eurofins Institute Dr. Appelt Hilter provides consultancy, label and declaration checks, marketability checks and certification on foodstuffs.

Services:

Eurofins Institute Dr. Appelt Hilter assists producers, importers and exports in questions regarding foodstuffs and animal fodder:
• General food analyses
• Consultancy for marketability and storage durability
• Specialist analyses & consultancy for oils and fats and products derived from oils and fats (margarine) including the analysis of all relevant fat attending compounds and profiles; determination of adulteration, ageing, oxidation
• Specialist analyses & consultancy for convenience products
• Specialist analyses & consultancy for sweets and chocolates

• Specialist analyses & consultancy for ice-cream and frozen products
• Specialist analyses & consultancy for meat and meat products
• Specialist in microbiology testing (cultural, Petrifilm, PCR, species identification) and extremely rush routine release analyses for food (or Feed) producers (e.g. Salmonella PCR within 20 h) limited just to the minimum technically required time
• Specialist in the field of food law, labelling and questions concerning lab's duty of informing authorities.

Eurofins Institute Dr. Appelt Hilter also provides assistance to companies in the food business with respect to selecting and coordinating analyses for their special needs. This includes designing sampling and inspection plans as well as setting up testing schemes as a basis for retailer's needs.

The company offers services from its authorised experts for double and cross checks and offers the special competence to provide certificates and judgements from its appointed and sworn chemist.

The laboratory is located in the north-west region of Germany and can provide collection services in a radius of 150 km (100 miles).

Accreditations:
• DIN EN ISO 17025
• Permission to work with pathogens according to § 44 IfSG
• Authorised experts for double and cross checks according to § 43 LFGB (German Food and Feed Code)
• Appointed and sworn chemist.

Eurofins Institute Dr. Appelt Leipzig

Eurofins Institute Dr. Appelt Leipzig provides analytical services through the whole supply chain. It is a testing laboratory for food, finished products, intermediates and raw products, drinking water and including release and rush analyses.

Services:
The laboratory offers a broad range of services to the manufacturing industry and food retailers including testing, expertise and sampling in the following fields:
• Chemical and microbiological testing of food
• Residue and contaminant analyses
• Chemical-physical analyses
• Molecular biological testing (Allergens, ELISA, PCR)
• Sensory testing
• Check on industrial hygiene

Our focus is offering integrated concepts for sampling, auditing, analytics and evaluation, consultation and training.

Eurofins Institute Dr. Appelt Leipzig has experience in labelling checks, site specific organization of seminars, audits and in-house trainings.

Accreditations:
• DIN EN ISO 17025
• Official expert for control tests according to §43 LFGB (German Food and Feed Code),
• QS acknowledge laboratories for food monitoring, investigation body for the BNN-Monitoring for the food groups B 1 to B2
• Investigation body for drinking water according to §15 chapter 4 TrinkwV 2001 for microbiological, chemical (on-site-parameters)
• Sensory testing including sampling, investigation body according to §19 chapter 2 TrinkwV 2001
• Permission to work with pathogens according to § 44 InfektionsschutzG.

Eurofins Laborservices

Eurofins Laborservices conducts a broad range of bacteriological analyses of food for retailers and food producers in Germany. In addition Eurofins Laborservices provides all
relevant analytical services through the whole supply chain of food, finished products, intermediates and raw materials.

Services:

• Competence Centre for meat and meat-based products
• Competence Centre for fruit juices, non-alcoholic beverages and jam
• Competence Centre for dairy products
• Microbiology
• Specialist in analyses, services & consultancies for retailers (including sample-collection across Germany)

Accreditations:

• DIN EN ISO/IEC 17025.

Eurofins BioPharma Product Testing Munich

Eurofins BioPharma Product Testing Munich GmbH is an internationally operating testing laboratory offering comprehensive capabilities in safety and activity testing. With more than 30 years of experience, our team of scientists offers a broad scope of biological studies, which meet the international regulatory requirements of safety testing for feed, novel food, food additives, food enzymes and flavourings.

The identification of hazardous ingredients is mandatory for consumer protection. Toxicological testing is used to determine, whether food or feed products would pose any kind of risk to the health of consumers.

Eurofins BioPharma Product Testing Munich provides the full service to assess the biological and toxicological data under GLP-compliance according to the current European regulations (EFSA) and further international relevant guidelines (Redbook 2000).

Safety data for food/feed need to be generated by a basic set of toxicological studies. In addition further studies might be required on a case by case basis.

Services:

• Genetic toxicity e.g. AMES Test (OECD 471) and Micronucleus Study (OECD 487)
• Sub chronic toxicity e.g. 90-Day Oral Toxicity Study (OECD 408) [under consideration of specific adaptations laid down in more recent update of Guideline 407 (as required in EFSA Journal 2012; 10(7):2760: Guidance for submission for food additive evaluations)]
• Chronic toxicity / Carcinogenicity
• Reproductive and developmental toxicity (DART)
• Metabolism / Toxicokinetics

Besides the standard testing battery we offer individual advice concerning your specific project with regard to scientific and regulatory requirements. These customized test designs include neurotoxicity and immunotoxicity testing to address specific safety concerns.

Accreditations:

• Good Laboratory Practice (GLP)
• Good Manufacturing Practice (GMP)
• DIN EN ISO 17025
• FDA audited
• Listed by the World Health Organization (WHO)

Eurofins Food Integrity Control Services

In summer 2017 Eurofins Food Integrity Control Services (EFICS) started to operate in Ritterhude, near Bremen.

As the competence center for honey testing within the Eurofins Group EFICS offers a complete range of state-of-the-art techniques for authenticity testing, the determination of veterinary drugs, sensory testing, microscopic determination of the botanical and geographical origin of honey as well as quality parameters necessary for the international market.

Our experienced team of recognized experts actively participates in national and international working groups as DIN and gives guidance to the industry (e.g. German and...
European honey associations. EFICS offers an extensive and in line with demand service portfolio for the analysis, assessment and quality assurance of honey.

**Services:**
- Enzymatic, photometric, chromatographic, mass-spectrometry and high resolution mass spectrometry methods
- Stable isotope analysis (EA/LC-IRMS)
- Nuclear Magnetic Resonance Spectroscopy (NMR)
- Veterinary drugs (Multi methods by LC-HRMS)
- Botanical and geographical origin (Microscopy)
- Visual and organoleptic evaluation
- Compositional analysis according to Honey Directive 2001/110/EC
- Pyrrolizidine alkaloids
- Pesticides screening
- Heavy metals
- Genetically modified organisms (GMO)

**Accreditations:**
The lab applied for accreditation according to DIN/ISO 17025. The accreditation certificate is expected mid of 2018.

**Eurofins Analytical Services India**

Amongst other activities, Eurofins in India provides services for sampling, inspection and food analysis

**Services:**
The initial focus areas for our lab are the following types of food analysis:
- Microbiology
- Heavy metals
- Allergens
- Vitamins
- Proximate analysis
- DNA authenticity
- Inspection Service

**Accreditations:**
- ISO/IEC 17025: 2005
- Accredited laboratory for Chemical and Biological sections
- Accredited by NABL (National Accreditation Board for Testing and Calibration Laboratories) Department of Science and Technology, India.
- Accredited by FSSAI (Food Safety and Standards Authority of India)

**Eurofins Analytical Services Delhi**

Eurofins new lab in Delhi will initially offer microbiology and chemical analysis and over the next year, the portfolio of services will be rapidly expanded to cover other areas of analysis.

Our new lab operates with the same high standards that Eurofins is well known for. The methods and instruments are harmonised with global best practices of the Eurofins Group.

Many of our customers are based in and around New Delhi which will bring us closer to our customers, reduce sample transit time and improve our service levels.

**IRELAND**

**Eurofins Food Ireland**

Eurofins Food Ireland is a specialist microbiology laboratory offering a wide range of accredited tests in the food and environmental sectors.

The laboratory is fully accredited by INAB (299T) to ISO 17025 and also by the Irish Department of Agriculture.

From simple routine testing of samples through to extensive shelf life and new product development testing, Eurofins Food Ireland provides local and international expert analysis and advice as well as commitment to
deliver the best service and turn-around-time of results.

Eurofins Food Ireland’s main clients are food safety authorities, local authorities, food retailers, food processors and manufacturers, catering organisations and water treatment contractors

Accreditations:
- ISO/IEC 17025: 2005 (Registration Number 299T)
- Tesco Laboratory Approval Scheme (TLA)
- Marks & Spencer PLC Independent Supplementary Audit.

EUROPE

Eurofins Qualis

Eurofins Qualis is a Sensory Analysis and Consulting Centre founded in 1992 and specialises in products for consumption. The laboratory can offer services of audit, sampling and consumer science throughout Italy.

Services:
- Sensory Profile Analysis and Integrated Methods
- Consumer Sciences (food & non-food)
- Shelf life studies through sensory indexes
- Inspections in retail stores of food distribution companies, in production factories, in storages, kitchens and places where foodstuffs are provided
- Sampling activity
- Supervision and supplier audit according to ISO, BRC and IFS standard

Training activities concerning:
- Quality, Hygiene and HACCP, GMP, Sensory analysis
- Food labelling translation and check

ITALY

Eurofins Chemical Control

Eurofins Chemical Control carries out chemical, physico-chemical, microbiological and molecular biology analyses, research and consultancy on foodstuffs.

The laboratory is fully accredited by ACCREDIA in compliance with UNI CEI EN ISO/IEC 17025:2005 standard (laboratory no. 0490) and also by the Italian Ministry of Health, the Italian Ministry of University, Scientific and Technological Research and by the Japanese Ministry of Health. Laboratory certified by QS Fachgesellschaft for Fruit, Vegetables, Potatoes (residue monitoring).

Eurofins Chemical Control’s main clients are food industries and retailers.

Founded in 1979, Eurofins Chemical Control has a highly qualified staff (about 55 people) and technologically innovative analytical equipment with about 4,000 m² of well-organized laboratories.

Services:
- Nutritional aspects and micro constituents analyses (minerals, additives, characteristic molecules)
- Shelf life studies
- Chemical contaminants residue analyses (pesticides, mycotoxins, heavy metals, veterinary drugs residues, acrylamide, furan and methylfurane, glycoalkaloids, hydrocyanic acid)
- Microbiological testing and detection of extraneous materials (Filth test), merchandise quality tests
- ELISA determinations for allergens
- Molecular biology testing for allergens
- Setting up of new analytical methods (particular requirements, food alerts) and innovation of existing methods with validation of different food matrices
- Setting up of new analytical indexes for an unbiased evaluation of technological and process parameters
- Technological consulting
- Planning and management of quality control plans
- Interpretation of analytical results with reference to legislation, bibliography, technological-process parameters
- Service of rush analysis by request

Accreditations:
- UNI CEI EN ISO/IEC 17025:2005 (laboratory no. 0490)
- UNI EN ISO 9001:2008
- QS-residue monitoring certification

Eurofins Pivetti

Eurofins Pivetti srl has been operating in the Parmigiano Reggiano, Grana Padano and Trentino Grana sector since 1968.

It performs chemical and microbiological analyses of milk and its derivatives, providing technological assistance to dairies at all production phases and to the finished product, up to the sale of cheese. It offers food, zootechnical and hygienic sanitary advice and assistance to farmers, aimed at ensuring milk quality.

Our staff consists of 13 technicians, involved at various levels in milk analysis for more than 700 companies producing milk for Parmesan cheese. They follow Parmesan cheese production in 40 diaries, for a production of about 15,000,000 kg of cheese per year.

The lab became part of the Eurofins group in December 2012 and it has improved its microbiological laboratory, which now is fully accredited by ACCREDIA in compliance with UNI CEI EN ISO/IEC 17025:2005 standard (laboratory no. 0608)

Services:
Our analytical services for milk and its derivatives include:
- Microbiology: including pathogens, indicator & spoilage organisms
- Chemical: pH testing, cell counts, antibiotics research
- VERIX: x-ray machine service for monitoring cheese and commercial selections
- Livestock advice and cheese production as well as marketing consulting

Accreditations:
• UNI CEI EN ISO/IEC 17205:2005 (laboratory no. 0608)

JAPAN

Eurofins Food and Product Testing Japan

Food and Product Testing Japan provides a wide range of reliable analytical food testing services to clients across multiple industries from food producers to ingredient producers, trading firms and retailers. As a unique unrivalled laboratory as the only one foreign owned independent laboratory authorized by Ministry of Health, Labour and Welfare (MHLW) in Japan and with ISO/IEC17025 accreditation, it is also able to offer testing services for exporting as well as importing foods and other products.

Services:
• Pesticides
• Nutrition
• Functional foods/Metabolomics
• Tea profile
• Microbiology
• Foreign object
• Heavy metals
• GLP pesticide for registration

Accreditations:
• Ministry of Health, Labour and Welfare (MHLW) in Japan

Norway

Eurofins Food & Feed Testing Norway
The laboratories of Food Norway conduct a broad range of accredited chemical and bacteriological analyses of food and feed. We have specialists in aquaculture, and we perform tests for the fish farming industry, fish feed and fish oil producers.

We deliver all types of analyses to the Norwegian market. Many chemical analyses are performed at Eurofins competence centres and microbiology is performed closed to customers at both our main laboratory in Moss, and at all our local laboratories close to customers.

Eurofins Food & Feed Testing Norway arranges accredited proficiency testing programs of food and water microbiology. We have over 300 clients in more than 50 countries, and we are internationally acknowledged for our PT schemes

Accreditations:
• NS/EN ISO/ IEC 17025

POLAND

Eurofins Poland

Eurofins Polska Sp. Z o.o. is an independent and competent laboratory performing analyses of environmental samples, food and non-food products, and offering quality supervision and control services. We act in accordance with the PN EN ISO 17025:2005 quality management system, which has been certified by Accreditation Certificate No. AB 1334 by the Polish Centre for Accreditation.

Eurofins Polska Sp. Z o.o. is approved by the Chief Veterinary Officer for the analyses of animal feed and by the State District Inspector of the Department of Sanitation for water sample collection and analysis.

Services:

- Microbiological and physicochemical analyses are performed both in raw materials, semi-finished products, finished products, and environmental samples for the producers of dairy, fish, meat, fruit and vegetables, bakery and confectionery as well as in non-food products (household chemicals and cosmetics). Analyses are performed in accordance with applicable methodological standards, and to individual customer specifications.

- Marking and verification of labelling of food products, household chemicals and cosmetics is offered as well. Our experts assess the compliance of labelling with applicable laws and with the requirements of GDA labelling.

- Audits of suppliers are conducted by experienced and highly qualified auditors that confirm compliance with the rules and standards by IFS, ISO 22000, HACCP, GHP and GMP.

- Training topics are adapted to the needs and expectations of our customers. They concern areas related to hazards in the production process, legal regulations, food labelling, sensory analysis and many others. Trainings are given by experienced professionals from the field, acclaimed throughout the country.

Accreditations:

• Accredited according to EN ISO 17025 by PCA (Polish Centre for Accreditation) certificate no AB 1334

**SLOVAKIA**

**Eurofins Bratislava**

Eurofins Bel/Novamann performs sampling, chemical, microbiological and sensory laboratory analyses, certification, training and consultancy services focusing on foodstuffs, ambient and working environment, cosmetics, cleaning and washing preparations, fuels and lubricants, biopharmaceutical products and food safety management systems (HACCP, ISO 22000). The services are offered to a broad range of companies, authorities and organisations.

The laboratories at Bratislava, Nové Zámky, Piešťany, Turčianske Teplice, Ružomberok and Trebišov are accredited according to the ISO 17025 standard. The laboratories in Bratislava, Piešťany and Turčianske Teplice work also in compliance with GMP.

The certification body carries out certification of products. The body is accredited according to the ISO 45011 standard and authorised by the Ministry of Agriculture of the Slovak Republic for control of food and agricultural products with protected geographical indication (PGI), protected designation of origin (PDO) and traditional specialities guaranteed (TSG)

**Services:**
- Own logistic system for sample collection (20 collection vehicles with temperature control)
- Analytical assays of foods and food raw materials within the system
- Food and feed microbiology (including pathogens, shelf-life studies and audit advice):
  - Full range of nutritional analyses & labelling consultation
  - Trace elements
  - Mycotoxins
  - Heavy metals and toxic elements, allergens, organoleptics

**Accreditations:**
- STN EN ISO 17 025:2005 accredited by SNAS (SK) accreditation body

**Eurofins Nové Zámky**

**Services:**
- Food and feed microbiology: including pathogens, shelf-life studies and audit advice
- Food and feed chemistry
- Full range of nutritional analysis & labeling
- Allergens
- Contaminants (polycyclic aromatic hydrocarbons, nitrates, mycotoxins, heavy metals )
- Additives (nitrates, nitrates, sweeteners, artificial dyes, preservatives )
- Trace and toxic elements
- Organoleptic tests

**Accreditations:**
STN EN ISO 17 025:2005 accredited by SNAS (SK) accreditation body

**SPAIN**

**Eurofins Food Testing Spain**

Eurofins Análisis Alimentario Holding España S.L. is a reference laboratory for the Agro and Food sectors in Spain.

With the recent acquisition of Applus agrofood testing labs, we have become number one in the country, focusing mainly in the food and agro market. Over the last 20 years, the food lab has become a leading food testing provider, with a high penetration in the largest consumer goods retailers in the domestic market. The agrofood testing laboratories are also a local reference in agro-environmental testing, with specific competence in pesticides testing.

We operate 5 laboratory sites in Spain (Madrid, Barcelona, Lérida, Almería and Pamplona) with 2 further satellite facilities in Spain and Portugal.

SWITZERLAND

Eurofins Food Testing Switzerland

Eurofins Switzerland, founded in 2000, offers microbiological and chemical analyses of food, feed, as well as biopharmaceutical and environmental analyses.

Important services are consulting and auditing-services for the biopharmaceutical, food industry, hotels and gastronomy. Around 45 co-workers provide services in around 1000 m² lab-space. Labs are located in Schönenwerd.

The laboratory has strong expertise in microbiological analyses (classical quantitative determination, detection and taxonomic characterization) for a wide range of microorganisms.

In chemistry, there is extensive experience in the analysis and evaluation of food and feedstuffs. Instrumentation includes liquid, gas, and thin layer chromatography (HPLC, GC, and TLC), UV/VIS spectroscopy and a range of physical chemical methods.

Services:

• Microbiological and chemical analyses of food, feedstuffs, water (drinking water, waste water)
• Support in food-labelling and conformity checks according to Swiss and European law. Special expertise is the management of retailers’ complex demands in the Swiss market.
• Consultancy and monitoring (food safety, restaurants, retailers, industrial production, biopharmaceutical industry etc.)

Accreditations:

• ISO 17025
• ISO 17020
• GMP
• FDA recognised

The sales office was set up in March 2017. All the samples are sent to Eurofins group laboratories worldwide according to the testing matrix. We take care of all your testing needs and the logistics of the samples with our network of laboratories in the region.

Services:

• Allergen testing
• Dioxins, furans and dioxin-like PCBs
• Food irradiation

Accreditations:

• ISO/IEC 17025: 2005
• GMP10 + Feed Safety

Eurofins Food Testing BV

Eurofins location in Heerenveen, former name Eurofins Analytico Food, has an expertise on a wide range of parameters, including pathogens. Routine work is fully automated and highly efficient. Eurofins offers Legionella testing and risk-analysis. Focus on extensive nutritional analyses and contaminants including heavy metals and mineral

Additional services are sampling, complete product labelling checks, hygiene inspections and training, courier services, on-line reporting and 24 hour availability.

Eurofins Carbohydrate Competence Centre is located in Heerenveen and has highly qualified and experienced graduates, all possible carbohydrate tests like high and low molar dietary fibres, starches, sugar profiles and many others, have been upgraded, implemented or are in development.

Services:

Expertise on a wide range of parameters, including pathogens. Routine work is fully automated and highly efficient. Eurofins offers Legionella testing and risk-analysis.

Focus on extensive nutritional analyses and contaminants including heavy metals and mineral

Eurofins Food Safety Solutions BV

Offers fast contaminant and nutrient analyses in food, feed, oils, fats, nuts, seeds, herbs and spices tailored to the needs of companies in the Port of Rotterdam and Amsterdam.

In addition, all Eurofins analyses are offered since the Rotterdam lab is your portal to the Eurofins network. The laboratory located in Barendrecht specializes in analyses with a very short TAT (generally 4-48 hours).

We use state-of-the-art laboratory equipment with methods such as: GCMS/MS, GC-FID, GC-ECD, GC-NPD, HPLC-FLD, HPLC-UV and GFAAS.

Services:

- Feed testing officially acknowledged by GAFTA (one of the four reference laboratories), VERNOF, CNGD, HAFU
- Edible oils and fats officially acknowledged by FOSFA and NOFOTA

They can also offer logistics services such as sample pick up and sampling according to EU or Codex Alimentarius regulations.

- Moisture, crude protein, crude fat, starch, raw fibre, ash, ash in HCl, fatty acid composition
- Mycotoxins: e.g. Aflatoxin, Ochratoxin, Deoxynivalenol, Zearalenon, Fumonisin
- Fat content, mineral oil, impurities, ash, FFA, peroxide number, melting point, solid fat content, 3-MCPD, PAH, BAP,
- PCB’s, DPTG
- Organoleptic analyses as admixtures and damaged grain and seeds.

Accreditations:

Eurofins Agro Testing Ukraine
We are a young (opened August 2014) yet experienced (working in the Ukrainian market since 2012) branch of the Eurofins group.

Services:
SOIL:
• Agrochemical and Environmental Soil testing, fertilization advisory
• Nutrients maps
• PCR analysis for Rapeseed
• Nematodes
• Pesticides and heavy metal residue

**GRAIN and OILSEEDS:**

Sales parameters:
• Mycotoxins
• Dioxins, Pesticides
• GMO – quantitative and qualitative analysis
• NIT grain network program

Other:
• Plant tissue analysis, fertilization
• Forage analysis for nutrients, toxins, vitamins, minerals, etc.
• Food analysis
• Water analysis
• Consumer goods testing
• Pharma testing

Over 100 000 analyses available on request

All samples are sent to the Eurofins group laboratories worldwide according to the testing matrix. We take care of all your testing needs and the logistics of the samples.

**United Kingdom**

Eurofins Food Testing Wolverhampton

Established in 2004, Eurofins Food Testing UK has a network of 10 sites across the UK offering testing and advisory services to customers throughout the food and feed supply chains; from primary producers, processors and manufacturers, to retailers, wholesalers and caterers.

Our laboratories hold UKAS accreditations and ensure the requirements of ISO 17025 are met on a daily basis to maintain the highest standard of quality. We comply with approval schemes from major retailers Tesco and M&S for our methodologies.

We offer a comprehensive range of state-of-the-art analytical techniques to support our customers’ increasingly stringent quality and food safety standards.

**Services:**

• Microbiology: including pathogens, indicator & spoilage organisms, shelf-life studies and audit advice
• Full range of nutritional analysis for labelling
• Contaminants
• Allergens

**Accreditations:**

• Eurofins Wolverhampton is accredited by UKAS under registration number 0342 for microbiology and chemistry. Accreditation is to ISO 17025
• Tesco Laboratory Approval (TLA) Scheme
• Marks & Spencer PLC Independent Supplementary Audit.

**ILS Limited - a Eurofins Company**
International Laboratory Services is a market leading contract laboratory, providing food and pharmaceutical laboratory testing services. ILS provide a wide range of UKAS accredited, cGMP compliant chemical and microbiological testing to both the food and pharmaceutical industries.

With over 40 years of experience, our two separate divisions of trained and skilled scientists allow us to provide high scientific standards of quality, accuracy and delivery. Continual investment in the laboratories and the latest technologies allow ILS to remain ahead of the field in contract laboratory research, consultancy and testing services.

**Eurofins Central Analytical Laboratories**
Eurofins Central Analytical Laboratories is a food testing laboratory offering a variety of nutritional, residue and microbiology testing methodologies in agricultural commodities and foods. The company has been in business in New Orleans since 1972.

- Eurofins CAL is a certified laboratory under USDA, AOCS, FOSFA, and GAFTA and has a close working relationship with the US Food and Drug Administration.

- Services:
  - Contaminants Testing
  - Antibiotic Residues
  - Method Development
  - FDA Detention Assistance
  - Pesticide Residues

Eurofins Supplement Analysis Centre
The Eurofins Supplement Analysis Centre was established in 1982 with a focus on natural product chemistry. It is a world leader in method applications for dietary supplements including the analysis of botanical, herbal, phyto-chemical, sports nutrition, and dietary supplement products.

It is also the Nutraceutical Centre of Excellence for Eurofins Scientific due to its highly recognised level of analytical expertise in the dietary supplement industry.

This facility is the contract laboratory leader in capillary electrophoresis method applications for dietary supplements. It is registered and inspected by the FDA and operates under cGMP compliance guidelines.

Services:
• Determining the identity and purity of raw materials
• Quantifying active and target compounds in finished products (capsules, tablets, gel-caps, liquid extracts)
• Providing the biotechnology, biopharmaceutical and medical device industries with expertise in methods development and validation for R&D projects
• Analytical support for preclinical and stability studies
• Identifying degradation products and unknowns

Instrumentation utilised includes GC, HPLC, GC-MS, HPLC-MS, FTIR, UV-Vis, and CE Instrumentation

Eurofins Genescan
Eurofins GeneScan is an ISO 17025 accredited commercial testing laboratory that specialises in GMO detection and applied molecular biology for the food, feed and seed industries.

Eurofins GeneScan also offers allergen testing, and detection of non-approved materials in meat and bone meal.

The laboratory provides qualitative and quantitative PCR analyses and ELISA testing. Also offered are consulting and auditing services for non-GM and identity preservation process control systems.

The laboratory, located in suburban New Orleans, has several years’ experience providing GMO detection to the US food and agricultural market. It has consistently scored at the top of proficiency tests and ring trials and has been successfully audited by several large, multinational companies.

Services:
• GMO Testing
• Allergen Testing
• Gluten Testing
• Meat Species Identification
• Fish Authenticity
• Halal/Kosher Testing

Accreditations:
• ISO 17025

Eurofins DQCI - Mounds View

Eurofins DQCI Services has become one of the premier Dairy Laboratory Service companies in North America. We have established our excellent industry reputation over the past 50 years by providing accurate and timely analytical results and through recommendations by our thousands of satisfied customers globally.

Services:
• Calibration Standards
• Chemistry Analyses
• Custom Calibration Sets
• Instrument Calibration Standards
• Mastitis Testing
• Milk Pregnancy Testing
• Producer Milk Testing

Accreditations:
• ISO 17025

Eurofins BioDiagnostics - Longmont

Eurofins BioDiagnostics is the leading testing laboratory for seed and plant health, animal agrigenomics and probiotic ID services.

Services:
Seed Health Testing (specializing in Bacterial Fruit Blotch, Bioreba AG and Plant Genetics), Hybrid Purity and a Variety ID testing using IEF and DNA techniques, molecular marker use for plant breeding programs. Additional testing include Animal agrigenomic testing and probiotic and microbial testing.

Accreditations:
• NSHS accreditation
• ASLN accreditation
• USDA ASL accreditation
• CCIA accreditation

Eurofins QTA

Now part of Eurofins, the Quality Trait Analysis (QTA) System utilizes both mid, and near infrared spectroscopy, to provide analyses of the broadest range of materials, components and properties.

The Eurofins QTA business handles all the technical development, configuration, management and monitoring behind the scenes, enabling accurate quality testing by non-technical personnel, and freeing you up to manage your business.

Services:
• Complete service for infrared method development and validation
• Hassle-free Implementation of infrared technology
• Implement Robust calibrations using patented Chingometrics
• Provide service to ensure the long term NIR/IR performance
• Centralized quality data management
• Remote method development, addition and modification
• 24/7 technical support for remote troubleshooting

Eurofins Genomics

Eurofins Genomics offers industrial scale production of DNA/RNA oligonucleotides, gene synthesis, DNA sequencing, Next Generation Sequencing, applied genomics, genotyping, and gene expression.

We offer one of the fastest turnaround times for sequencing in the country, the lowest error rate in the industry for oligonucleotides, and our approach is highly service oriented.

Services:
• DNA / RNA Oligonucleotides with a variety of options, purifications and modifications available.
  • DNA Sequencing in tubes, plates and kits.
  • Gene Synthesis & Synthetic Biology
  • Gene Fragments
  • Next Generation Sequencing
  • qPCR and MGB-eclipse probes
  • Library Assays
  • Applied Genetics: Genotyping, Gene Expression & Microarrays
  • Species and breed/variety identification
  • Residual DNA Testing
  • All sample materials from raw material to all processing stages up to instant meals or health products
  • All species (animals, plants, microorganisms, human)
  • Meat, fish and seafood testing
  • Authenticity testing of Basmati, Thai rice, and pine nuts with high quantitative accuracy
  • Assay setup and validation in all stages, from marker discovery up to ISO 17025
  • Establishment of new methods as a contracted and collaborative laboratory
  • Consultancy

Accreditations:
• CLIA accredited
• CAP accredited
• ISO 9001:2008
• ISO 13485:2003
• FDA 3009882691 for the manufacture of ASRs (Analyte Specific Reagents) for use in IVD product

**Vietnam**

**Eurofins SAC KY HAI DANG**

Eurofins SKHD has invested in modern laboratory facilities in Ho Chi Minh City (and a new office with lab equipment newly opened in Can Tho City in the Mekong Delta), staffed with qualified technical personnel.

**Services:**

- Analyses for residues and contaminants: Pesticides; Antibiotics; Mycotoxins; Heavy metals  
- Nutritional analyses: Vitamin testing; Carbohydrates testing; Amino; acid analysis; Fatty acid analysis; Lipids; Inorganic components  
- Microbiological  
- Analysis of agro and aquatic products, processed food, animal and poultry feed...  
- Natural compounds: essential oils, aromatherapy, mineral, ...  
- Environmental monitoring samples: water, air, soil, mud...

**Accreditations:**

- Certificate of Accreditation No. VILAS 238  
- Ministry of Agriculture and Rural Development assigned Eurofins Sac Ky Hai Dan as:  
  - Crops product testing's laboratory under Decision No. 182/ QĐ-TT-QLCL  
  - Organic Fertilizer testing's laboratory under Decision No. 171/ QĐ-TT-QLCL  
  - Department of Agricultural products tested by decision of No.2594/QĐ-BNN-QLCL  
  - Animal feed testing's laboratory according to the Decision No. 191/QĐ-CN-TÂCN  
  - Ministry of Health has assigned Eurofins Sac Ky Hai Dan as Food Safety Testing Laboratory under Decision No.638/QĐ-ATTP.  
  - Ministry of Industry and Trade assigned Eurofins Sac Ky Hai Dan as an Inorganic Fertilizer testing's laboratory under Decision No. 963/BCT-KHCN  
  - Certification of Ministry of Natural Resources and Environment of The Socialist Republic of Viet Nam about environmental monitoring (VIMCERT 020)

**THE NETHERLANDS**

**Eurofins Agro Wageningen**

Eurofins Agro offer global sampling, analysis and information through its own branches and/or a global network of affiliates.

Eurofins Agro offers its customers:
- Efficiency improvement through practical operational advice
- Security through expert analysis and sampling
- Administrative convenience, through cooperation with third parties and use of innovative technologies

Services:
- Fertilization
- Nutritive value
- Soil health
- Crop health

**Ukraine**

**Eurofins Agro Testing Ukraine**

We are a young (opened August 2014) yet experienced (working in the Ukrainian market since 2012) branch of the Eurofins group.

Services:
SOIL:
- Agrochemical and Environmental Soil testing, fertilization advisory
- Nutrients maps
- PCR analysis for Rapeseed
- Nematodes
- Pesticides and heavy metal residue

GRAIN and OILSEEDS:
Sales parameters
- Mycotoxins
- Dioxins, Pesticides
- GMO – quantitative and qualitative analysis
- NIT grain network program

OTHER:
- Plant tissue analysis, fertilization advisory for the top dressing
- Forage analysis for nutrients, toxins, vitamins, minerals, etc.

**UNITED KINGDOM**

**Eurofins Agro UK**

Eurofins Agro UK supports farmers, feed companies and agricultural consultants through the provision of analytical testing of forage, hay, and other feedstuffs. This service enables livestock farmers to optimise animal rations, whilst keeping costs low.
EUROFINS

TECHNOLOGIES

Building on the experience and scientific excellence of the Eurofins Group, Eurofins Technologies is a fast growing provider of diagnostic technologies in the field of Food Safety and Environmental Safety. We currently offer solutions for Food Pathogens, GMO, Mycotoxins, Veterinary Drugs Residues, Allergens and Animal Species.

GERMANY

Eurofins GeneScan Technologies

Eurofins GeneScan Technologies is specialised in the design, development and production of kits and their application for the food and feed testing industry. Two decades of expertise in the development of molecular biology kits and their application in Eurofins laboratories on all continents have led to competitive products, which set standards worldwide.

Based on in depth knowledge of the current market situation and the requirements of the food and feed industry, Eurofins GeneScan Technologies adapts its kit portfolio to meet the most recent market demands and to offer the most efficient analytical solution. Laboratories all over the world trust in the quality of these products which help them to fulfill their customers’ demands.

A dedicated team of specialists is committed to provide assistance to testing laboratories. Besides individual consultation, the support ranges from online courses to individually organized trainings at our customers’ sites.

Services:

• GMO testing kits: screening, identification, quantification with real-time PCR multiplex technology
• Plant pathogen detection kits
• Plant species identification kits: comprehensive screening and specific detection of defined plant species
• Animal species screening and identification kits: authenticity testing for most domestic animal species as well as taxonomic groups of animals
• Pathogen testing kits: fast and reliable detection of food pathogens like Salmonella or Listeria
• DNA extraction kits: kits optimised for different food and feed matrices
• Application support on-site
• Customer trainings and webinars

Accreditations:

• ISO 9001:215 certification
• AFNOR certified kits
• AOAC certified kits
• Eurofins GeneScan methods are found in national and international standards

ITALY

Eurofins Tecna

Tecna® develops and produces immunoassay kits for the detection of chemical contaminants in food and feed products.

With more than 20 years experience in the food diagnostics field and thanks to its internal R&D department, Tecna® can provide any user with the most specific diagnostic solution as ELISA kits, lateral flow tests and immunoaffinity columns.

Services:

• Quantitative mycotoxins analysis in food and feed
• Veterinary drug residues detection in matrices of animal origin, food and feed
• Allergens detection in finished products and raw materials
• Quantitative detection of histamine in seafood

Accreditations:

ISO 9001

USA

Eurofins Abraxis

For nearly 20 years, Abraxis has been developing, manufacturing, and marketing rapid environmental, food, and life sciences test systems, including immunochemistry products and methods, to meet the testing needs of industry and research.

Furthermore, Abraxis has created a wide product portfolio across different technologies, formats and applications including field and lab based testing solutions for both fresh and marine water algal toxins, pesticides, GMO detection and the novel magnetic separation technology AbraMag.

Many methods are validated/verified by regulatory agencies such as US federal agencies including the US Environmental Protection Agency (EPA), the US Department of Agriculture (USDA), the US Geological Survey (USGS), the US Food and Drug Administration (FDA), the Japanese Ministry of the Environment, and the World Health Organization (WHO).

Abraxis holds, or is exclusive licensee, of several key technology patents, with additional applications in process.

SENSORY & MARKETING RESEARCH

CHINA

Eurofins Sensory Testing Shanghai

Sensory Analysis helps enterprises to accurately and quickly grasp consumer perceptions and needs. Eurofins aims to better meet your customer’s needs and improving your market competitiveness. Sensory Analysis provides relevant and specific solutions for optimizing your product.

If you plan an entry into the Chinese market, Eurofins can assist you at every stage starting with research information. The company can investigate your suppliers and finished products by creating a sensory profile, performing consumer, preference and difference tests. Additionally Eurofins also offers Sensory training and consultancy services.

Services:
• Consumer tests
• Preference mapping
• Difference tests
• Training
• Consulting
• Identifying your target customer preferences
• Analysing competitor products
• Adapting and creating new ideas and new products

The Brisbane Laboratory was established in 2012 and specialises in the analysis of Contaminated Soils, Solid Wastes, Waste Oils, Waste Water, Groundwater, Drinking Water, Saline & Freshwater Streams, Industrial Emissions and Workplace air plus Soil Vapour and Petroleum Vapour Intrusion (PVI) as well as Landfill gases.

Standard TAT is 5 Days with surcharges applied for Same day, delivery before 9:30am, 24 hours, 2 Day & 3 Day TAT.

The Brisbane laboratory is a specialist PFAS (Per- and Polyfluorinated Alkyl Substances) laboratory following US EPA and DoD QSM 5.1 procedures. Brisbane also has high-quality expertise in the analysis and interpretation of acid sulfate soil requirements following the latest Australian guidelines.

Expert Air Toxics analyses using the latest active sampling (Summa canisters & thermal desorption tubes) plus the Waterloo Membrane Sampler™ (WMS™) and EPA Method 325 passive sampling for monitoring VOC vapour concentrations. It conducts a full range of Environmental Inorganic and Organic analysis utilising latest GC-MS, LC-MS/MS, GC-FID, GC-ECD, ICP-OES, ICP-MS, FIMS, DA.

EUROPE

AUSTRIA

Eurofins NUA-Umwelt GmbH & Co. KG
Eurofins NUA-Umwelt GmbH & Co. KG has been examining, analysing, evaluating and advising for 30 years. This long-term experience in the area of environment and analysis in combination with the latest know-how from science and research enables us to offer optimal solutions for the examining of pollution relating to water, soil, air and noise.

Services:
Sampling and analysis of:
• Water: drinking water, mineral and spring water, healing water, bathing water, ground water, surface water, waste water, water monitoring and management
• Soil: waste, soil, compost, sludge
• Air: emission measurement, odour measurement, soil air investigation, ambient air testing/workplace measurement, expert opinion
• Noise measurement

BELGIUM

Eurofins Environment Testing Nazareth
Eurofins Belgium offers a wide range of environmental research into water and soil using a set of highly advanced instruments.

Our team consists of technical specialists who are the best in their field and always up-to-date on national and European regulations.

Services:
Dioxin measurements, waste characterisation and special tailor made analyses are within our scope. We have competence in PFT analysis and incineration tests

BRAZIL

Eurofins ASL

ASL is a laboratory that has been providing analytical services since 2002, performing physico-chemical, microbiological, organic, inorganic and toxicological analyzes in environmental matrices such as water, effluents, soil, waste and atmospheric emissions.

Since the beginning of its activities, it has been acting with the highest analytical quality, providing state-of-the-art technology, highly qualified staff and personalized service. Currently it is among the three largest laboratories in Brazil with a structure of 2500 m and one of the accreditation scope meeting ISO IEC 17025.

Accreditations:
• NBR ISO/IEC 17.025:2005

Eurofins ALAC - Garibaldi

ALAC perform analysis of water, wastewater and soil for classification of residues. Ecotoxins, heavy metals and organic compounds, like VOC, SVOC, BTEX, PHA, are some of the parameters analysed by techniques such as CG, CG/MS, ICP, HPLC, IC.

ALAC also offers services on Occupational Health supporting the industry with sampling and analysis of indoor air, analysis of organic solvents, particles, dusts and metals. To reach this market, ALAC has a professional technical team and high quality equipment including GCs, GC/MS, HPLC, ICP, IR, and IC

Eurofins Innolab - Rio de Janeiro

Eurofins Innolab do Brasil was established in Rio de Janeiro in 2001, offering testing for consultancies specialising in the investigation and remediation of contaminated sites.

Sea monitoring projects in Rio de Janeiro were also undertaken, and the lab has become a reference for Consultancies and Industries. In addition wastewater, groundwater and drinking water monitoring services have been offered to the Industrial Sector for many years.

Innolab is the largest environmental testing lab in Rio de Janeiro and a reference lab for many large companies.

Services:
Sampling and analysis of water, effluent, soil, sediment and residue for semi-volatiles, volatiles, hydrocarbons, metals, anions, also physical testing.

All tests are performed in accordance with Brazilian legislation.

Accreditations:

DENMARK

Eurofins Environment Denmark

Eurofins Miljø performs sampling, laboratory analyses and consultancy services focusing on the environment. Modern laboratories in Vejen and Galten service a broad range of companies, authorities and organisations. The laboratories are appointed as national reference laboratories within specific areas of expertise.

Services:
• Environment sampling and analyses: chemical and microbiological testing of air, water, contaminated soil, sludge, sediment and biota for routine parameters like heavy metals, TPH, PAH, PCB and VOCs, as well as non-standard parameters like pesticides, degradation products, glycols, phthalates, amines, polyamines, flame retardants and other POPs applying a range of modern techniques, including ICP-MS, HR-ICP/MS, GC/MS, LC/MS/MS, LC-MS/MS.
• Air monitoring and occupational health and safety: monitoring analyses, tests, and consultancy within stack emission, occupational health, indoor air, personal protection, noise, handling of chemicals, recycling of chemicals, compressed air, ventilation etc.

Accreditations:
• ISO 17025

FINLAND

Eurofins Ahma Rovaniemi
Eurofins Ahma Oy provides environmental analytical services and expert services for environmental monitoring. Laboratory units are located in Rovaniemi, Oulu and Seinäjoki.

Services:
- Inorganic and organic environmental testing of water, soil and sediment
- Microbiological testing of water
- Biological testing of water
- Environmental expert services incl. planning and monitoring
- Sampling and field services for environmental monitoring

Accreditations:
- T131 SFS-EN ISO/IEC 17025:2005 (FINAS)

Eurofins Ahma Seinäjoki
Eurofins Ahma Oy, Seinäjoki provides environmental analytical services from water samples and expert services for environmental monitoring.

Services:
- Laboratory testing of water
- Sampling and field services for environmental monitoring

Accreditations:
- T131 SFS-EN ISO/IEC 17025:2005 (FINAS)

ESTONIA

Eurofins Environment Testing Estonia
After more than 3 years of acting as a satellite laboratory for other Nordic laboratories, Eurofins Environment Testing Estonia OÜ joined the Eurofins Group in 2017.

It mostly specializes in environmental chemical analyses, such as testing of contaminants in soil, sediment, sludge, water and different air matrices, but also covers testing of foodstuffs, materials and much more.

Services:
Example of analyses:
- Acrylamides
- Alkylphenols and ethoxylates
- Brominated biphenyl ethers
- Chloroalkanes
- Dioxins, furans and dioxin-like PCBs
- Elemental analyses
- Glycols
- HBCDD and bisphenols
- Heavy metals
- Organotins
- PAHs
- PCBs
- Pesticides
- PFCs (for example PFOS/PFOA)
- Pharmaceuticals and hormones
- Phenols
- Phthalates
- VOCs

Accreditations:
The laboratory acts in accordance with EN ISO/IEC 17025 quality management system and is accredited by Estonian Accreditation Centre (EAK).

Eurofins Nab Labs Kärsämäki

The Nab Labs Kärsämäki provides accredited emission measurement services. The main focus for Kärsämäki is consultation on, and implementation of emission measurements, as well as the quality assurance of customers own fixed flue-gas monitoring devices – both as demanded by national regulations.

Services:
- Emission measurements from industrial processes
- QAL2 / AST calibration of stack analysers
- Indoor and occupational health related measurements
- Environmental air and indoor health consulting incl. spread-out calculations and noise modelling, bioindicator research, odor, noise and particle measurements

Accreditations:
- T111 SFS-EN ISO/IEC 17025:2005 (FINAS) Typpitie 1

Eurofins Nab Labs Oulu

The Nab Labs Oulu sites add strong insight in chemical industry related services to Finnish Eurofins family. Nab Labs Oulu has two laboratory facilities in the main industrial areas of Oulu, Nuottasaari and Takalaanila. Both facilities are located inside industrial estates as a vital part of customers own operations. Nab Labs Oulu sites give fast-cycle customer service, not only in routine analytics but in demanding special analytics, to several industrial customers.

Services:
- R&D services incl. analytics of trial runs and method development
- Quality control of raw materials, process samples and products
- Occupational health related daily measurements in the production environment
- REACH and problem-solving services

Accreditations:
- T111 SFS-EN ISO/IEC 17025:2005 (FINAS) Typpitie 1

Eurofins Nab Labs Rauma

The Nab Labs Rauma site gives Eurofins strong insight to forest industry services. Rauma site is located in Western Finland, together with its remote site Pori laboratory. Nab Labs Rauma site is in UPM-Kymmene mill area close to the operations of several industrial companies. This site provides fast-cycle customer service in to the forest industry and customers related to it.

Services:
- Physical properties of pulp and paper incl. pulp refining, preparing hand sheets, physical testing
- Chemical analysis of woodchips, pulp, paper, cardboard and water
- Microscopic evaluations
- Analysis of tall oil, liqueur, condensate, filtrates and biomass
- Trouble shooting analyses
- Power Plant process analyses

Eurofins Viljauвуuspalvelu

Eurofins Viljauвуuspalvelu provides laboratory services in the agro testing sector.

Services:
- Our laboratory performs chemical analyses of soil, compost, sludge, manure and feed.

Accreditations:
- ISO / IEC 17025
- ISO 9001:2008

Eurofins Scientific Finland, Helsinki commercial site

Eurofins Analyses pour l’Environnement France

With laboratory space of 5,500 m², Eurofins in Saverne provides a large part of our environmental analytical capabilities in France.

Solid, air and ground water matrices are analysed and the nature of analyses performed is very diverse: contaminated soil, sludge, clinkers and sediment, air monitoring (emission air, work air, internal air), underground and waste water.

This laboratory also provides microbiology analyses like legionella, hospital hygiene or air parameters.

This laboratory also provides material testing (building materials, water, polymer expertise)
**Eurofins Expertises Environnementales**

Eurofins Expertises Environnementales offers a broad range of specific analytical services in the field of environmental sciences and performs testing on materials intended to be in contact with drinking water.

**Services:**
The lab offers analysis and services in marine and continental ecotoxicology, biodegradability, hydrobiology and microbiology.

**Accreditations:**
- COFRAC accreditation for various tests
- Recognised by the French Health Ministry for the approval of materials in contact with drinking water.

Eurofins Analyses pour le Bâtiment Ile de France
This entirely refurbished 600 m² laboratory with more than 15 years of experience is our centre of excellence for asbestos analysis in air, for which it services the French and international market from the centre of Paris.

Services:
• Asbestos testing in material and air

Accreditations:
• COFRAC

Eurofins Analyses pour le Bâtiment Sud-Est

This laboratory specialises in asbestos analysis in building materials. With more than 10 years of experience, the laboratory staff also has expertise in the analysis of asbestos in air for which it serves the market in the South East of France.

Services:
• Asbestos testing in material and air

Accreditations:
• COFRAC

Eurofins Analyses pour le Bâtiment Sud-Ouest

This brand-new laboratory specializes in asbestos analysis in building materials. The laboratory staff also has expertise in the analysis of asbestos in air for which it serves the market in the West of France.

Services:
• Asbestos testing in material and air

Accreditations:
• COFRAC

Eurofins Analyses pour le Bâtiment Est

With our extensive experience and reputation gained in asbestos fibre identification over many years, our 1,000 m² laboratory provides a fast and reliable response for all asbestos, man-made mineral fibres, refractory ceramic fibres and lead paint analytical needs.

Services:
Asbestos analysis can be performed in all types of materials, air, soil, waste and water

Eurofins Analyses pour le Bâtiment Sud

This laboratory specializes in asbestos analysis in building materials and analysis of asbestos in air for which it serves the market in the South of France.

Services:
• Asbestos testing in material and air

Accreditations:
• COFRAC

Eurofins Biotech Germande

This lab specialises in the management of the infectious risk associated with the use of complex reusable medical devices and hospital environment. Eurofins Biotech-Germande is the essential partner for healthcare facilities.

Services:
Education / Training

Our education/training programs in hygiene are designed for all medical and paramedical staff including:
• Physicians
• Pharmacists
• Nurses, Hygienists
Microbiological sampling

Healthcare facilities and some structures receiving public have an obligation to monitor and control infectious risk. We assist you in the process of microbiological surveillance of the environment:
• Microbiological monitoring of the environment (air, water, surface…)
• Medicals devices sampling (endoscopes, endoscope drying/storage cabinets, automatic endoscope reprocessors)

Medical Device Evaluation

In collaboration with the health industry, we act as an independent testing laboratory for the analysis of the risk factors in the design and validation stages of a medical device:

• Medical Device Safety
• Type Testing
• Performance Qualification

Eurofins Hydrologie Centre Est

With a laboratory of 4,500m², this high-performance production environment offers a broad spectrum of water analyses with the best possible delivery times

Services:
Eurofins Hydrologie Est specialises in water analysis, focusing on sanitary water, groundwater, surface waters, residual waters and also industrial waste water.

Accreditations:
• COFRAC accreditation for various tests
• Recognised by the French Health Ministry for the approval of materials in contact with drinking water
• French Environment Ministry agreement for various tests on water

Eurofins Hydrologie Est
Eurofins Hydrologie Est specialises in water analysis, focusing on sanitary water, groundwater, surface waters, residual waters and also industrial waste water.

Furthermore, Eurofins Hydrologie Est has expertise in the testing of pesticide and drug residue research in freshwater, groundwater, waste water and has significant experience in dealing with official testing regimes for water quality.

With a laboratory of 4,500m², this high-performance production environment offers a broad spectrum of water analyses with the best possible delivery times

Services:
Sample taking and analysis for:
• Ground and surface water
• Drinking water
• Technical water
• Waste water

Accreditations:
• COFRAC accreditation for various tests
• Recognised by the French Health Ministry for the approval of materials in contact with drinking water
• French Environment Ministry agreement for various tests on water

Eurofins Hydrologie Est - Dijon
Eurofins Hydrologie Est - Dijon is a regional sample taking and sample analysis regional lab providing proximity services to its clients

Services:
Sample taking and analysis for:
• Drinking water
• Technical water
• Waste water

Accreditations:
• COFRAC on water matrices

Eurofins LCDI
Since 1991, this laboratory ensures quality service, thanks to its highly qualified staff and advanced equipment.

Our very comprehensive range of services includes the collection, analysis and study of water.

Eurofins LCDI specialises in industrial sites.

Services:
Sample taking (including 24h sample taking) and analysis for waste water and underground water

Accreditations:
• COFRAC on water matrices

Eurofins Hydrologie Centre Est - Saint Alban Leysse

Eurofins Hydrologie Ile de France
Eurofins Hydrologie Ile de France specialises in water analyses, from drinking water quality testing to water hygiene (legionella) and waste water.

Eurofins Hydrologie Ile de France is able to offer quality, flexibility and optimised services. The staff carries out sampling across Ile de France and results can be supplied in 24 hours.

Accreditations:
• COFRAC accreditation for various tests
• Recognised by the French Health Ministry for the approval of materials in contact with drinking water
• French Environment Ministry agreement for various tests on water

Eurofins Hydrologie Nord

Eurofins Hydrologie Nord provides a wide range of analysis for all kind of water and is specialised in salted water and microbiology specialities.

Services:
- Potability
- Search for Legionella
- Enterobacteriaceae
- Pesticides and other chemical

Accreditations:
- COFRAC accreditation for various tests
- French Health Ministry agreement for sanitary control on water
- French Environment Ministry agreement for various tests on water

Eurofins Hydrologie Ouest - Poitiers

This laboratory specialises in water analysis (sampling, microbiology, and basic chemistry), for waste water, drinking water quality testing, water hygiene (legionella).

Services:
- Sampling and chemical and microbiological testing of water, air and surfaces

Accreditations:
- COFRAC accreditation for various tests
- French Environment Ministry agreement for various tests on water

Eurofins Hydrologie Ouest - Nantes

This laboratory specialises in water analysis (sampling and basic chemistry), for waste water, drinking water quality testing, water hygiene (legionella).

Services:
- Sampling and chemical testing of water

Accreditations:
- COFRAC accreditation for various tests
- Recognised by the French Health Ministry for the approval of materials in contact with drinking water.
- French Environment Ministry agreement for various tests on water

Eurofins Hydrologie Sud

With its 3 proximity labs dedicated to water testing, Eurofins Hydrologie Sud provides a wide range of analysis: sanitary testing, environment & natural resources monitoring, clinical environment testing and dialysis water analysis.

Services:
- Chemical testing
- Microbiological testing
- “Same-day” analysis delivery
- Tests on all kind of water
- Water sampling
- Specialized on mineral & thermal types of water

Accreditations:
- COFRAC accreditation for various tests
- Recognised by the French Health Ministry for the approval of materials in contact with drinking water
- French Environment Ministry agreement for various tests on water

Eurofins GfA Hamburg

Eurofins GfA was founded in Münster (Germany) in 1985 as an environmental laboratory specialising in the analyses of dioxins and other organic contaminants.

Today, more than 25 years later and after steady development, we can offer our services from 5 locations in Germany.

Eurofins GfA has the authorization for measurements according to § 29b BImSchG (German Federal Law for Ambient Air Protection) and several other authorizations for measurements (e.g. Luxembourg).

The main focus for Eurofins GfA is consultation on, and implementation of emission measurements, as well as the calibration of stack-fixed flue-gas monitoring devices – both as demanded by federal laws.

While the “Ambient Air Monitoring” group mainly deals with environmental impact assessments within the context of licensed management and air monitoring programmes, the “Indoor Measurements” group conducts investigations into pollutants in indoor air (particularly organic substances, fibres and germs) and at workplaces.

Services:
- Emission measurements
- Ambient air measurements
- Function testing / calibration
- Workplace measurements
- Indoor air investigations

Accreditations:
- Officially notified measuring station according to § 29b German Emission Control Act
- Measuring institute according to German Ordinance on Hazardous Substances
- Approved measuring point by law from April, 21th 1993 in the Grand-Duchy of Luxembourg
- Accreditation according to DIN EN ISO/IEC 17025

Eurofins Institut Jäger
Tübingen

Institut Prof. Dr. Jäger was founded in Tübingen in 1977 by Prof. Dr. Walter Jäger and is one of the leading providers of environmental services in Southern Germany. Institut Prof. Dr. Jäger is prepared to solve almost any kind of problem in the environmental sector. The Environmental Analysis Competence Centre is your partner for all issues in this field.

Institut Prof. Dr. Jäger is accredited for more than 390 testing procedures according to the international ISO/IEC 17025 standard

Services:
- Mineral water: Support and advice for the development of wells and the concurring authorisation process; full analytical service
- Analysis of drinking water, water for industrial use, water used for swimming pools
- Calculations needed for the mixing of different types of well waters intended for human use
- Federal programmes on the analysis of subsoil waters
- Microbiology
- Analysis of communal and industrial waste waters, refuse analysis
- Elemental analysis
- PFT analysis
- Pesticides in water
- Biopharmaceutical residues in water
- Legionella
- Microbiology in water
- Indoor air measurement

Accreditations:
- ISO/IEC 1702
- Investigating body according to §15, subsection 4, sentence 2 of the German drinking water regulation of 2001
- Board of experts in water management (subject module water) for the fields of waste water, surface water and ground water
- Admission of the French ministry of
Environment for investigations of water quality by sanitary inspection
• Investigating body for the analysis of perfluorated tensides (PFT) in water and sewage sludge
• Acceptance as a testing agency in waste management (waste module) for the sewage sludge section, soil and waste oil
• Acceptance of QS society of fruit-vegetables-potatoes GmbH as investigating body for the QS residue monitoring section
• GMP-confirmation of inspection activities as provided for § 14 subsection 4 No 3 Medicines

Orange

• Permission for activities with pathogens due to § 44 German Law on the Prevention and Control of Infectious Diseases
• Acceptance as a testing agency for tests of products as part of the certification procedure DIN CERTCO

** Eurofins Hygiene Institut Berg**

For 50 years Eurofins Hygiene Institut Berg GmbH has been a free and independent water-analysis laboratory for microbiology, environment analysis and hygiene.

**Services:**

• Analysis of swimming and bathing pool water
• Microbiological analysis of bathing water and industrial water
• Microbiological and selected chemical and sensory parameters according to German drinking water regulation
• Sampling of raw and drinking water
• Sampling of swimming and bathing pool water

---

**Eurofins Umwelt Ost Jena**

With more than 25 years of experience in environment analysis today Eurofins Umwelt Ost GmbH offers a wide range of chemical, physical and biological analyses.

**Services:**

• Industrial waste, drinking, surface, ground and sewage water
• Analyses of soil, sludge, waste, compost
• Special experience in analyses for agriculture
• Special analysis of priority substances corresponding to the EU water framework programme
• Bio and solid fuels
• Analyses according to RoHS directive with certificate
• Coal, bio fuels, bio ethanol, and wood pellets
• Bio-toxicity tests
• Tests of bio-gas formation (GB21): material waste, agriculture products and animal excrement
• Test of AT4 (activity of breathing in 4 days for waste and soil)
• Degradability tests

**Eurofins Umwelt West Wesseling**

Eurofins Umwelt West, formerly known as Analytis, was founded in 1980 and has been performing environmental analysis for more than 20 years.

The laboratory performs chemical, physical, biological, microbiological and toxico logical analyses of soil, water and air.

Eurofins Umwelt West also performs analyses of specialty samples according to the needs of industrial customers.

**Services:**

- Sampling and analysis of a large range of organic and inorganic parameters:
  - NSO-heterocycles,
  - Soil gas analysis
  - PFC

**Accreditations:**

- Accreditation by DIN EN ISO/IEC 17025 by DAkkS
- Evidence for confirmation of competence within the framework of the BAM-OFD agreement on the investigation of contaminated sites
- Listed as investigating body according to § 15 section 4 of the German Drinking Water Ordinance (TrinkwV 2001)
- Admission pursuant to § 25 LBfG NRW for different subsections
- Admission as investigating body pursuant to § 18 sentence 1 BBodSchG and § 17 section 1 LbodSchG NRW
- Admission as investigating body within the sense of § 3 section 5 and 6 of the sewage sludge regulation
- Admission as investigation body according to self-inspection guidelines (EKVO) of the Saarland
- Admission as federally recognized investigative body for waste water analysis for the subfield "carrying out laboratory tests" (self-inspection guidelines laboratory - EKVO laboratory)
- Admission as federally recognized investigative body for waste water analysis for the subsection “EKVO Überwachungsstelle” according to § 10(4) No 4 EKVO in Hessen
- Approval as inspection body for aptitude and verification tests and referee purposes and external monitoring for water management characteristics of road construction materials (RAP Stra)
- Admission pursuant to the law of 21 April 1993 for the implementation of technical research and control data in the environment section in Luxembourg

**Eurofins Umwelt West Aachen**

Eurofins Umwelt West, subsidiary Aachen, formerly known as ALA, was founded in 1980 and has been performing environmental analysis for more than 20 years.

It now works as a subsidiary of Eurofins Umwelt West offering complete analytical services and sampling.

**Eurofins Umwelt West Frankfurt**

Eurofins Umwelt West, subsidiary Frankfurt, moved from Messel, formerly known as LfÖ, was founded in 1989 and has been performing environmental analyses for more than 20 years.

It is now working as a subsidiary of Eurofins Umwelt West offering...
**Eurofins Umwelt West Mönchengladbach**

**Services:**
- Air Monitoring

**ANECO Institut für Umweltschutz GmbH & Co**

**Services:**
- Air Monitoring

**Eurofins Lancaster Laboratories (Environmental) Ireland**

**Services:**
- The laboratory provides testing services in the fields of Civil, Water, and Environment.
- Environment is one of the core areas where Spectro offers its elite services.

**Services:**
- Sampling and analysis of a large range of organic and inorganic parameters.

Eurofins Environment Testing Penang
In 1997, NML engaged into providing environmental monitoring and industrial hygiene service to the manufacturing industries in Penang. Today, our customers are not limited to the manufacturing companies from various industries nationwide but they are inclusive of water treatment companies, properties development and land exploration firms, as well as the new investors in Malaysia.

NML has a team of highly experienced consultants, highly-skilled technical team to carry out field works and competent chemists to analyse the environmental samples. NML consultants inclusive of Registered Assessors, Hygiene Technicians, Noise Competent Persons etc, are not only well-versed in respective technical knowledge and regulations but they are also keeping abreast of the new regulations development and new enforcements in the country. Our technical team is well organised that we are able to respond to your request within short period of time.

Services:
- Sampling and analysis of natural water, processed water, waste water
- Industrial effluents (Industrial Effluent Characteristic Study, IECS)
- Solid waste, contaminated soils
- Ambient air, chimney and stack gas emission (iso-kinetic and non-iso-kinetic)
- Boundary noise, vibration test
- Chemical Health Risk Assessment (CHRA)
- Chemical Exposure Monitoring
- Local Exhaust Ventilation (LEV) Inspection & Testing
- Noise Exposure Monitoring
- Indoor Air Quality Assessment

Accreditations:
- ISO/IEC 17025
- SAMM
- Ministry of Health Malaysia

Eurofins Wellington

In many cases accurate environmental testing relies on a laboratory with a close proximity to the sampling site. Eurofins New Zealand’s network makes it possible to ensure samples are processed within 24 hours. We undertake both testing for water quality and trade wastes. We supply services to councils, manufacturers and schools throughout New Zealand.

We provide a comprehensive range of microbiological, chemistry tests against the latest MOH drinking water standards and environmental standards at our IANZ and MOH accredited laboratories.

Services:
• Chemistry
• Microbiology
• Pathogens
• Environmental Testing

Eurofins RadonLab

Radonlab was started by Dr. scient. Aleksandar Birovljev, who previously established laboratories at the Statens strålevern and Teknologisk institutt.

Radonlab offers reliable radon measurements, investigations,
products, and solutions for the protection against radon and moisture, including track-etch detectors and electronic instruments for measuring radiation from radon.

In terms of radon mitigation, we have many years of experience in remediation of buildings with elevated radon levels. We have a selection of proven solutions and products, such as our RadonSug, Guard MiniVent and climate systems.

Secondly, we develop and test new ideas for reducing radon levels indoors. We offer courses and training in radon monitoring and mitigation. Our services and products can be used by both professionals and others, who wish to carry out cost-effective measurements and action against radon.

Our track-etch laboratory is classified as class A by the HPA (former National Radiological Protection Board) in the UK, which performs international comparison tests annually.

Eurofins Analytico Barcelona

Eurofins Analytico is a fully accredited, high-tech production driven laboratory that can deliver a wide range of environmental analytical tests in soils, groundwater, wastewater, construction materials and residues.

Eurofins Analytico can test for routine parameters like heavy metals, TPH, PAH, EOX, aromatics, VOCs and pesticides, as well as non-standard parameters like glycols, phthalates using a wide range of modern techniques including ICP-AES, ICP-MS, (LVI)-GC/MS, HPLC and LC-MS.

A personal approach and high quality service are top priority at Eurofins Analytico. Delivery time, reliability, sophisticated logistic solutions and electronic data exchange are important issues. The standard delivery time is 5 working days, but results can be supplied in as fast as 48 or 24 hours, even overnight if required. Clients have the opportunity to use the Internet-based PAIS (Professional Analytical Information System) for full digital communication with the laboratories of Eurofins Analytico.

Over time Eurofins Analytico has become a leading environmental testing laboratory, serving major engineering consultants, project developers, and industries and building contractors all over the world.

Accreditations:
• Eurofins Analytico is accredited against ISO/IEC 17025 by the Dutch Accreditation Council RvA.
• Eurofins Analytico is recognized by the Netherlands Ministry of Housing, Spatial Planning and the Environment (VROM) as a qualified analytical laboratory for the “Analysis of soil with respect to environmental hygiene” (AS 3000) and for the “Analysis of building materials” (AP04).

Sweden

Eurofins Environment Testing Sweden AB

Eurofins Environment in Sweden offers a wide range of accredited chemical and bacteriological tests within the environmental, solid fuel and indoor air sectors.

Services:
Eurofins Environment in Lidköping analyses organic and inorganic parameters on a wide range of matrices like soil, sediment, sludge, construction materials, drinking water, groundwater, waste water, process water, etc. Eurofins Environment specializes in heavy metals and solid fuels. For routine parameters, like oil, PAH and heavy metals on soil, the delivery time is very important. Standard delivery time for the routine parameters is 2 working days, but results can also be delivered overnight.

Accreditations:
• ISO 17025
• ISO 9001
• ISO 14001

Eurofins Radon Testing Sweden AB

Services:
Eurofins Radon Testing produces dosimeters and performs analysis of radon indoors, soil / ground and from personnel exposure measurements.

Eurofins Pro Monitoring

Pro Monitoring is an independent Dutch research institute founded in April 1995, offering air quality measurements.

Pro Monitoring specialises in monitoring emissions from industrial installations. In the field of emission monitoring, Pro Monitoring is one of the leading companies in the Netherlands in this field.

Besides ambient air, indoor air monitoring services are provided.

Pro Monitoring carries out measurements with respect to a large number of components: dust, odour, NOx, CO, SO2, NH3, H2S, HF, HCl, HBr, volatile hydrocarbons, but also PCB, PAH, dioxins and furans. These services include continuous monitoring of polluted air with respect to NOx, SO2, NH3, H2S, CO, CO2, and CxHy.

Pro Monitoring specialises in performing measurements of incinerators (waste, sludge, gas and wood), sludge drying processes, asphalt production processes, boilers, and turbines.

Services:

• Emission measurements
• Ambient air measurements
• Function testing/calibration
• Workplace measurements
• Indoor air measurement

Accreditations:

• ISO/IEC 17020: 2004 by the Dutch Accreditation Council RvA.

Turkish

Eurofins Turkey

Eurofins Turkey was founded in Istanbul in 2012, while Eurofins SOFIA continues to offer its services in the Izmir area. The Istanbul office offers a complete service solutions to the Turkish market with a constantly increasing portfolio of analyses for the food, feed, environmental, agricultural and product testing industries. The Izmir office offers complete service solutions to the food and feed markets. Eurofins Turkey combines the best practices and worldwide expertise of the Eurofins network for its customers not only inside Turkey, but also in Turkic countries and Middle East such as Azerbaijan, Kazakhstan, Kyrgyzstan, Tajikistan, Turkmenistan, Uzbekistan, Georgia, Jordan, Saudi Arabia, UAE and Oman.

Services:

- Project management
- Sample registration
- Customer Support after reporting
- Cooperation with inspection and certification bodies

Eurofins Air Toxics

Eurofins Air Toxics, Inc. is an analytical laboratory, founded in 1989, specialising in the analysis of vapour-phase organic chemicals air using a wide range of EPA, ASTM and in-house developed methods. Our capabilities extend from trace level measurements required for indoor air testing to identifying and quantifying organics in high-level sources.

An on-going investment in media and instrumentation, a continuing commitment to customer service and quality, and a team of experienced chemists have made Eurofins Air Toxics the premiere test facility for the analysis of air samples.

With over 4,400 Summa canisters and 1,800 flow controllers, we maintain the largest single location canister inventory of any laboratory in the United States. In addition to our canister capabilities, Eurofins Air
Toxics is the industry leader in both passive and active sorbent-based methods supporting regulatory development and industry acceptance with on-going research and performance evaluation.

Services:
- Soil gas surveys
- Vapour intrusion investigations
- Ambient air monitoring programs
- Indoor air quality assessments
- EPA Method 325/Fence line Monitoring

Our routine analyses include: EPA TO-Compendium Air Methods such as TO-15, TO-3, TO-17, TO-13A and ASTM methods, such as ASTM D1945 and ASTM D1946. Specially developed products include a modified TO-15 method using a custom GC equipped with multiple columns to chromatographically isolate trace level compounds from interference and using a TOF-MS for target compound detection. In addition, our laboratory has developed passive sorbent methods using samplers such as the Radiello and Waterloo Membrane Sampler (WMS).

Accreditations:
Eurofins Air Toxics operates under NAICS code 541380 and holds NELAP accreditation through Oregon Environmental Laboratory Accreditation Program and DoD-ELAP and ISO/IEC 17025 accreditation through ANAB. The laboratory also participates in the following state accreditation programs: Arizona DOH, Florida DOH, Louisiana DEQ, New Jersey DEP, New York DOH, Texas CEC, Utah DOH, Virginia and Washington DEC.

Eurofins Calscience

Eurofins Calscience, Inc. has been providing quality analytical services to consultants, private industry and government agencies since 1986. Eurofins Calscience operates out of three facilities which incorporate 70,000 square feet of laboratory and office space.

We are an industry leader in California, employing nearly 180 professionals and technicians. As a full-service environmental testing company, we offer analysis of groundwater, storm water, soil, hazardous waste, marine chemistry, and soil vapor/ambient air/indoor air.

We pride ourselves in providing the highest level of customer service in the industry because we truly believe "the difference is service".

All of our operations are focused on meeting the demands of our customers, in terms of quality, deliverables, schedules and costs. We are organized and staffed to be able to respond to quick turnaround-time projects and we pride ourselves on our on-time delivery.

Eurofins Calscience focuses on servicing the environmental engineering community, not only to provide reliable data, but to help our customers meet their goals in terms of project profitability and timely completion.

We offer a full range of analytical methods and data deliverable products to meet the requirements of numerous environmental regulatory programs. Our staff of environmental professionals and project managers can assist clients with regulatory issues and are available to consult with clients to choose the appropriate test methods for their projects. We are committed to staying current with new technologies, adding instrumentation and expanding capabilities to meet the needs of our clients. With our expansive instrument inventory we have the capacity to meet the demands of the most rigorous field schedules.

Eurofins Calscience has gained expertise in testing for constituents of concern for various regulatory programs and emergent chemicals.

Throughout our history, we have always been committed to quality, high ethical standards, and operating in a socially responsible manner.

Services:
- Air/Vapour
- Emergent Chemicals
- Hazardous Waste

- Landfill Monitoring
- Marine Chemistry

Accreditations:
Eurofins Calscience is certified under the National Environmental Laboratory Accreditation Program and in the States of California, Arizona, Hawaii, Louisiana, Kansas, Nevada, New York, Oklahoma, Oregon, Texas, Utah, and Washington as well as in Guam. In addition to these accreditations and certifications, we also accept and analyse samples from other U.S. States, Territories and Foreign Entities which do not have formal certification programs for air, soil and non-potable water samples. We continue to add certifications to meet the needs of our clients.

Eurofins Eaton Analytical Indiana

Eurofins Eaton Analytical, Inc. located in South Bend, IN and Monrovia, CA, is an analytical laboratory focused on the analysis of water for a full range of chemical, microbial and radiological contaminants.

Using methods from the USEPA, Standard Methods and indoor techniques, Eurofins Eaton Analytical provides clients with high quality, low reporting limit data to assess water quality. Eurofins Eaton Analytical also assists clients with quality assurance consulting and development of internal quality standards.

Eurofins Eaton Analytical is NELAP and ISO17025 accredited and offers comprehensive drinking water and bottled water compliance testing throughout most of the United States and its territories, in additional to more than 40 other countries. The lab stays on the leading edge of both compliance and emerging contaminant analyses by partnering with USEPA and instrument manufacturers on method development and validation projects.

Toxics is the industry leader in both passive and active sorbent-based methods supporting regulatory development and industry acceptance with on-going research and performance evaluation.

Services:
- Soil gas surveys
- Vapour intrusion investigations
- Ambient air monitoring programs
- Indoor air quality assessments
- EPA Method 325/Fence line Monitoring

Eurofins Calscience

Eurofins Calscience, Inc. has been providing quality analytical services to consultants, private industry and government agencies since 1986. Eurofins Calscience operates out of three facilities which incorporate 70,000 square feet of laboratory and office space.

We are an industry leader in California, employing nearly 180 professionals and technicians. As a full-service environmental testing company, we offer analysis of groundwater, storm water, soil, hazardous waste, marine chemistry, and soil vapor/ambient air/indoor air.

We pride ourselves in providing the highest level of customer service in the industry because we truly believe "the difference is service".

All of our operations are focused on meeting the demands of our customers, in terms of quality, deliverables, schedules and costs. We are organized and staffed to be able to respond to quick turnaround-time projects and we pride ourselves on our on-time delivery.

Eurofins Calscience focuses on servicing the environmental engineering community, not only to provide reliable data, but to help our customers meet their goals in terms of project profitability and timely completion.

We offer a full range of analytical methods and data deliverable products to meet the requirements of numerous environmental regulatory programs. Our staff of environmental professionals and project managers can assist clients with regulatory issues and are available to consult with clients to choose the appropriate test methods for their projects. We are committed to staying current with new technologies, adding instrumentation and expanding capabilities to meet the needs of our clients. With our expansive instrument inventory we have the capacity to meet the demands of the most rigorous field schedules.

Eurofins Calscience has gained expertise in testing for constituents of concern for various regulatory programs and emergent chemicals.

Throughout our history, we have always been committed to quality, high ethical standards, and operating in a socially responsible manner.

Services:
- Air/Vapour
- Emergent Chemicals
- Hazardous Waste

- Landfill Monitoring
- Marine Chemistry

Accreditations:
Eurofins Calscience is certified under the National Environmental Laboratory Accreditation Program and in the States of California, Arizona, Hawaii, Louisiana, Kansas, Nevada, New York, Oklahoma, Oregon, Texas, Utah, and Washington as well as in Guam. In addition to these accreditations and certifications, we also accept and analyse samples from other U.S. States, Territories and Foreign Entities which do not have formal certification programs for air, soil and non-potable water samples. We continue to add certifications to meet the needs of our clients.

Eurofins Eaton Analytical Indiana

Eurofins Eaton Analytical, Inc. located in South Bend, IN and Monrovia, CA, is an analytical laboratory focused on the analysis of water for a full range of chemical, microbial and radiological contaminants.

Using methods from the USEPA, Standard Methods and indoor techniques, Eurofins Eaton Analytical provides clients with high quality, low reporting limit data to assess water quality. Eurofins Eaton Analytical also assists clients with quality assurance consulting and development of internal quality standards.

Eurofins Eaton Analytical is NELAP and ISO17025 accredited and offers comprehensive drinking water and bottled water compliance testing throughout most of the United States and its territories, in additional to more than 40 other countries. The lab stays on the leading edge of both compliance and emerging contaminant analyses by partnering with USEPA and instrument manufacturers on method development and validation projects.
Eurofins Eaton Analytical delivers reports 24/7 via web access and allows users to perform online data mining.

Final verified analytical results are delivered to clients via web push format and include the ability for clients to do data mining for trends (cap.eatonanalytical.com).

The labs also operate satellite microbiological laboratories in Concorde, CA and Folsom, CA and service centers in Concord, CA, Fresno, CA, Scottsdale, AZ, Lakewood, CO, Raleigh, NC, Beaverton, OR and New Berlin, WI.

Services:
- Drinking water
- Bottled water
- Reuse or recycled water
- Seawater
- Groundwater
- Surface water
- Water as a component in food, beverages or manufacturing

Analytical services include:
- Volatiles (EPA 524.2, 524.3, 624, edb/dbcp, epichlorohydrin, 1,2,3-trichloropropane)
- Semi volatiles (EPA 525.2, 525.3, 625)
- Pesticides / Herbicides (EPA 505, 515.4, 531.2, 547, 549.2, 536, 538, 540)
- Metals (EPA 200.8, EPA 200.7, EPA 1640)
- Anions and other inorganics
- Nutrients (nitrogen, phosphorus, silica, total organic carbon)
- Asbestos by TEM (EPA 100.2)
- Microbiological (coliforms, plate count, Giardia/Cryptosporidium by EPA 1623, coliphage, pseudomonas, yeast and mold, Legionella)
- Radionuclides (alpha/beta, radium 226/228, uranium, tritium, radon)
- Dioxin (EPA 1613)
- Disinfection by-products (Bromate, chlorate, chloride, THMs, Haloacetic acids -HAA, Chloral hydrate, aldehydes, haloacetonitriles, total organic carbon-TOC, total organic halogen-TOX)

Specialty analytical and consulting services include:
- Algae and algal toxins including microcystins, anatoxin-a, and cylindrospermin (by flow cytometry, ELISA, and LC-MS-MS)
- Biopharmaceuticals, hormones, artificial sweeteners, and personal care products (LC-MS-MS)
- UCMR3 compounds (1,4-dioxane, chromium-6, chloride, hormones, PFCS, metals, volatiles)
- UCMR4 compounds (alcohols, pesticides, semivolatile, brominated HAAs, metals, algal toxins)
- Taste & Odor (MIB and Geosmin)
- EDTA / NTA
- Acrylamide
- Nitrosamines, including NDMA
- Perchlorate (by IC and LC-MS-MS)
- Quality Assurance consulting
- Sampler training
- LIMS consulting
- Regulatory consulting
- Development of water quality standards

Accreditations:
Accredited under the National Environmental Accreditation Program in multiple states and holds drinking water approval in 50 US states and Puerto Rico.

Eurofins Eaton Analytical California

Accreditations:
Accredited under ISO plus the National Environmental Accreditation Program in multiple states and holds drinking water certification in over 45 states and territories.

Our services cover multiple industries including: Environmental, Power Plant Emissions, Consumer Products, Dietary Supplements, Food Products, Biological Tissue (fish/animal), and Natural Gas and Petroleum, making us experts in the field of metals speciation including Arsenic, Selenium, Mercury, Chromium, Cobalt, Vanadium and Molybdenum

Services:
- ICPMS (inductively coupled plasma mass spectrometry) analysis
- CVAFS (cold vapour atomic fluorescence spectrometry) analysis
- Elemental metals analysis
- Metals speciation
- Metals in fish and other tissues
- Metals in emissions monitoring
- Trace level metals analysis
- Fast TAT (turnaround time)
- Metals in consumer products
- Metals in blood & clinical trials
- Metals in dietary supplement matrices

Accreditations:
- ISO 17025 – GMP and DoD
- NELAC and state accreditations including Washington, California, Louisiana, Florida, Nevada, New York, New Jersey and Wisconsin.
- Other permits include USDA, US fish and wildlife and a low level radioactive materials license.

Eurofins Lancaster Laboratories Environmental

With more than 50 years of delivering comprehensive laboratory services, Eurofins Lancaster Laboratories Environmental provides unmatched regulatory compliance, capacity and technical expertise in environmental testing services, including air, water, soil, sediment and biota.

With a proven track record for providing the highest quality NELAP-accredited scientific services, Eurofins Lancaster Laboratories Environmental
offers more methods than any other laboratory in the US.

For a seamless service experience, customers team with scientists and project managers throughout the outsourcing process from testing to monthly reports to 24-hour online data access at myEOL.com.

Located on a 49-acre campus in Lancaster, PA, Eurofins Lancaster Laboratories Environmental is the largest single-site environmental laboratory in the US with state-of-the-art technology and instrumentation housed in a 330,000 square-foot modern facility.

**Services:**
- Environmental Testing Services
  - Vapor & Air Analyses
  - Petroleum-Related Analyses
  - Drinking Water
  - Volatiles
  - Semi volatiles
  - Metals
  - Pesticides / PCBs / Herbicides
  - Waste Characterization
  - Water Quality
- Environmental Specialty Services
  - Sediment & Tissue Testing
  - Method Development
  - PFAS (Per and Poly fluorinated compounds)
  - 1,4-Dioxane
  - Method 25D
  - Alkyl PAHs
  - Dioxins and Furans
  - PCB Congeners
  - Explosives

**Data Access Options**
- On-line Data Access--24 hours a day, seven days a week through Eurofins Lancaster Laboratories’ secure internet access, myEOL, which offers clients immediate access to final verified analytical results as analyses are completed and verified in the lab.
- Electronic Data Deliverables--Over 200 standard and custom formats available.
- Electronic Analysis Reports--Data reporting system reports analytical results with information needed to meet regulatory guidelines for Superfund, RCRA, UST, or State programs.
- Data Packages on CD—Eurofins Lancaster Laboratories offers a wide range of data packages to meet reporting and data validation needs with several state specific formats, including NJDEP, TRRP-13, as well as, CLP Level 4 equivalent packages.

**Markets Served**

Holding NELAP, A2LA and DoD ELAP accreditations and more than 40 state certifications, Eurofins Lancaster Laboratories successfully completes the most demanding environmental testing projects for leading private-sector engineering and consulting firms and Fortune 100 Industrial companies. With one of the lowest employee turnover rates in the industry, Eurofins Lancaster Laboratories gives clients confidence that they receive the same consistent level of expertise and service year after year.

**Service Models**

Fee for Service: Eurofins Lancaster Laboratories Environmental's staff performs work on a project-by-project basis.

**Eurofins QC**

Eurofins QC, Inc. is a full-service environmental testing laboratory that has been providing analytical chemistry, microbiological and field services and aquatic toxicology testing to a diverse range of clients since 1943.

Conducting operations in Horsham, PA, Eurofins QC is focused on providing testing services that enable clients to meet their regulatory and monitoring commitments. Analytical data is produced within a quality system framework that provides clients with an accurate and representative portrayal of a sample's constituents.

Housed in an 8,000ft2 facility, Eurofins QC provides chemistry, aquatic toxicology and microbiology capabilities in support of the federal water, waste water and solid and hazardous waste regulations and derivative state regulations in PA, NJ, NY, DE, MD and VA

**Eurofins Spectrum Analytical Massachusetts**

Eurofins Spectrum Analytical, Inc. specializes in providing quality analytical data and exceptional customer service for a wide variety of environmental interests. We offer a full range of test methods for sediments, soils, sludge, solid waste, hazardous waste, drinking water, groundwater, industrial wastewater, plant and animal tissue and air. Our labs, located in Agawam, MA and North Kingstown, RI, are equipped with state-of-the-art technology to automate analysis deliverables, ensure data accuracy and make results readily available to clients.

Eurofins Spectrum Analytical is committed to providing clients prompt, reliable results. Our commitment to quality includes the utilization of reliable and technically sound instrumentation, the employment of experienced chemists and the use of a highly trained support staff.

Our North Kingstown, RI laboratory has been an active participant in the EPA CLP program for over a decade and is consistently ranked as one of the best laboratories in the program by EPA contracted auditors and quarterly blind proficiency test studies.

Eurofins Spectrum Analytical is committed to providing clients prompt, reliable results. Our commitment to quality includes the utilization of reliable and technically sound instrumentation, the employment of experienced chemists and the use of a highly trained support staff.

**Accreditations:**

BIOANALYTICAL SERVICES

Eurofins Bioanalytical Services is a powerhouse large molecule biotherapeutic-focused, bioanalytical contract research organization that, since its formation in 2003, has actively supported the evolving needs of companies that develop biotherapeutics.

Our mission is to extend our clients’ capabilities by combining scientific knowledge, capacity, regulatory expertise and flexibility to provide the trusted, relevant information required for the drug approval process.

FRANCE

Eurofins ADME BIOANALYSES

Eurofins ADME BIOANALYSES is a powerful and complete laboratory for bioanalysis, pharmacokinetics and immunogenicity.

Our bio-analytical team supports discovery, preclinical and clinical studies with method development, validation, and sample analysis in biological matrices for both small and large molecules (proteins, Peptides, Antibodies) with LC-MS/MS, Immunoassays and Immunogenicity assessment studies.

The laboratory is equipped with a LIMS Watson® coupled with ReportDesigner®.

Services:

• Analytical method development using LC-MS/MS or ligand binding assays
• Validation of analytical methods for the determination of small and large molecules
• Bioanalysis to support discovery, preclinical and clinical development
• Pharmacokinetic calculation and interpretation
• Immunogenicity assessment studies (ADA)
• Cell based assay for neutralising test
• Complete platform for ADC (LC-MS/MS and immunoassays available on site)

Accreditations:

• Good Laboratory Practice (GLP), FDA inspected

Eurofins BioPharma Product Testing Munich

Eurofins BioPharma Product Testing Munich supports your project in all phases from early development to commercialization. Our services during development include ADME, IND-enabling toxicity / PK studies, microbiology and clinical sample analysis. In late-phase and after market approval, Eurofins BioPharma Product Testing Munich provides immunogenicity assessment and bioassays for batch release.

Services:

• Process and Product Related Impurities
• Bioassays
• Method Development & Validation
• Stability & Release Testing
• Sterile & Non-Sterile Product Testing
• Leachables & Extractables Testing
• Immunological studies
• Bioanalytical studies
• Toxicology studies
• Pharmacology studies

PHARMA DISCOVERY

SERVICES

The Eurofins Pharma Discovery Services business cluster, of Eurofins Scientific, was built by bringing together the market leading expertise of Panlabs (acquired in 2012 from Ricerca), Cerep (acquired in 2013) and EMD Millipore’s Discovery & Development Solutions business (acquired from Merck KGaA in 2014). The combined expertise, knowledge and skill set of these companies brings our clients the additional benefit of a comprehensive portfolio of potency/efficacy, safety, and ADME-Tox assays supplied by a single provider. For >40 years, Eurofins Pharma Discovery Services has been a trusted CRO supporting Drug Discovery from Target Id through to Candidate Selection by offering a comprehensive package of >3000 drug discovery products and services, including in vitro pharmacology products & services, cell-based phenotypic assays, in vitro ADME-Tox, in vivo drug safety & efficacy services, and custom proteins & assay development services.

FRANCE

Eurofins Cerep

Eurofins Cerep was founded in December 1989 in Poitiers, France, as a service company to provide solutions for drug profiling and drug screening in pharmacology, allowing faster and cost-effective drug discovery by identifying at early stages the most promising drug candidates, as well as eliminating those compounds likely to fail in development. Eurofins acquired Cerep in March 2013. Since 2014, Cerep, Panlabs and Discovery Services have merged into Eurofins Pharma Discovery Services.

Services:

- Target profiling
- GPCR Binding, activity and cell based assays Center of Excellence
- Other targets binding, activity & cell based assays
- Custom assay development

Bioinformatics - BioPrint™
- Screening
- Medium throughput capacity
- Discovery research products

Recombinant epigenetic proteins & enzymes
- ADME

GERMANY

Eurofins Genomics

Eurofins Genomics offers a comprehensive services portfolio for the entire drug development process, from preclinical research to clinical phase III trials.

The drug development service portfolio for the modern biopharmaceutical industry includes an exclusive marker set for the general identification of responders/ non-responders in the scope of clinical studies and expert consultation by an academic partner in pharmacogenetics. In the field of GMP manufacturing we also offer solutions that can be addressed with genomics technology.

Together with other Eurofins companies like Eurofins Global Central Laboratory, Eurofins Optimed Clinical Research, and Eurofins BioPharma Testing Services a complete service package for even worldwide multi-central registration studies is offered.

Services:

- DNA/ RNA-extraction, e.g. for biobanking
- GLP compliant genotyping and sequencing
- High-throughput genotyping
- SNP, mutation and biomarker analysis
- Analysis of candidate genes
- Expression analysis by Real Time PCR
- Microarrays, e. g. SNP analysis and gene expression
- Biological safety testing, e.g. residual DNA testing or analysis of production strains and cell banks
- Next Generation Sequencing (NGS), like adventitious virus testing, tumour profiling/ cancer sequencing, exome sequencing, whole genome sequencing, transcriptome analysis
- Bioinformatics
- Virus and microbiological diagnostics: Virus load determination, genotyping, sequencing and quantitative analyses of viruses and bacteria
- Metagenomic analysis
- Oligo and Gene Synthesis
- Assay development and validation
- Scientific consultancy
- Comprehensive and well-founded consultancy prior to all projects/studies
- Professional project management during the complete project/study
- Dedicated project managers and study directors as competent and reliable contact persons

Accreditations:

The QM/QA-system of Eurofins Genomics is certified according to ISO 9001, including the requirements of ISO 13485 (medical devices requirements). Furthermore we are accredited according to ISO 17025 covering molecular testing methods like Sanger sequencing (e.g. for genotyping within clinical trials), quantitative Real-Time PCR, fragment length polymorphisms analysis and mass spectrometry-based DNA analysis. In addition ISO 17025 accreditation covers next generation sequencing with Illumina technologies.

Eurofins Genomics is also certified for the principals of Good Laboratory Practice (GLP) and compliant with Good Clinical Practice (GCP). We are consistently audited by clients from the pharmaceutical industry according to these GxP standards. We also regularly perform facility and process audits. We are participating in external proficiency testing (ring trials) on a regular basis.

For further information on the broad portfolio of Eurofins Genomics please have a look on the International Business Line “Genomic Services” section/ Germany in this Group Directory.

Eurofins Discovery Services USA

Eurofins Panlabs Inc provides a comprehensive portfolio of assays and services to support your drug discovery and development needs through preclinical stages. Partnering with our clients, we provide both standard and specialized services to help you identify drug candidates with the desired properties to achieve clinical success. Eurofins acquired this entity in 2012. Since 2014, Cerep, Panlabs and Discovery Services have merged into Eurofins Pharma Discovery Services.

Services:
• Target profiling
  IonChannelProfiler™ services
  Discovery research products
  ChemiScreen™ and PrecisION® stable cell lines
  Ready-To-Assay™ frozen cells
  ChemiScreen™ membrane preps
• Cellular phenotypic assays

Eurofins DiscoverX Fremont
Outsourcing of drug discovery efforts shorten development timelines by reducing the need to dedicate in-house resources to design and validate a multitude of assays.

To fully assist drug discovery and development, Eurofins DiscoverX provides unique and proprietary assay solutions that span the entire drug discovery continuum and support both target-based and phenotypic discovery.

**PHARMA EARLY DEVELOPMENT**

Preclinical drug development is a complex, regulatory and strategy-driven process. The most important element of the preclinical process is to select the best new molecular entities to enter into the clinical trials and to limit failure in full development. With its countless years of professional experience in drug development Eurofins is well positioned to offer a holistic approach of the compound development in order to maximize the chances of success in the clinical phases.

Our network of expertise and full service is not only a matter of convenience but also an issue of confidence and security to succeed with your project. Our clients select Eurofins for this distinctive match of expertise, flexibility and full service. This beneficial setting explains why we work for 8 out of the 10 biggest Pharma companies.

**FRANCE**

**Eurofins ADME BIOANALYSES**

Eurofins ADME BIOANALYSES has been a Eurofins expert in pharmacokinetics and metabolism since 1987. The laboratory is equipped with a LIMS Watson® coupled with ReportDesigner®.

Our bio-analytical team supports discovery, preclinical and clinical studies with method development, validation, and sample analysis in biological matrices for both small and large molecules (proteins, Peptides, Antibodies) with LC-MS/MS, Immunoassays and Immunogenicity assessment studies.

**Services:**
- Bioavailability and Blood Brain Barrier permeability screening tests
- ADME studies with radiolabelled molecules (14C or 3H)
- Development and validation of analytical methods in biological fluids and tissues according to FDA and EMA guidelines

**Eurofins ADME BIOANALYSES**

- Bioanalysis to support pre-clinical and clinical trials for both small and large molecules
- Pharmacokinetics calculation and interpretation
- Immunogenicity
- Specific expertise on bioequivalence studies and drug-drug interaction studies
- Dermal distribution and absorption studies on Franz cells or Bronaugh cells

**Specific expertise:**
- Analysis of Nicotine, Analysis of vitamins such as Calcitriol, 25-OH D2 and 25-OH D3
- Dermal distribution and absorption studies on Franz cells or Bronaugh cells

**Accreditations:**
- GLP compliant - successfully inspected by FDA on a bioequivalence study and inspected every two years by EMA.

**Eurofins OPTIMED**

Eurofins OPTIMED is located in the South East of France (Grenoble & Lyon). Since 1990, the company has offered services in Early Clinical Development (phase I/II) including Site Management Organisation & Biometrics.

**Eurofins OPTIMED**

Eurofins OPTIMED follows all international requirements to carry out clinical studies – ICH recommendation, Good Clinical Practices - and is certified ISO 9001:2000.

**Eurofins BioPharma Product Testing Munich**

Eurofins BioPharma Product Testing Munich supports your drug development project in all phases from early development to commercialization. Our services during development include ADME, IND-enabling toxicology / PK studies, microbiology and clinical sample analysis. In late-phase and after market approval, Eurofins BioPharma Product Testing Munich provides immunogenicity assessment and bioassays for batch release.

**Services:**
- Process and Product Related Impurities
- Bioassays
- Method Development & Validation
- Stability & Release Testing
- Sterile & Non-Sterile Product Testing
- Leachables & Extractables Testing
- Immunoanalytical studies
- Bioanalytical studies
- Toxicology studies
- Pharmacology studies

**Accreditations:**
- Good Laboratory Practice (GLP)
- Good Manufacturing Practice (GMP)
- DIN EN ISO 17025
Eurofins Genomics offers a comprehensive services portfolio for the entire drug development process, from preclinical research to clinical phase III trials.

The drug development service portfolio for the modern biopharmaceutical industry includes an exclusive marker set for the general identification of responders/non-responders in the scope of clinical studies and expert consultation by an academic partner in pharmacogenetics. In the field of GMP manufacturing we also offer solutions that can be addressed with genomics technology.

Together with other Eurofins companies like Eurofins Global Central Laboratory, Eurofins Optimed Clinical Research, and Eurofins BioPharma Testing Services a complete service package for even worldwide multi-central registration studies is offered.

Services:

- DNA/RNA-extraction, e.g. for biobanking
- GLP compliant genotyping and sequencing
- High-throughput genotyping
- SNP, mutation and biomarker analysis
- Analysis of candidate genes
- Expression analysis by Real Time PCR
- Microarrays, e.g. SNP analysis and gene expression
- Biological safety testing, e.g. residual DNA testing or analysis of production strains and cell banks
- Next Generation Sequencing (NGS), like adventitious virus testing, tumour profiling/cancer sequencing, exome sequencing, whole genome sequencing, transcriptome analysis
- Bioinformatics
- Virus and microbiological diagnostics: Virus load determination, genotyping, sequencing and quantitative analyses of viruses and bacteria
- Metagenomic analysis
- Oligo and Gene Synthesis
- Assay development and validation
- Scientific consultancy
- Comprehensive and well-founded consultancy prior to all projects/studies
- Professional project management during the complete project/study
- Dedicated project managers and study directors as competent and reliable contact persons

Accreditations:
The QM/QA-system of Eurofins Genomics is certified according to ISO 9001, including the requirements of ISO 13485 (medical devices requirements). Furthermore we are accredited according to ISO 17025 covering molecular testing methods like Sanger sequencing (e.g. for genotyping within clinical trials), quantitative Real-Time PCR, fragment length polymorphisms analysis and mass spectrometry-based DNA analysis. In addition ISO 17025 accreditation covers next generation sequencing with Illumina technologies.

Eurofins Genomics is also certified for the principals of Good Laboratory Practice (GLP) and compliant with Good Clinical Practice (GCP). We are consistently audited by clients from the pharmaceutical industry according to these GxP regulations. We also regularly perform facility and process audits. We are participating in external proficiency testing (ring trials) on a regular basis.

For further information on the broad portfolio of Eurofins Genomics please have a look on the International Business Line "Genomic Services" section/ Germany in this Group Directory.

PHARMA CENTRAL LABORATORY

Reliable, high quality laboratory data is pivotal to the success of clinical trials. Since laboratory testing is our sole focus, we go above and beyond to provide an array of services to ensure that any clinical trial sample is collected, transported, managed, analysed, reported and stored to meet the objectives and purpose of your study. We are dedicated to providing the most cost effective and efficient solutions to pharmaceutical and biotech companies, and CROs alike.

Eurofins Central Laboratory supports its customers across its wholly-owned CAP accredited laboratory facilities in the United States, Europe and Asia. Our harmonized laboratories operate as one. All of our laboratories are connected to one global LIMS and are using the same global standard operating procedures and global reference ranges through the deployment of uniform instruments, reagents, and analytical methods to provide one global data set for submission to health authorities worldwide.

**Services:**

- Global Clinical Safety and Specialized Testing

A full package of routine and non-routine laboratory testing, including:

- **Allergy Testing**
  - Biomarkers
  - Chemistry
  - Coagulation
  - Endocrinology
  - Flow Cytometry
  - Genomics
  - Haematology
  - Immunology
  - Immunohistochemistry
  - LCMS/MS
  - Microbiology
  - Molecular Diagnostics
  - Pathology
  - Serology/Virology
  - Spectrophotometry
  - Toxicology
  - Biomarker Services
  - PD - target engagement biomarkers, proof-of-mechanism and proof-of-concept biomarkers
  - Biomarkers in clinical trials (exploratory and clinical end-point)
  - Fit-for-purpose validation and analysis of commercially available biomarker assays
  - Biomarker analysis in non-conventional biological matrices
  - A broad range of applied technologies: ELISA, MSD, Luminex, Flow cytometry and LC-MS/MS
  - Global Infectious Disease Services
  - Central laboratory microbiology to support clinical trials
  - Clinical virology services
  - Scientific consultancy

**Clinical trial supporting services**

- Logistics Support and Courier Management
- Global footprint to ensure specimen integrity and optimal turnaround time
- One logistical operating procedure for all laboratory testing applications
- Dedicated specimen kit production facility

**Customized collection kits**

- Electronic requisition forms
- Customized Investigator Manuals
- Specimen shipping procedure, materials and courier contact information
- Track and trace
- Import and export license coordination
- Investigator Site Support
- Study specific investigator laboratory manual
- Study and visit specific specimen collection kits
- Summary flow charts for experienced users
- Visit specific test schedules
- Multilingual helpdesk for global support
- Daily results reporting by web, email or fax
- Access to real-time global results database via secured electronic requisition forms
- Sample Management and Storage
- Dedicated sample management department
- Registration in LIMS (double entry)
- Barcode labelling for sample tracking and automated results reporting into LIMS
- Third party lab shipment management
- Sample storage at 2-8 °C, -20°C and -80°C and liquid nitrogen storage
- Short and long term storage
- Project Management
- Global study set-up
- Study specific materials including investigator laboratory manual, specimen kits, shipping materials
- Training investigator sites
- Single point of contact for Monitor
- Monitoring timelines

**Accreditations:**

Ensure all key deliverables are met.

**Track and report on KPMs**

- Data Management
- Study priming in global LIMS
- Data cleaning
- Electronic data transfer in sponsor defined format
- CDISC compliant
- Daily results reporting using EMDP, fax and or print reports
- IT Systems and EMDP
- Flexible global IT infra-structure to accommodate clinical trials of any nature, size, foot print or complexity
- Global LIMS
- Real-time global results database via secured Eurofins Medinet Data Portal (EMDP)
- Study enrolment progress reports
- Flagging alerts for out-of-range test results
- Trend analysis tools
- Study specific, customized analysis tools upon request
- Global Quality Assurance
- Annual process audits cross inspecting all Eurofins Central Laboratory facilities worldwide
- Data integrity audits
- Study specific audits
- Global document control
- Building and maintaining global standardized operating procedures
- Issue management coordination, analysis and improvement programs
- Key performance indicators

Eurofins BioPharma Product Testing is the largest network of harmonized bio/pharmaceutical GMP product testing laboratories worldwide providing comprehensive laboratory services for the world’s largest pharmaceutical, biopharmaceutical and medical device companies.

Our service offerings are fully comprehensive and include testing of drug substance, final product, intermediates, and starting materials for both small and large molecule drug products.

Our laboratories offer a broad range of methodologies under GMP authorization, ISO 17025 accreditation and ISO 9000 certification. All analyses are performed according to European and British Pharmacopoeia (EP), United States Pharmacopoeia (USP) and Japanese Pharmacopoeia (JP), as well as specific customer methods.

With a global capacity of more than 700,000 square feet/ 65,000 square meters and facilities located in Australia, Belgium, Denmark, France, Germany, Ireland, Italy, Spain, Sweden, UK and US, our network of GMP laboratories operates under the same strict quality procedures, LIMS and centralized billing system across 24 locations worldwide.

Services:
Biochemistry
- Method Development & Validation
- Residual Impurity Testing
- Protein Characterization

Chemistry
- Extractables & Leachables
- Container Closure Testing
- Metals Analysis
- Method Development & Validation
- Impurities Testing

Facility Validation Support
- Pharmaceutical Water Testing
- Pharmaceutical Gas Testing
- Environmental Monitoring
- Disinfectant Validation
- Cleaning & Other/GMP Process Validations

Microbiology
- Non-Sterile Products Testing
- Sterility Testing

Molecular & Cell Biology
- Endotoxins Determination
- Identification of Microorganisms
- Mycoplasma Testing
- Antibiotic Potency Testing

Stability Storage & testing
- Full ICH Stability Studies
- GMP Storage

Toxicology Services
- Alternative Toxicology
- Genetic Toxicology

Other Specialty Services
- Viral Safety Testing
- Viral Clearance
- Release Testing
- Raw Materials Testing
- Cell Bank Manufacturing
- Cell Bank Characterization
- Container Testing

**USA**

**Eurofins Abraxis**

For nearly 20 years, Abraxis has been developing, manufacturing, and marketing rapid environmental, food, and life sciences test systems, including immunochemistry products and methods, to meet the testing needs of industry and research. Through continuous collaboration with global government, industry, and academic leaders, Abraxis has built up a strong expertise in custom assay development for the food and environmental industries.

Furthermore, Abraxis has created a wide product portfolio across different technologies, formats and applications including field and lab based testing solutions for both fresh and marine water algal toxins, pesticides, GMO detection and the novel magnetic separation technology AbraMag™.
Many methods are validated/verified by regulatory agencies such as US federal agencies including the US Environmental Protection Agency (EPA), the US Department of Agriculture (USDA), the US Geological Survey (USGS), the US Food and Drug Administration (FDA), the Japanese Ministry of the Environment, and the World Health Organization (WHO).

Abraxis holds, or is exclusive licensee, of several key technology patents, with additional applications in process.

CLINICAL DIAGNOSTIC SERVICES

A shared ambition: to offer all our patients the best possible care

Clinical diagnostics at the heart of the healthcare system

Clinical diagnostic tests are a key factor in 70% of medical decisions.

A central element in healthcare, clinical diagnostic testing today contributes to every stage of patient care: predisposition testing, prevention, diagnostics, theranostics and of course monitoring of treatments.

Innovating today for the health of all tomorrow

Eurofins stands for a conception of clinical diagnostics entirely focused on excellence, innovation and technological investment.

Genetics and genomics are gradually marking out the new outlines of tomorrow's clinical diagnostics and our labs are investing heavily in these advanced technologies (NGS, i.e. Next Generation Sequencing), which already have a large number of applications for many people from NIPT (Non Invasive Prenatal Testing) to predictive genetics of cancers or in personalized medicine that can offer patients individualized treatment based on their genetic and metabolic profiles.

The commitment of our laboratories: to work for public health

A healthcare service available to all

With tens of thousands of clinical diagnostic tests every day, the laboratories of the Clinical Diagnostics division strive to ensure that every patient, wherever he or she lives, is assured of access to the most specialized and most innovative techniques for diagnosis, monitoring and therapeutic adjustment.

With our logistics expertise and our daily sample collection and delivery network, we can guarantee perfect continuity in the provision of care, the same quality and the same access to innovation across all the regions that we serve, to the benefit of patients and the medical profession.

Our local laboratories, our technical platforms and our high specialized clinical testing platforms are thus working in the service of public health, focusing on improving the quality and effectiveness of clinical diagnostics and giving all our partners access to state-of-the-art clinical biology, the biology of today and tomorrow in the service of a more personalized medicine.

Enabling equal access to the most innovative tests

Offering the most innovative tests to the wider population at a cost that is affordable for society, this is our mission.

While promoting prevention and screening, earlier and more accurate diagnoses, more efficient, faster and safer therapeutic management, and at the same time reducing diagnostic and therapeutic error and side effects of treatments, our laboratories also respond to the need to control health spending.

We therefore work closely with the health authorities, clinical pathology professionals and clinicians as well as with public and private hospitals to monitor developments in medicine and to reflect on the positioning, financing and innovation in clinical biology in the service of public health.

Bio-Access/Labazur

All tests are performed at a regional technical laboratory. In addition, each site conducts urgent analysis on site. Our biologists, after following a university course with a 4 year specialisation 4 years in medical biology, have professional experience in Hospital and in private laboratories.

They all adhere to a quality approach that offers the patient a standardized and optimum service.

90
Through our website, www.labazur.com, patients have access to the results of most of their analyzes online. There is also a selection of scientific articles, news, advice, forms to download.

**Biomnis**
A European leader in specialised medical testing, Biomnis carries out over 32,000 tests per day from a range of over 2,500 tests available, including specialised tests for which the company has appropriate authorisations. Biomnis is one of the largest independent laboratories in Europe focusing on specialty diagnostic testing, with a strong reputation in many areas including infectious diseases, supported by its renowned competence in molecular biology and cytogenetics. With over 100 years of laboratory testing excellence, Biomnis developed its expertise in high-complexity testing over the last 15 years through investments in state-of-the-art equipment and selected acquisitions. Biomnis bases its reputation on the continuous development of new tests and performance of high medical value tests. It has kept its position through continuous technological innovation and investment, particularly in areas such as female biology, oncology and personalized medicine, as well as chromosomal and molecular genetics.

Eurofins Genomics

Eurofins Genomics offers a comprehensive services portfolio for the entire drug development process, from preclinical research to clinical phase III trials.

The drug development service portfolio for the modern biopharmaceutical industry includes an exclusive marker set for the general identification of responders/non-responders in the scope of clinical studies and expert consultation by an academic partner in pharmacogenetics. In the field of GMP manufacturing we also offer solutions that can be addressed with genomics technology.

Together with other Eurofins companies like Eurofins Global Central Laboratory, Eurofins Optimed Clinical Research, and Eurofins BioPharma Testing Services a complete service package for even worldwide multi-central registration studies is offered.

Services:
• DNA/ RNA-extraction, e.g. for biobanking
• GLP compliant genotyping and sequencing

Accreditations:
• Assay development and validation
• Comprehensive and well-founded consultancy prior to all projects/studies
• Professional project management during the complete project/study
• Dedicated project managers and study directors as competent and reliable contact persons
• Expert advice on the evaluation and interpretation of results

Germay

Accreditations:
The QM/QA-system of Eurofins Genomics is certified according to ISO 9001, including the requirements of ISO 13485 (medical devices requirements). Furthermore we are accredited according to ISO 17025 covering molecular testing methods like Sanger sequencing (e.g. for genotyping within clinical trials), quantitative Real-Time PCR, fragment length polymorphisms analysis and mass spectrometry-based DNA analysis. In addition ISO 17025 accreditation covers next generation sequencing with Illumina technologies.

Eurofins Genomics is also certified for the principals of Good Laboratory Practice (GLP) and compliant with Good Clinical Practice (GCP). We are consistently audited by clients from the pharmaceutical industry according to these GxP regulations. We also regularly perform facility and process audits. We are participating in external proficiency testing (ring trials) on a regular basis.

Services:
• Bacteriology
• Hospital hygiene

Accreditations:
• COFRAC

Eurofins LifeCodexx
Headquartered in Konstanz (Germany), Eurofins LifeCodexx has been developing innovative and clinically validated non-invasive diagnostic tests based on the newest molecular analytical methods since 2010.

With the PrenaTest®, Europe’s first non-invasive prenatal test (NIPT) for the determination of the most common chromosomal disorders in unborn children, launched in 2012, Eurofins LifeCodexx has been changing prenatal diagnostics considerably.

The test is performed within Germany in strict conformity with the highest quality standards as per the European Directive on In-vitro Diagnostic Medical Devices.

INDIA

Eurofins Clinical Genetics India

Eurofins Clinical Genetics India (ECGI) is working with Next Generation Technologies for molecular genetic testing and carrier screening for patients care.

Over the past decade, next-generation sequencing (NGS) has led to an exponential increase in our understanding of the genetic basis of disease, which has provided insights into molecular-based prognosis & diagnosis.

ECGI’s integrated approach is to create comprehensive map of genetic disease using automations and high throughput sequencing, genotyping & microarray tools to revolutionize the patient care. ECGI strive to make the genetic testing process affordable, efficient with actionable information to our researchers, clinicians and patients.

The ECGI team and its collaborators across the globe have rich expertise and experience in implementation of Omics technologies to create innovative solutions for Clinical Genomics and Genetics.

Services:
• Non-Invasive Prenatal Testing (NIPT)
• Medical Exome Sequencing
• Multigene NGS panel for Molecular Genetics Testing
• Genetic Carrier Screening

Accreditations:
(In Process)
• ISO 9001: 2015

IRELAND

Biomnis Ireland

Accredited to the ISO 15189 medical testing standard, Biomnis Ireland Medical testing (formerly Claymon Laboratories) is the leading independent provider of medical laboratory testing services in Ireland.

We are proud to offer our clients an accredited pathology service which uses the most sophisticated diagnostic equipment and techniques in all fields of pathology, including a dedicated pathology transport service, expert medical pathologist support and novel IT connectivity solutions to meet all of your pathology needs.

Biomnis processes over 250,000 patient tests per week, providing rapid turnaround times for over 2,500 clinical tests across all biomedical disciplines.

Services:
• Autoimmunity
• Allergy
• Microbiology
• Infectious serology
• Haematology
• Specialised biochemistry, physical chemistry and toxicology
• Immunochemistry
• Endocrinology
• Antenatal diagnostics
• Cytogenetics
• Histopathology & Cytopathology
• Fertility Testing

Accreditations:

Eurofins MC Pathology
The Medical Consultants Pathology Group is a histology laboratory based in the Northbrook Clinic in the heart of Dublin City. Established in January 2013.

The laboratory provides a full laboratory service from wet tissue receipt, through technical processing and specialist reporting by a team of Consultant Histologists. The laboratory is led by a team of highly trained and experienced Consultant Pathologists, and Scientists, with a vast knowledge and experience in both public and private health care.

ITALY

Eurofins Genoma
With 20 years of clinical testing innovation, Genoma offers a wide range of specialty diagnostic testing services, and has developed a strong reputation in molecular biology and cytogenetics.

Specifically, the company is a pioneer in non-invasive pre-natal testing (NIPT) in Italy, and leads the industry in innovative diagnostic tests in oncology.

JAPAN

Eurofins Clinical Genetics
Japan
Eurofins Clinical Genetics K.K. is a clinical laboratory working with cutting-edge technology and providing new testing services in Japan.

The company was established in 2015 and started a non-invasive prenatal genetic testing (NIPT) service in 2016 by next generation sequencing (NGS).

Eurofins Clinical Genetics K.K. always offers the best quality service to support our customers.

Spain

Eurofins Megalab
(European & Latin American Operations)
Megalab is currently one of the largest laboratories in Spain.

We are a national leader in services, information, management and diagnostic tests clinical analysis and pathology. We also lead the management of intra-hospital laboratories in the country, with presence in 54 private hospitals that serve more than 4,500 beds.

We have a network of 60 laboratories covering the entire national territory and offer our services to all medical societies, health centers and hospital management companies. More than 500 centers send samples to our headquarters in Madrid, where we carry out about 10,000 tests per day.

We provide our customers with the latest technological advances in order to provide an effective response and quality service to our patients.

**Diatherix**

Based in Huntsville, Alabama, Diatherix is a highly-specialised laboratory providing cutting-edge molecular diagnostic testing services to hospitals and physicians using proprietary TEM-PCR™ (Target Enriched Multiplex Polymerase Chain Reaction) technology for precise detection of infectious diseases at high levels of sensitivity and specificity, and at very short turnaround times.

TEM-PCR™ is a breakthrough molecular multiplex technology that allows not only rapid DNA/RNA identification of multiple pathogens in a single sample, but also specific genetic drug resistance diagnostic, in as little as 6 hours. Diatherix has developed several diagnostic panels to identify multiple organisms in samples quickly and accurately, helping physicians and healthcare providers choose more effective antimicrobial therapy and improve patient outcomes. The company's service offering and expertise therefore fits perfectly with Eurofins' recent acquisition of ViraCor and its core competence in infectious diseases, immunology and transplant cases.

**EGL Genetics**

EGL Genetics specializes in diagnostic testing for the more common genetic disorders to the ultra-rare. Industry differentiators include a comprehensive test menu spanning preconception testing to adult-onset genetic disorders; 3 labs in 1; molecular genetics, biochemical genetics, and cytogenetic testing performed under one roof; board-certified laboratory directors and genetic counselors reporting out each case; and 47 years of clinical experience, making EGL the oldest clinical genetics laboratory in the United States.

With more than 500 US-based and international clients, EGL Genetics has a global reputation for quality.

Eurofins Genomics

Eurofins Genomics is accredited for ASRs and IVD applications through our cGMP facility in Louisville. We offer cGMP certified DNA/RNA oligonucleotides, and CLIA and CAP accredited sanger sequencing. In addition, our products and services include library assays, Next Generation Sequencing, gene synthesis, gene fragments, applied genomics, genotyping, and gene expression.

For GMP projects, we work with the client to provide custom solutions and custom down-stream processes to meet your regulatory needs.

Services:

• cGMP DNA / RNA Oligonucleotides
• Each GMP project receives a devoted project manager
• Kit packing
• DNA Sequencing in tubes, plates and kits.
• Gene Synthesis & Synthetic Biology
• Gene Fragments
• Next Generation Sequencing
• qPCR and MGB-eclipse probes
• Library Assays
• Applied Genetics: Genotyping, Gene Expression & Microarrays

Accreditations:

• ISO 9001:2008
• ISO 13485:2003
• CLIA accredited
• CAP accredited
• FDA 3009882691 for the manufacture of ASRs (Analyte Specific Reagents) for use in IVD products

From implants and instruments, to single-use and combination products, as well as active electronic devices, Eurofins Medical Device Testing provides the optimal strategy for all types of medical devices and delivers rapid turnaround times with the highest level of service and most advanced technologies.

With extensive knowledge of the commercialization process, regulatory requirements and scientific trends in the Medical Device Industry, our scientists and engineers have been assisting companies, large and small, with developmental testing and regulatory submissions for more than 25 years.

Our 16 state-of-the-art facilities throughout North America, Europe and Asia Pacific offer extensive capacity and the highest level of instrument technology, enabling us to provide the full scope of testing services required by the Medical Device Industry.

Eurofins Medical Device Testing can help develop and execute your test plans and navigate the regulatory pathway to market anywhere in the world. Our laboratories maintain quality systems compliant with cGMP, GLP, and ISO 17025, and conducts testing in accordance with ISO, ASTM, ANSI, AAMI standards, as well as custom test methodologies to meet the unique needs of our customers.

**HUMAN SAFETY**

**TESTING**

**FRANCE**

**Eurofins Biotech Germande**

Born from the merger of Biotech and Germande association, Biotech-Germande is today located in the campus of scientific university of Luminy in Marseille.

Specialising in the management of the infectious risk associated with the use of complex reusable medical devices and hospital environment, Biotech-Germande is the essential partner for healthcare facilities.

**Services:**

**Education / Training**

Our education/training programs in hygiene are designed for all medical and paramedical staff including:

- Physicians,
- Pharmacists,
- Nurses, Hygienists...
- Microbiological sampling

Healthcare facilities and some structures receiving public have an obligation to monitor and control infectious risk. We assist you in the process of microbiological surveillance of the environment:

- Microbiological monitoring of the environment (air, water, surface…)
- Medical devices sampling (endoscopes, endoscope drying/storage cabinets, automatic endoscope reprocessors)

**Medical Device Evaluation**

In collaboration with the health industry, we act as an independent testing laboratory for the analysis of the risk factors in the design and validation stages of a medical device:

- Medical Device Safety
- Type Testing
- Performance Qualification

**Germany**

**Eurofins BioPharma Product Testing Munich**

The safety evaluation for every new product or therapy offered by the medical device, pharmaceutical, chemical, cosmetics or food industry is required by law. The basic goal of such an evaluation is to identify the side effects a substance or product may cause in humans.

Therefore, Eurofins BioPharma Product Testing Munich offers its customers a broad range of human safety testing services for the following markets:

- (Bio-)Pharmaceuticals
- Medical Devices
- Chemicals/REACH
- Agrochemicals and Biocides
- Cosmetics
- Food

A high degree of customer orientation, high quality and flexibility are core values of our corporate philosophy. A highly experienced team of scientists and regulatory experts guarantees acceptance by national and international authorities and supports customers from the beginning until finalization of a project.

**Services:**

**Pharmaceuticals, Biologics & ATMPs**

- Process and Product Related Impurities
- Bioassays
- Method Development & Validation
- Stability & Release Testing
- Sterile & Non-Sterile Product Testing
- Leachables & Extractables Testing
- Immunoanalytical studies
- Bioanalytical studies
- Toxicology studies
- Pharmacology studies

**Medical Devices**

- Biocompatibility Testing
- Cytotoxicity Tests
- Sensitization studies
- Irritation studies
- Hemocompatibility Testing
- Microbiological Testing

- Implantation studies (in collaboration with partner laboratory)

(Agro chemicals, Cosmetics & Food Additives
- Irritation studies
- Sensitization studies
- Local Tolerance studies (in collaboration with partner laboratory)
- Genetic Toxicology

**Accreditations:**

- Good Laboratory Practice (GLP)
- Good Manufacturing Practice (GMP)
- DIN EN ISO 17025
- FDA audited
- Listed by the World Health Organization (WHO)

**IRELAND**

**Eurofins Lancaster Laboratories**

Eurofins Lancaster Laboratories’ Ireland facility provides microbial, chemical and biologics analysis to the biopharmaceutical, biotech and medical device industries throughout the US, Europe and Japan.

The company was originally founded in 1986 and has been successfully audited by US and European regulatory agencies. It currently employs 120 people in Dungarvan, County Waterford.

Eurofins Lancaster Laboratories also offers Professional Scientific (PSS) solutions and manages dedicated teams at client companies in Ireland and UK.

**Services:**

Eurofins Lancaster Laboratories has extensive experience in testing a full range of raw materials, intermediates and finished sterile and non-sterile products.
Microbiology and chemistry laboratories are fully equipped to offer complete testing services, including extensive chromatography facilities (HPLC, GC, TLC and GC-MS), spectroscopy (UV-VIS, AA and FTIR), metals analysis via AA, GFAA and ICP, dissolution testing, physical testing of tablets, full media preparation facilities, class A/B and C cleanrooms, isolator technology and MicroSeq genotypic bacterial and fungal identification.

Our biologics facility conducts a variety of assays, and analysis by CE.

Eurofins Lancaster Laboratories has broad experience using clients’ methods and internationally recognised methods such as USP, BP or Ph. Eur. Alternatively, procedures can be developed in accordance with our clients’ requests.

Chemistry
• Compendial testing of raw materials
• Process validation
• Method development & validation in accordance with ICH guidelines
• Stability storage and testing
• Product Release Testing
• Cleaning validation studies
• Purified water and waste water testing
• Contaminant identification

Microbiology
• Microbial limit testing of raw materials and finished products
• Method development for sterility and bioburden analysis
• Validation and bioburden analysis according to the relevant pharmacopoeia
• Bacteriostasis and Fungistasis analysis
• Sterility analysis (Isolator and Clean Room)
• Identification of micro-organisms (Microseq)
• Preservative efficacy testing
• Use dilution and surface challenge testing of detergents and disinfectants

Biopharmaceutical

Eurofins Lancaster Laboratories can support all aspects of the biopharmaceutical drug development process with a comprehensive range of services from the biochemical characterization of biologicals to product specific cell and non-cell-based assays for drug potency.

The laboratory provides industry-leading experience in the development, optimisation, qualification and validation of biopharmaceutical products that meet regulatory guidelines for all phases of the development cycle.

Impurity Testing
• qPCR for Residual DNA impurities (CHO/E.coli)
• Host cell protein and Protein A contamination (ELISA)

Protein Analysis
• Capillary Electrophoresis (SDS/IEF)
• SDS-PAGE/Western Blot/IEF
• UV Spectroscopy
• ELISA (Potency)
• Bio chromatography (UPLC/SEC/RP)

Medical devices

Eurofins Lancaster Laboratories offers a comprehensive range of analyses and support functions to the Medical Device industry. Microbiological laboratory facilities include class A/B and C clean rooms and a microbial identification laboratory.

Experience in the validation of analytical methods and analysis of a wide range of medical devices, including prosthetic implants, ophthalmic implants, cutaneous adhesives and cardiac implants. Also provides contract facilities for the determination of API’s associated with medical devices.

All data and results can be accessed via our LabAccess Web portal.

Accreditations:

• Biopharmaceutical Microbiology, Water Microbiology, and Water Chemistry departments are accredited to ISO17025 by the Irish National Accreditation Board (INAB) - certificates 004T and 042T
• Irish Medicines Board (IMB) approval for performing contract analyses for the biopharmaceutical industry
• Inspected and registered by the FDA as a contract laboratory to serve the biopharmaceutical industry
• EPA approved laboratory for a range of environmental tests

Eurofins Lancaster Laboratories

With more than 50 years of experience of delivering comprehensive laboratory services, Eurofins Lancaster Laboratories enables global biopharmaceutical companies to advance candidates from development through commercialisation while ensuring regulatory compliance, cost effectiveness and achievement of timelines.

For a seamless service experience, customers team with scientists and project managers throughout the outsourcing process from testing to monthly reports to 24-hour online data access at LabAccess.com™.

Three flexible service models, including award-winning Professional Scientific Services™ at customers’ sites, and in-house FTE options, further broaden customised drug development services.

Services:
Biochemistry
• Spectrophotometry (CD, Bradford, A280, BCA)
• Electrophoresis (CE, SDS-PAGE, 2D gels, Western blots, IEF)
• Chromatography (AAA, peptide mapping, glycan profiling, SEC, CEX, RP-HPLC and UPLC)
• Mass Spectrometry (Ion trap, LC/MS/MS, ESI-TOF, MALDI-TOF, Orbitrap)

Molecular & Cell Biology
• Cell Banking and Storage
• Cell Based Potency Assays (Cell proliferation, cAMP, reporter gene, cell surface receptor binding)
• ELISA (HCP, Protein A, sandwich ELISA, competitive ELISA)
• qPCR (rDNA, Viruses)
• Genetic Stability (custom)
Virology
• Viral Clearance (Infectivity assays, qPCR assays)
• Viral Safety Testing (retrovirus, reverse transcriptase assays)

Chemistry
• Feasibility, method development, validation, qualification and transfer
• Full stability and release testing for clinical trial materials and finished products
• Dissolution and comparator study support
• Raw material and excipient testing

Microbiology
• Sterility & Mycoplasma Testing
• Endotoxin
• Environmental Monitoring and Organism Identification
• Particulates
• Microbial Limits
• Preservative Effectiveness
• Water Testing

Biopharmaceutical and biopharmaceutical
• Drug substance and drug product, clinical, registration, and commercial stability testing
• Marketed product release testing
• Stability storage and product retain programmes
• Raw material/excipient testing (USP/NF, EP, JP) and Melamine testing
• Residual Impurity investigation and analysis
• Comparator product testing and clinical ID/re-assay testing

Specialised Services
• Method development, optimisation, cGMP qualification and validation
• Expedited raw material and excipient testing (USP/NF, EP)
• Container testing on plastic and glass
• Extractables/ Leachables testing
• Process/ facilities validation – viral clearance, residual impurity testing, extractables & leachables, water testing, environmental monitoring, on-site sample collection
• Consulting/protocol writing.

Five Service Models
• Fee for Service: Eurofins Lancaster Laboratories' staff performs work on project-by-project basis.
• Managed Hours: Staff performs work on a project-by-project basis, utilising a simplified quote and payment process based on hours used.
• Full Time Equivalent: Eurofins Lancaster Laboratories' staff, at US or Ireland site, fully dedicated to client's project needs.
• Professional Scientific Staffing™: Eurofins Lancaster Laboratories’ staff, hired, trained and managed by Eurofins Lancaster Laboratories, at client’s site.
• Asset/Operation Ownership: Staff assumes full operational responsibility and acquires client’s facility and/or equipment.

Markets Served
Eurofins Lancaster Laboratories offers complete CMC Testing Services to support the largest bio/pharmaceutical companies and CMOs, including testing of all starting materials, process intermediates, drug substances, finished products and manufacturing support through broad technical expertise in Biochemistry, Molecular & Cell Biology, Virology, Chemistry and Microbiology.

Facilities
With facilities in Lancaster, PA; Portage, MI; and Dungarvan, County Waterford, Ireland, Eurofins Lancaster Laboratories’ facilities offer cGMP-compliant laboratory services and operate under harmonised BioPharma Product Testing programmes and LIMS.

Accreditations:
FDA, EMA, PMDA GMP inspected

SPAIN

Eurofins EVIC Spain

Eurofins EVIC is one of the largest independent players in Europe in the field of Clinical testing and Toxicological expertise, mainly for the cosmetic and dermo-pharmaceutical industries. Employs more than 100 staff across Europe and, with more than 40 years of experience in its area, has a very strong reputation and several internationally recognized experts.

Eurofins EVIC Spain works with major European cosmetic and dermo-pharmaceutical manufacturers. The laboratory main field of expertise is the development of Clinical tests focusing on the toxicological expertise and safety assessment of each formulation.

Eurofins EVIC Spain offers a broad spectrum of clinical tests for cosmetics, as well as for hygiene products and detergents. Among tolerance and efficacy clinical tests and in vitro tests, our service portfolio includes chemical, physical and microbiological analyses.

Services:
Clinical Testing (Safety & Efficacy)

Safety:
• Patch test
• Open test
• Sensitization test (Human Repeated Insult Patch Test)
• Photo-toxicity test
• In use test under medical control: dermatologist, ophthalmologist, dentist, gynaecologist, pediatrician, etc.

Efficacy /Claim substantiation:
• Moisturizing: Corneometer®
• Skin barrier: Tewameter®
• Anti-ageing: Silicone replicas, fringe projection
• Skin elasticity, firmness: Cutometer®
• Skin color: Colorimeter® and Chromameter®
• Hair care: antidandruff, hair loss (PTG), sebum
• Sun protection: SPF in vivo ISO 24444, UVA in vivo ISO 24442, UVA in vitro ISO 24443
• Make-up: long lasting
• Clinical scoring by experts
• Tailor-made protocols

Toxicological expertise & Safety assessments
• Safety assessment compliant to EU Cosmetic regulation 1223/2009 by toxicologists (EUROTOX).

Eurofins Product Testing Services UK

Eurofins Product Testing Services UK are highly experienced in helping suppliers of non-food products meet their own safety criteria as well as those imposed by customers and the law.

Our reputation for an efficient and cost-effective service is unparalleled and enjoyed by many of the largest consumer product companies. In addition to our reliable testing services, we also provide advice and support for our customers to solve problems and to interpret testing results in the light of recent developments and regulations.

Our experts are involved in many areas of safety and we can therefore provide our customers with authoritative interpretation of results.

**Germany**

**Eurofins Genomics**

Eurofins Genomics is globally known for its innovative technologies in the life science arena including academic institutions, biotech and the pharmaceutical industry. The company has established an outstanding team of more than 600 talented genomics experts and a broad range of technologies in the field of genomic services, forensics, agroscience, pharmaceutical, environmental, food and feed testing at our fully automated production facilities in Europe, USA, Japan and India.

This unique team supports Eurofins Genomics’ approach to offer best practices and flexibility for all clients – from academic institutions to large companies around the world.

**Services:**

- Eurofins Genomic Markets
- Pharma & Diagnostics

Eurofins Genomics has extensive experience in applying the different genetic analysis methods and techniques which are crucial for the entire drug development and production process:
  - Preclinical phase through all phases of clinical trials (phases I, II and III)
  - Quality control for production of biologicals

Comprehensive services are available for all your study or project needs in the field of analysis, research and development. Amongst others the Eurofins Genomics services portfolio covers DNA/RNA extraction for biobanking, GLP-compliant genotyping and sequencing, biomarker analysis, residual DNA testing, adventitious agent testing via NGS or analysis of production strains and cell banks. These services are available from single sample analysis all the way through to the high throughput levels involving several thousand samples.

**Agriculture & Food**

Important traits in agricultural plants and livestock such as yield, drought resistance, pathogen resistance, feed efficiency and quality linked parameters are genetically encoded. Eurofins Genomics agrigenomics
services support:
• Plant breeding
• Farm animal & pet breeding
• Food production & authenticity testing

Eurofins Genomics provides a flexible, competent service with global reach, high industry standards and scalable capacity. One of the in-house experts will be assigned as your project manager ensuring excellent support and communication. Together you will find the perfect solution for your genomic characterisation and marker identification projects by integrating the latest technologies for sequencing and genotyping.

Industrial Biotechnology

Eurofins Genomics can offer you individual genomics solutions from the companies’ industry leading service portfolio. These include:
• DNA & RNA extraction services
• Genomic, metagenomic & genetic characterisation
• Characterisation of genetic variability
• Residual host cell and pathogen DNA & RNA analysis
• Design and production of synthetic genes, gene fragments and gene evolution libraries
• GMO & genetic insert characterisation
• Assay design & validation

Research

From frequently used services such as DNA & RNA oligos and synthetic genes right through to genotyping, next generation sequencing and transcriptomics, Eurofins Genomics can offer you a broad portfolio of solutions and services for your research:
• DNA & RNA Oligonucleotides
• Custom DNA Sequencing
• Next Generation Sequencing (NGS)
• Gene Synthesis & Molecular Biology
• Genotyping & Gene Expression Services

With a great deal of expertise and experience in handling all types of research projects, the Eurofins Genomics expert team employs more than 80 PhD’s in all disciplines related to genomics to make your project a success.

Accreditations:

Focusing on providing excellent customer support, together with highest quality services, Eurofins Genomics ensures to remain as one of the world’s leading genomic service providers. The company’s QM/QA System is ISO 9001 and ISO 13485 certified. As an ISO 17025 accredited DNA-testing laboratory approved by DAkkS, Eurofins Genomics also offers testing services that are compliant to the principles of Good Laboratory Practice (GLP) and Good Clinical Practice (GCP).

Eurofins Genomics India

Eurofins Genomics India is a leading provider of genomic services in India. Many of the top life science companies and academic research institutions in private and public sector are clients of Eurofins India.

Our focus is on customer convenience and providing high quality service. With a team of experienced and skilled manpower, Eurofins Genomics India has gained an excellent reputation as a reliable source of genomic products and services.

Services:

• Custom Oligonucleotide Synthesis
• DNA Sequencing
• Next Generation Sequencing
• siRNA
• Gene Synthesis
• Microbial Identification
• Fragment Analysis
• SNP Genotyping
• Microsatellite Analysis
• RAPD
• RFLP
• BAC DN

**The Netherlands**

**Eurofins ProBase Pharma**

Eurofins ProBase Pharma B.V. is an independent contract service laboratory with a focus on molecular biological testing methods on pharmaceutical raw materials, process intermediates and finished products.

Eurofins ProBase Pharma is a joint venture between BaseClear B.V. (specialized in DNA sequencing technology) and Eurofins MicroSafe Laboratories (specialized in pharmaceutical microbiology, mycoplasma and virology).

The pharmaceutical microbiology industry will change rapidly over the next years when molecular biological methods will replace the classical purification and incubation methods. Identification and typing of bacteria and fungi can be very costly and time consuming, because of growth time of the microorganisms and lab work.

Eurofins ProBase Pharma B.V. offers services using established as well as innovative techniques under GMP conditions. Our methods are faster and more reliable that currently used phenotypic methods. Most systems and Eurofins ProBase Pharma services are suitable for fast screening (1 day for our Fast Identification services!) of even the most difficult samples, when pure cultures are provided. Whenever necessary, samples can be pure cultured on request.

Eurofins ProBase Pharma B.V. provides rapid molecular based tests to the pharmaceutical industry under a GMP quality system.

**USA**

**Eurofins Genomics**

Eurofins Genomics offers a wide array of genomics services including DNA sequencing, DNA/RNA synthesis, Synthetic Biology, Next Generation Sequencing, Genotyping, Gene Expression, Microarrays, and bioinformatics for academic and industrial research.

We offer one of the fastest turnaround times for sequencing in the country, the lowest error rate in the industry for oligonucleotides, and our approach is highly service oriented.

**Services:**
- DNA/RNA Oligonucleotides with a variety of options, purifications and modifications available.
- DNA Sequencing in tubes, plates and kits.
- Gene Synthesis & Synthetic Biology
- Gene Fragments
- Next Generation Sequencing
- qPCR and MGB-eclipse probes

**Accreditations:**
- CLIA accredited
- CAP accredited
- ISO 9001:2008
- ISO 13485:2003
- FDA 3009882691 for the manufacture of ASRs (Analyte Specific Reagents) for use in IVD product

FORENSIC SERVICES

Our ISO 17025 accredited DNA laboratories offer a full range of testing services - from DNA extraction to high throughput DNA sequencing, SNP and scene of crime analysis.

From the analysis of conventional samples (blood, urine and oral fluids) through to the development and analysis of specialist samples (hair and nails), our range of detectable drugs and chemicals is unsurpassed across Europe.

BELGIUM

Eurofins Forensics Belgium

Eurofins Forensics Belgium is a multidisciplinary lab using many different analytical techniques. While the forensic team is usually involved in work for the police, the coroner and the criminal law courts, the counter analyses of biopharmaceuticals or control of agricultural products and environmental waste are also aspects of forensic toxicological work.

Our team consists of specialists who are the best in their field and always up-to-date on national and European regulations.

Services:

- Services offered: analytical toxicology in body fluids and tissues (gases, solvents, medicines and drugs, pesticides, heavy metals, toxins), toxicokinetics, DNA genotyping (STR and sequencing), kinship and paternity testing, arson analysis, drugs prone to abuse, drowning analysis, risk analysis (REACH), and legal testimony.

Accreditations:

- ISO/IEC 17025 (BELAC)

Biomnis

Biomnis has a specialised genetic fingerprinting laboratory with all the equipment and accreditations necessary to perform such tests (which are subject to very particular legal constraints). Legal experts from the genetic fingerprinting laboratory are consulted in a variety of different fields, including evidence samples analyses (exhibits), profiles for the Criminal Registry, mitochondrial DNA sequencing and paternity tests.

Services:

- The Biomnis Genetic Fingerprinting Department has special skills in a number of areas:
  - Trace analysis: this activity consists of simple isolated trace amounts (officially sealed exhibit samples) specimens follow orientated testing to define the human biological nature of the trace (with BlueStar® staining and specific CrimeScope® illumination);
  - Genotyping of the trace on at least 15 sequences; Contact traces (material which cannot be seen by the naked eye) are harvested and their genetic material is concentrated to determine its nuclear DNA and genotype.
  - Profiling for the Criminal Registry (the national genetic fingerprint data base) and of other individuals: double amplification and genotyping in distinct reactions for all identifications, even of homozygotes and those with a mutation in a priming sequence.
  - Mitochondrial DNA: MtDNA sequencing from an isolated trace or from a sample of saliva or blood.
  - Paternity tests: civil and criminal cases with direct genotyping to confirm or rule out direct parentage, brother- or sisterhood and even more distant relationships.
  - Material from a prematurely terminated pregnancy to confirm or rule out direct relationships.
  - Complex evaluations, specific procedures, emergency treatment, etc.

France

Toxlab

Toxlab is one of the leading independent analytical laboratories within France specialising in the provision of an unparalleled range of toxicology testing and support services to police & governmental institutions:

- Post-mortem toxicology
- Road Traffic Accidents
- Doping
- Investigation in Drug-Facilitated Crimes and Drug-Facilitated Sexual Assault
- Expert Witness interpretation in toxicology
- Analysis of seized street drugs. Detection of traces of narcotics on different materials (banknotes, cell phones, clothes)
- Workplace drug testing and toxicological analysis in occupational medicine (metals in blood, urine and hair, solvents)

With over 20 years’ experience in toxicological analysis in a variety of matrices, especially for forensic cases, our ISO/CEI 17025:2005 accredited laboratory undertakes a comprehensive range of scientific analysis in accordance with international criminal justice standards.
Laboratoire Chemtox
Chemtox is a pioneer in the toxicological analysis of blood, urine, oral fluids and hair for the characterization and determination of a wide range of chemical compounds.

The ISO 17025 accredited laboratory provides services to the criminal justice and industrial clients throughout Europe, and delivers solutions and expertise with:
- Toxicological analysis for forensic investigation
- Expert Witness interpretation in toxicology
- Detection and quantification of pesticides
- Analyses of biopharmaceutical drugs, hormones and therapeutic agents
- Detection and quantification of volatiles substances (solvents, hydrocarbons) and gases
- Detection and quantification of metals and trace elements in blood, urine and hair

Services:
- Toxicological investigation to establish the cause of death: General Unknown Toxicology (GUT), Post-mortem Toxicology
- Analysis in Road Traffic Accidents (RTAs): blood alcohol determination (BAC) and urine alcohol determination
- Characterisation of the use of performance-enhancing in human and animal sports (Doping)
- Investigation in Drug-Facilitated Crimes (DFC) and Drug-Facilitated Sexual Assault (DFSA): blood, urine and hair analysis
- Expert Witness interpretation in toxicology, Testifying in Court
- Determination of heavy metals in blood, urine and hair (Occupational Medicine)
- Workplace drug testing (WDT): alcohol, narcotics, benzodiazepines, antidepressants. Toxicological analysis in occupational medicine (mainly metals and solvents)
- Analysis of seized street drugs. Detection of traces of narcotics on different materials (banknotes, cell phones, clothes)

Accreditations:
- NF EN ISO/CEI 17025:2005

Eurofins IFEG
Eurofins IFEG is involved in DNA Forensic analysis for the justice as well as evidences from crime scene and paternity testing.

Accreditations:

Germany

Eurofins Medigenomix Forensik

Eurofins Forensik was split from Eurofins Medigenomix in 2012 in response to continued growth and to better serve the highly specialised DNA forensics market.

In DNA forensics and human identity testing, Eurofins Forensik is the leading private laboratory in Germany. We are top of the list of European paternity testing laboratories. We are part of the international Eurofins Forensics laboratory network (www.eurofins-forensics.com).

Our specific strengths are high-quality, cost-efficient high-throughput analyses, an enormously broad range of analytical methods and our team of experienced experts.

At our DNA campus in Ebersberg, Germany, we have access to state-of-the-art equipment. Additionally our experts have access to a wealth of methods and new techniques which go far beyond the capabilities of other Forensics and Paternity Testing Laboratories

Services:
- Our services are demanded by a wide range of national and international clients such as police forces, courts, lawyers, the legal system, industry, R&D organisations, academia and private persons.
• DNA profiling for inclusion into national DNA databases
• DNA profile interpretation and comparison for suspects - scene linkage and multiple scenes - incident linkage
• Analysis of Crime Scene Stains and evidences including court-compliant expert witness reports and court appearance
• Paternity Testing and complex relationship testing
• Ancestry Testing
• Court-compliant DNA sampling
• R&D Services
• Validation and optimisation of machinery and consumables used in DNA forensics
• Testing of consumables and devices for traces of human DNA, e.g. medical consumables, swabs, microtitre plates, pipette tips, syringes.
• Disaster Victim Identification
• Animal parentage testing

Accreditations:
• Comprehensive ISO 17025 for Forensic Genetics
• ISO 9001
• Staff security vetted by the German Police
• Lab is regularly audited by Police forces for quality and security.
• Regular and long-term participation in numerous ring trials.

CONSUMER PRODUCTS TESTING

The Eurofins Group provides testing, certification, and consulting on the quality and safety of products to manufacturers, distributors and retailers. Our expertise encompasses a multitude of national and international specifications and regulations. The Group applies the highest technical standard to ensure impartial testing and independent judgement.

Eurofins’ international network can support you in designing individually tailored testing programs, and is able to give advice on how to interpret and use the results obtained.

AUSTRALIA

Eurofins Dermatest Pty Ltd

DERMATEST Pty Ltd, founded in 1997, is the leading Sunscreen and skin care evaluation laboratory in Australia. The laboratory and its CEO, John STATON, are recognized internationally for their active role in the definition of International Sun Protection Standards.

DENMARK

Eurofins Product Testing Denmark

Eurofins Product Testing A/S specialises in testing, consultancy and certification of chemical safety of consumer products from all over the world.

The laboratory offers a broad range of services to the manufacturing industry and importers including:
• Building materials
• Furniture
• Food packaging materials
• Polymers and rubber
• Gloves
• Toys
• Detergents, hygiene products and cosmetics
• Non-food and DIY retail

Services:
VOC emission testing is the main focus of the laboratory: The world market leader in its field and Eurofins group competence centre. Internationally recognized experts operate the highest number of emission test chambers world-wide, documenting product performance relative to national VOC regulations and various labels, e.g. EMICODE, Blue Angel, LEED, AFSSSET, Ü Mark/AgBB and Eurofins Indoor Air Comfort.

Other services include:
• Factory inspection, auditing & certification
• Migration analysis

Accreditations:
• Large scale under ISO17025
• CPSC approval for the US market
• Mutual acceptance with many national certification bodies worldwide

FRANCE

Eurofins ATS

Eurofins ATS specialises in Consumer Product Testing.

Eurofins ATS has worked for more than 30 years with major European retailers, manufacturers (national brands, raw materials and private label) and consumer organisations.

The laboratory main field of expertise is the development of "In-use aptitude and performance tests" with a focus on the "perceived quality by the consumer"

Services:
• Cosmetics and toiletries
• Do it Yourself
• Toys
• Paintings
• Detergents
• Hygiene & Paper
• Hardlines, Household Products
• Performance tests
• Chemical & physical analyses
• Clinical studies
• Expert panels & Consumer studies
• Technical assistance, consultancy
and complementary services in legal/regulatory assistance

**Eurofins Consumer Product Testing Germany**

Eurofins Consumer Product Testing (CPT) GmbH is specialised in analysis of products for the following industries:
- Cosmetics
- Hygiene and Paper Products
- Biocides
- Detergents
- Toys
- Food Contact Materials (FCM)
- Household Products

A highly skilled and experienced team of chemists, food chemists, biochemists, and engineers is specialised in analysing samples using accredited methods. The laboratory focuses on chemical testing by applying state-of-the-art techniques such as GC-MS/MS and LC-MS/MS. CPT’s expert team evaluates your testing results in order to meet the current national, international, and European legislation. Further, CPT’s experts provide solutions tailor-made to your specific needs. Due to analytical test reports CPT supports the complete international supply chain: supplier of raw materials, producers, importers, as well as retailers, consumer organisations, and authorities.

**Services:**
- Chemical & Physical Analysis
- Migration Tests (OML, SML, NIAS)
- Regulatory Affairs, Consultancy
- Customised Test Plans
- Webinars, Trainings
- International Marketability Certificates

**Accreditations:**
- DIN EN ISO/IEC 17025:2005 (DAkkS)

Eurofins Institut Dr. Rothe

For more than 50 years, food and non-food products have been analyzed accompanied with excellent customer service. The laboratory offers a broad spectrum of analyses and the corresponding judgement of food, cosmetics and consumer goods (e.g. hygiene papers, detergents) for the retail business as well as for trading companies and for producers.

**Services:**

- **Cosmetics:**
  - Analysis of ingredients such as active agents (e.g. organic and inorganic UV-filters, anti-dandruff agents, vitamins, deodorant agents)
  - Consumer goods:
    - Hygiene Paper: Analysis of parameters which reflect the price-performance ratio (e.g. mass, thickness, water absorption, tensile strength)
    - Analysis of organic residues ans contaminants (e.g. formaldehyde, MCPD and DCP)
  - Detergents: Analysis of ingredients such as active agents

**Accreditations:**

- Institut Dr. Rothe is accredited according to DIN EN ISO/EC 17025

---

Eurofins BioPharma Product Testing Munich

Eurofins BioPharma Product Testing Munich GmbH is an internationally operating testing laboratory offering comprehensive capabilities in safety testing. With more than 30 years of experience, our team of scientists offers a broad scope of biological studies, which meet the international regulatory requirements of human safety testing for cosmetic products.

The identification of hazardous ingredients is mandatory for consumer protection. Toxicological testing is used to determine, whether cosmetic products would pose any kind of risk to the health of consumers.

Within Europe a ban on the performance of animal testing for cosmetic products came into force on 11 September 2004 (animal testing ban). Furthermore the Cosmetics Regulation prohibits the placing on the market of cosmetic products, or products containing ingredients, which have been tested on animals.

Eurofins BioPharma Product Testing is a leader in safety testing without the use of animals and is deeply committed to the principles of the 3 R’s of Replacement, Reduction and Refinement. With a set of alternative in vitro and ex vivo test methods we are able to provide the full service to assess necessary toxicological data under GLP-compliance.

Besides the standard testing battery we offer additional studies and individual advice concerning your specific project with regard to scientific and regulatory requirements. These customized test designs help to address specific safety concerns.

**Accreditations:**

- Good Laboratory Practice (GLP)
- Good Manufacturing Practice (GMP)
- DIN EN ISO 17025
- FDA audited
- Listed by the World Health Organization (WHO)

**Eurofins Spectro Greater Noida**

Our Corporate Office established at Greater Noida which is constructed on an area of 50,000 sq feet, is probably the largest Lab infrastructure among all the Private Labs of the country.

**Services:**

Our Lab is a NABL Accredited Laboratory and this platform offers broadest scope for Electrical Endurance and Safety Measurements for Electronic Devices in Consumer Electronics and Automobile Industries. The Testing facilities being offered here are based on the state-of-art technology to provide the best of services in terms of accuracy and precision.

**Accreditations:**

NABL

**Eurofins Spectro New Delhi**

Spectro Analytical Labs Limited has been serving customers with third party-quality testing & inspection-related services since 1995, and now operates across the country. They have grown to become one of India’s most trusted brands.

**Services:**

Spectro has developed a strong analytical capability to directly assist clients and support in-house Quality Assurance as well as Research Projects.

We offer a complete range of Testing Services, all under one roof, for endless list of products and materials in the fields of Chemical, Biological, Mechanical, Non-Destructive, Electrical and Electronics.

Moreover we provide excellent services in the field of Calibration. We own the most prestigious Accreditation by NABL (Department of Science & Technology, Government of India) in six fields viz. Chemical, Mechanical, Biology, Non-Destructive Testing, Calibration and Electrical & Electronics.

**Accreditations:**

NABL

**Eurofins Spectro Kanpur**

Services:

Spectro Research Lab Ventures (P) Ltd., is fully competent to provide complete testing solutions and services for a variety of diverse materials replica watches uk and purposes. These include Metals & Alloys, Textiles, Rubber, Polymer, Leather, Oil, Paint, Water, Environment etc.

Spectro also provides Calibration services for a wide range of laboratory equipments, and has received NABL accreditation for this. It also provides competent Third Party Inspection services.
Eurofins Product Testing Italy

Eurofins Product Testing Italy S.r.l. is an Inspection Body that assesses the safety conformity of products, machinery, equipment and plants (in service)

Services:

• Third party inspections on Lifts, Crane, Pressure Equipment, Electrical Plant

Eurofins Modulo Uno S.r.l. is an Inspection Body that assess the safety conformity of products, machinery, equipment and plants (in service)

Services:

• Checks on new products to verify the quality and quantity in conformity with order specifications (i.e. Pre-shipment, Construction checks, Order specification)
• Factory audit and Vendor Assessment

Accreditations:

• UNI CEI EN ISO/IEC 17020
• UNI CEI EN ISO/IEC 17065
• UNI EN ISO 9001:2008

Eurofins Qualis

Eurofins Qualis is a Sensory Analysis and Consulting Centre founded in 1992 and specializes in analysis of products for consumption. The laboratory can offer audit, sampling and consumer science services throughout Italy.

Services:

• Cross-selling for Product testing (non-food) (for Italian Customers using all Eurofins Laboratories-with specific methods)
• Consumer science in home (non-food) on the “perceived quality” by a specific method developed over 15 years of field experience

Japan

Eurofins EAG Tokyo

This 177.78 m2 laboratory features surface analysis and electronics testing services for a wide variety of industries.

Services:
Welfare (MHLW) in Japan

- Ministry of Health, Labor and Welfare
- JIG/JGPSSI
- Contact Materials
- VOC
- Phthalate Ester
- ELV (SOC)
- REACH (SVHC)
- RoHS / RoHS2.0

Services:
- Analysis of chemicals, materials and products.
- A laboratory with ISO/IEC 17025 accreditation, it is also an independent laboratory authorized by Japan, and with high technical expertise and experiences will be of immense help to our customers.
- Services are also available for the automotive, electrics & electronics industries from chemicals to products such as oil, coal and tar are being monitored for the emission of PAH (Polycyclic Aromatic Hydrocarbon) from fuel burning activities. The PAH, a group of potential atmospheric pollutant, in these products which are to be controlled are Naphthalene, Acenaphthalene, Fluorene, Phenantherene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene etc.

As a testing institution authorized by CPSC and MDTCC (Ministry of Domestic Trade, Cooperation and Consumerism, a.k.a. KPDNKK), NML is all out to serve our customers on this very dynamic field of testing. Our consultants are alert of the latest regulation enforced for controlled substances and they are able to provide technical advice on the analysis involved as well as the regulatory requirements.

Services:
- RoHS / RoHS2.0
- REACH (SVHC)
- ELV (SOC)
- Phthalate Ester
- VOC
- Contact Materials
- JIG/JGPSSI

Accreditations:

Eurofins Product Testing Malaysia

The enforcement of RoHS (Retriction of Hazardous Substances) by EU on 1 Jul 2006 was aimed to reduce toxic e-waste generated from the dumping of electrical and electronic products. By working closely with various industries in Malaysia, NML has the opportunity to setup our laboratory for the testing of Lead (Pb), Mercury (Hg), Cadmium (Cd), Hexavalent Chromium (Cr6+), Polybrominated Byphenyls (PBBs) and Polybrominated Diphenyl Ether (PBDEs) in 2003 prior to the enforcement of RoHS.

To date, besides testing for the fulfillment of RoHS, NML is serving the industrial raw material suppliers and manufacturing industries etc. for the monitoring of substances such as SVHC (Substances of Very High Concern) as required by REACH (Registration, Evaluation, Authorisation and Restriction of Chemical Substances); Phthalates compounds (BEHP, DBP, BBP, DINP, DIDP and DOP) as required by CPSC (Consumer Product Safety Commission) for child use items and toys; selected heavy metals (As, Sb, Ba, Cd, Cr, Pb, Hg, and Se) as required by toy safety regulatory body from various countries including Malaysia; the analysis of food contact material as required by FDA 21 CFR and EU Directive; azo-compounds commonly used in dye and paint etc.

On top of regulation imposed onto consumer products, industrial products such as oil, coal and tar are also being monitored for the emission of PAH (Polycyclic Aromatic Hydrocarbon) from fuel burning activities. The PAH, a groups of potential atmospheric pollutant, in these products which are to being controlled are Naphthalene, Acenaphthalene, Fluorene, Fluoranthene, Pyrene, Benzo(a)anthracene etc.

As a testing institution authorized by CPSC and MDTCC (Ministry of Domestic Trade, Cooperation and Consumerism, a.k.a. KPDNKK), NML is all out to serve our customers on this very dynamic field of testing. Our consultants are alert of the latest regulation enforced for controlled substances and they are able to provide technical advice on the analysis involved as well as the regulatory requirements.

Accreditations:

- ISO/IEC 17025 (by STANDARDS MALAYSIA under the Malaysian Laboratory Accreditation Scheme)
- CPSC(USA)
- KPDNKK (Malaysia)

Eurofins Rubber Testing

Malaysia

To ensure the quality of dried natural rubber meets its required specifications, Malaysian Rubber Board (MRB) has regulated the testing of dried natural rubber before being certified as SMR (Standard Malaysian Rubber). This certification has to be conducted prior to import and export activities. SMR certification is to be conducted by laboratories under MRB or authorised independent laboratories nationwide and, Eurofins North Malaya Laboratory Sdn, Bhd is one of them.

From serving the rubber industry in rubber testing for the past 30 odd years, NML has learned the legislative and specification requirements imposed by the regulatory bodies; and we feel privileged for being able to play a part in the import-export of one of the major commodities of Malaysia. Whether you are a newcomer or an existing player in rubber industry, our expertise and experiences will be of use to you.

120
Services:

Under requirement by MRB, the parameters to be tested for SMR certification are dirt, volatile matter, ash, nitrogen, rapid plasticity and plasticity retention index, Mooney viscosity and rheometric cure test. Besides these basic tests required for SMR certification, NML is also performing other general studies for SMR (density determination, bale packing bag materials identification, vulcanisation studies and foreign substance identification etc), specification testing for TSR (Technically Specified Rubber) and specification testing for rubber and latex.

Accreditations:

• SMR certification (Malayan Rubber Board)
• ISO/IEC 17025 (by STANDARDS MALAYSIA under the Malaysian Laboratory Accreditation Scheme)

POLAND

Eurofins Malbork

Eurofins Polska Sp. z o.o. is an independent and competent laboratory performing analyses of non-food products, and offering quality supervision and control services.

Services:

Microbiological and physicochemical analyses are performed both in raw materials and in non-food products (household chemicals and cosmetics). Analyses are performed in accordance with applicable methodological standards, and to individual customer specifications.

Marking and verification of labelling of household chemicals and cosmetics is offered as well. Our experts assess the compliance of labelling with applicable laws and with the requirements of GDA labelling.

Audits of suppliers are conducted by experienced and highly qualified auditors that confirm compliance with the rules and standards by IFS, ISO 22000, HACCP, GHP and GMP.

Training topics are adapted to the needs and expectations of our customers. They concern areas related to hazards in the production process, legal regulations, labelling, sensory analysis and many others. Trainings are given by experienced professionals from the field, acclaimed throughout the country.

Accreditations:

• Accredited according to EN ISO 17025 by PCA (Polish Centre for Accreditation) certificate no AB 1334

SPAIN

Eurofins Product Testing Spain

Eurofins Product Testing Spain (PTS) has more than 25 years of experience in analytical control services of raw material manufacturers, suppliers, finished article producers (brand and private label) and retailers.

Our highly skilled and experienced team of chemists and engineers is specialized in analysing samples using accredited methods and evaluating the results according to the relevant Spanish & European legislation including respective guidelines and recommendations.

CPT has special experience in Cosmetics, Detergents, Food contact material, Sensory analysis and Technical Regulatory Consultancy.

Services:

1. TESTING:
- Food contact (overall migrations)
- Performance test detergents
- Eco-label performance test
- Performance test household
- Cosmetics test: (Performance, security and Control)
- Detergent, paper and polymeric materials Biodegradability

2. SENSORY & CONSUMER RESEARCH STUDIES

- Sensory evaluation Food & Non Food Products
- Consumer Hall Testing + qualitative approach
- Sniff test protocols
- Quality Monitoring
- Home Use Test

Consumer Research studies (MKT)
- Quantitative Studies (online & in hall test)
- Packaging Tests
- Concept Acceptance test
- Innovation research - Screening test
- Consultancy

Qualitative Studies
- Packaging Tests
- Concept Acceptance Tests
- Developing Consumer Insight
- Screening test

3. LEGAL and TECHNICAL CONSULTANCY for PRODUCT LABELLING:
- Adaptation of the DSD/DPD classification and labelling system to the new CLP requirements; this will reduce the cost of the adaptation process to the retail sector.
- Labelling development based on MSDS provided.
- Technical label translation from the original received into Spanish and Portuguese.
- Label revision to detect and ensure that any national requirements shall be applied to commercialize in the Spanish and Portuguese market.
- Label revision to detect and ensure that any national requirements shall be applied to commercialize in the Spanish and Portuguese market.
- MSDS (Material Safety Data Sheet):
- MSDS adaptation to the new CLP regulation.
- Classification of chemical substances and mixtures
- Technical MSDS translation from the original received into Spanish and Portuguese.
- Label revision to detect and ensure that any national requirements shall be applied to commercialize in the Spanish and Portuguese market.

4. INSPECTION AND AUDIT:
- Inspection products and audits suppliers’ quality system

Eurofins EVIC Spain

Eurofins EVIC is one of the largest independent players in Europe in the field of Clinical testing and Toxicological expertise, mainly for the cosmetic and dermo-pharmaceutical industries. Employs more than 100 staff across Europe and, with more than 40 years of experience in its area, has a very strong reputation and several internationally recognized experts.

Eurofins EVIC Spain works with major European cosmetic and dermo-pharmaceutical manufacturers. The laboratory main field of expertise is the development of Clinical tests focusing on the toxicological expertise and safety assessment of each formulation.

Eurofins EVIC Spain offers a broad spectrum of clinical tests for cosmetics, as well as for hygiene products and detergents. Among tolerance and efficacy clinical tests and in vitro tests, our service portfolio includes chemical, physical and microbiological analyses.

Services:
Clinical Testing (Safety & Efficacy)

Safety:
• Patch test
• Open test
• Sensitization test (Human Repeated Insult Patch Test)
• Photo-toxicity test
• In use test under medical control: dermatologist, ophthalmologist, dentist, gynaecologist, pediatrician, etc.

Efficacy /Claim substantiation:
• Moisturizing: Corneometer®
• Skin barrier: Tewameter®
• Anti-ageing: Silicone replicas, fringe projection
• Skin elasticity, firmness: Cutometer®
• Skin color: Colorimeter® and Chromameter®
• Hair care: antidandruff, hair loss (PTG), sebum
• Sun protection: SPF in vivo ISO 24444, UVA in vivo ISO 24442, UVA in vitro ISO 24443
• Make-up: long lasting
• Clinical scoring by experts
• Tailor-made protocols

Toxicological expertise & Safety assessments
• Safety assessment compliant to EU Cosmetic regulation 1223/2009 by toxicologists (EUROTOX).

Accreditations:
• ISO 9001

SWEDEN

Eurofins Labatus

Labatus aims to reduce the cost of quality defects for its customers. The objective of the test team is to try to make the equipment fail; to measure its performance as it does so; and take measures to prevent the fault from occurring again.

Ultimately, the aim is to help operators build a product that delivers the service they intended. With products that work as they should, end users are less likely to switch to another operator.

Services:
• Certification Testing
• Test Development
• Tablet Application Testing
• Test Management
• Test Automation

Eurofins Digital Testing

Founded in 2005 as a Digital TV testing specialist company Digital TV Labs, the company was acquired by Eurofins in 2014. The Bristol lab is closely aligned with its sister Eurofins Digital Testing labs in Hasselt, Belgium and Hong Kong. The three facilities have common sales and marketing of their services and products.

Services:
- Testing, certification and testing products for Digital TV devices and media delivery systems.
- QA services for set-top-box, iDTVs, connected devices and digital TV operators.
- Software testing services.
- On-site resourcing for QA
consultancy, test automation and test services.

Technologies covered include HbbTV, CI+, DVB, HDMI, Wi-Fi, DLNA, USB, IPv6, TR69, MPEG, HEVC, DASH, DOLBY and HE-AAC Audio.

Accreditations:
• ISO 17025
• Malaysian DVB-T2 Testing

Eurofins York Ltd
Eurofins York Ltd is a trusted global provider of product testing, certification, consultancy, training and instrumentation. It was formed in 1995 having its origins within the University of York’s Department of Electronics.

Eurofins York Ltd operates across four sites in the UK which include three United Kingdom Accreditation Service (UKAS) accredited test laboratories and our York office which is home to our Consultancy, Training and Test Instrumentation businesses.

Services:
1) Testing (Bristol, Castleford and Grangemouth Laboratories)

Accredited testing services to enable CE marking and global market access
• Electromagnetic Compatibility (EMC Directive)
• Wireless (Radio Equipment Directive)
• Electrical Safety (Low Voltage Directive)
• Electromagnetic Fields (EMF Directive and Health and Safety at Work legislation)
• Shielding effectiveness measurements
• On-site EMC and EMF testing at customer’s premises
• Electromagnetic site surveys (UK-wide and globally)
• Railway specific measurements

2) Consultancy and Research (York Office)

Consultancy and research in the fields of regulatory compliance and management, bespoke testing and RF engineering:
• EMC management
• Railway EMC compliance
• Bespoke Electromagnetic (EM) measurements
• RF research including novel and bespoke solutions
• Standards gap analyses
• Technical documentation
• Electromagnetic modelling
• Product compliance reviews
• Test and measurement facility reviews
• Notified Body services for 2014/30/EU

3) Test Instrumentation (York Office)

A range of Radio Frequency (RF) verification and measurement equipment:
• Dual mode comb and continuous broadband noise sources
• Continuous Broadband Noise Emitters
• Comb Generators
• Harmonics and Flicker Generators
• Compact emissions measurement antenna
• Cable Coupling Clamp

4) Training Courses (York Office)

Training for a range of regulatory aspects associated with CE Marking directives and RF engineering; available as scheduled, in-house, bespoke and online courses:
• EMC management and control
• EMC testing
• EMC design
• Railway EMC management
• Understanding antennas and electromagnetic theory
• EMC Directive 2014/30/EU
• Radio Equipment Directive 2014/53/EU
• Low Voltage Directive 2014/35/EU
• EMF Directive 2013/35/EU

Accreditations:
• ISO/EN 17025 (UKAS)
• IEC/IEEE CB Scheme
• FCC
• MET Laboratories (including factory audits)
• VCCI
• Mutual acceptance with many National Certification Bodies
• ISO 17020 Notified Body for assessment of Technical

Documentation for EMC Directive 2014/30/EU
• ISO 9001
• RISQS, CIRAS, PTS (Transport industry)
• Investors in People

Eurofins Product Testing USA

Services:

- CPSC/CPSCIA (US Consumer Product Safety Commission's Consumer Product Safety Improvement Act) - Children's and Non-Children's Product Safety
- California Prop 65
- Illinois Lead Poisoning Prevention Act
- Chemical Testing - Phthalates, Lead, Cadmium, Nickel, Formaldehyde, Mercury, Arsenic, Barium, Chromium, Selenium, etc.
- Pennsylvania, Massachusetts & Ohio Stuffed Toy Guidelines
- Federal Hazardous Substance Act
- Flammable Fibre Act
- JPMA products Requirements
- International Toy Safety Standards: ASTM F963 (USA)
- CHPR (Canada)
- EN71 (Europe)
- ISO 8124 (Australia)
- GB 6675 (China)
- EMC for electronic toys (FCC Part 15, EMC-R & TTE, etc.)

Eurofins EAG Sunnyvale

Our Sunnyvale laboratory opened in 2000 as Charles Evans and Associates. With over 75,000 sq. ft. of laboratory space, this EAG Silicon Valley location serves the semiconductor and other high tech industries, as well as medical device, pharmaceutical and consumer electronics industries and the legal field.

Services:

- Trace Elemental Analysis
- Surface Analysis
- Advanced Microscopy
- Materials Characterization
- Failure Analysis
- Composition & Materials ID
- Contaminant Identification
- Deformation
- Metallurgical Analysis
- Polymer Chemistry

Eurofins EAG Sunnyvale

Eurofins EAG St Louis

Formerly known as CHEMIR Analytical Services, this 20,000 sq. ft. laboratory was founded in 1959. EAG scientists at this location specialize in investigative analytical chemistry to solve difficult problems, including deformulation, plastic testing and coatings testing. They are also experienced with providing litigation support and expert witness services.

The St. Louis laboratory offers scientific solutions to a wide variety of industries, including consumer products, industrial goods, pharmaceuticals, medical devices and basic materials.

Accreditations:
This location is cGMP Compliant, ISO 9001:2008 Registered, FDA Registered and DEA Licensed.

Eurofins EAG Santa Clara

Our Santa Clara location offers semiconductor and microelectronics services, ATE production test and development, burn in and reliability qualification, ESD testing and latch up testing and PCB design and assembly to support new product development, debug and ongoing production. Custom engineering and turnkey, managed projects are a key part of the integrated support model offered.

Services:

- ATE Test & Engineering
- Burn-in & Reliability
- ESD & Latch-up Testing
- PCB Design & Assembly

Eurofins EAG Raleigh

Featuring advanced microscopy techniques, our Raleigh, NC laboratory is 9,600 sq. ft. It began in 1989 as Materials Analytical Services (MAS) – Semiconductor and Microelectronics Services Operations and was acquired by EAG in 2006.

This facility serves the semiconductor, aerospace/defense, medical device industries and more.

Services:
- Custom Synthesis
- Surface Analysis
- Materials Characterization
- Composition & Materials ID
- Contaminant Identification
- Trace Elemental Analysis
- Advanced Microscopy
- Failure Analysis
- Deformation
- Metallurgical Analysis
- Polymer Chemistry

Eurofins EAG Princeton

Our Princeton location sits in East Windsor NJ and offers surface analysis and materials characterization services to many industries.

Founded in 1987, this laboratory is 20,000 sq. ft. in size and serves a wide variety of industries including semiconductors, medical devices, aerospace/defense and more.

Services:
- Surface Analysis
- Materials Characterization
- Composition & Materials ID
- Contaminant Identification
- Trace Elemental Analysis
- Advanced Microscopy
- Deformation
- Metallurgical Analysis
- Polymer Chemistry

Eurofins EAG Minneapolis

Our laboratory in the Minneapolis, MN area (located in Chanhassen) began in 1999 and is over 11,000 sq. ft. in size. The facility offers surface analysis and materials characterization for many industries, including medical devices, semiconductors, aerospace and more.

Services:
- Surface Analysis
- Materials Characterization
- Failure Analysis
- Contaminant Identification
- Custom Synthesis
- Composition & Materials ID
- Trace Elemental Analysis
- Advanced Microscopy
- Deformation
- Metallurgical Analysis
- Polymer Chemistry

Eurofins EAG Los Angeles

Formerly known as SEAL Laboratories, this location in the Los Angeles (El Segundo) area has been solving challenging projects requiring expertise in materials science, electronics, failure analysis, metallurgical testing, residual gas analysis (RGA), and destructive physical analysis (DPA) since 1972. Scientists and engineers at our Los Angeles and other locations offer years of experience providing litigation support and expert witness services.

We perform failure analysis and product improvement for metal components in the aerospace, transportation, consumer products, construction and medical device industries. Our experts utilize multiple techniques for metallurgical analysis to solve problems as:
- Fractures, fracture and failure modes and origins
- Fatigue and other slow crack growth mechanisms
- Brittle and ductile overload failures
- Stress corrosion and hydrogen embrittlement failures
- Corrosion/oxidation problems
- Contamination problems
- Wear failures
- Heat treatment problems
- Design/stress related failures
- Plating problems

Additionally, we have assisted with product design, material selection, product improvement, and quality assurance programs for metal components.

Legal Consulting: Product Liability and Patent Infringement Cases From investigating defective aircraft landing gear to determining cause of airbag failures, our engineers and scientists have been at the forefront of providing scientific expertise, data interpretation and expert testimony for hundreds of legal cases, including:
- Product defect investigations
- Determination of initiating causes of failure
- Product construction analysis and
specifications
• Materials and contamination analysis
• Fire investigations
• Manufacturing/quality control issues

The Los Angeles location (formerly SEAL Laboratories) also has specialized services for the electronics and aerospace industries. As experts in Residual Gas Analysis (RGA) of electronics components, we not only provides internal gas and water vapor content in microelectronic components, but also troubleshoots “problem” internal gasses and provide corrective actions. We support MIL-STD-883, Method 1018 and MIL-STD-750, Method 1018. Destructive physical analysis (DPA) is performed on materials used in aerospace, commercial, military, and government applications. As DLA (Defense Logistics Agency) certified for various MIL-STD testing requirements, our DPA capabilities include Fine Leak, Gross Leak, Die Shear, Bond Strength, P.I.N.D. Testing, Radiography, SEM inspection, Microsectioning, and DLA Certified RGA Testing.

Services:
• DPA
• RGA
• Metallurgical Analysis
• Consulting & Expert Testimony
• Failure Analysis - Materials
• Materials Characterization
• Surface Analysis

Eurofins EAG Irvine
Located in the high tech hub of Irvine, Orange County, CA, this location is 35,000 sq. ft and began in 1995 as Micro Electronics Failure Analysis Services. (MEFAS).

Focused on evaluating microelectronics testing and engineering, our Irvine facility offers failure analysis, electrostatic discharge, or ESD testing and reliability testing and other microelectronic services to support new product development, debug and ongoing improvement.

Services:
• Failure Analysis
• Burn-in & Reliability
• ATE Test & Engineering
• ESD & Latch-up Testing
• FIB Circuit Edit & Debug
• Advanced Microscopy
• PCB Design & Assembly

AGROSCIENCE SERVICES

With over 25 years of experience in the crop protection industry, Eurofins Agroscience Services offers outstanding technical knowledge and project management skills. Our service offering is continuously developed by knowledge transfer initiatives between the Group’s various centres of expertise across the globe.

By acquiring a carefully selected range of CRO’s, Eurofins Agroscience Services has created a unique portfolio of expertise that provides analytical, regulatory and field support to plant breeders, agrochemical, biopesticide, biocide and fine chemical manufacturers.

AUSTRALIA

Eurofins Agroscience Testing

Eurofins Agroscience Testing is a contract laboratory specialising in the analysis of agrochemicals, veterinary medicines and their residues in crops, animal tissues and environmental samples.

The team at Eurofins Agroscience Testing has experience with the analysis of most developmental agrochemicals and hence is in a position to offer sound advice for the analysis of the same compounds in food and environmental samples.

Services:

- Residue Field studies (GLP)
- Veterinary Drug Residue studies (GLP)
- Method Development and validation
- Pesticide analysis of fruit, vegetables
- Formulation analysis (GLP)
- Storage Stability studies (GLP)
- Physical Parameter Testing (GLP)

Accreditations:

- OECD GLP
- ISO 17025
- APVMA licensed
- AQIS facility

Eurofins Agrisearch

Eurofins Agrisearch is part of the Eurofins Agroscience Services global network. It has provided services to agrochemical, biopharmaceutical and veterinary health industries since 1970.

There are ten field research facilities spread across all agricultural and climatic zones of Australia. They are located at: Orange, Gosford, and Narrabri in New South Wales; Toowoomba, Bundaberg and Innisfail in Queensland; Shepparton and Horsham in Victoria, Adelaide in South Australia and York in Western Australia.

Core activities include efficacy, safety and residue studies in plants and animals, crop and variety evaluation including GMOs, "off-season“ testing and regulatory science consulting.

In late 2013, Eurofins Agrisearch opened a new state-of-the-art PC2 quarantine facility located at Toowoomba. The facility is equipped with the latest environmental monitoring and control features and has a 10,000 plant capacity. The facility mainly caters for corn, cotton, sorghum, sunflower and pulse seeds.

Eurofins Agrisearch is the only CRO in Australia that is able to conduct GLP compliant research for both the field and analytical phases of crop and animal residue studies.

Services:

- Crop and animal efficacy studies
- Variety evaluation including GMOs
- Regulatory science consulting
- Residue and safety studies
- Pharmacokinetic studies
- Soil dissipation/accumulation studies
- Worker exposure studies
- Field technical services
- Project and study management
- Processing studies
- Glasshouse/quarantine studies
- Public/environmental health studies

Accreditations:

- GLP (crops, animals)
- GCP (animals)

EUROPE

BULGARIA

Eurofins Agroscience Services Bulgaria

Eurofins Agroscience Services EOOD in Bulgaria forms part of the Eurofins Agroscience Services global network, providing field and analytical studies to support the screening, development and registration of agrochemicals in Bulgaria.

For more details on the service portfolio, please see Group description under Eurofins Agroscience Services in the UK and Germany.

We currently have two facilities in Bulgaria

Services:
• Efficacy of pesticides (GEP) crops
• Permanent crops
• Field crops
• Vegetable crops
• Greenhouse crops
• Selectivity safety cultures
• Residue of pesticides (GLP)

Accreditations:
• GEP
• GLP

CHILE

Eurofins Agroscience Services Chile

Headed up by Jose Luis Miano - the team of expert agronomy staff can offer efficacy trials throughout Chile as well as residue, soil dissipation and Ecotox field trials.

Until the appropriate local certification is in place, GLP trials will be performed under the umbrella of the Brazilian or German GLP certificate as multi-site projects.

EUROPE

CHINA

Eurofins Agroscience Services China

Our China representatives can quote for all GLP studies and regulatory consultant services to Chinese clients. For field trials, such as residue, efficacy and ecotoxicology, we cooperate with local institutions to conduct both GLP and non-GLP studies.

Services:
Providing GLP studies and regulatory services
DENMARK

Eurofins Agroscience Services Denmark

Eurofins Agroscience Services ApS was opened in January 2013. The station received a GEP accreditation in 2013 and a GLP accreditation in 2014. Located in Middelfart, in central Denmark, the facility offers GLP trials (residue and soil dissipation) and GEP trials in agricultural crops, fruits and vegetables. Ecotox trials can be arranged in collaboration with Eurofins Agroscience Services EcoChem in Niefern, Germany.

Services:

• GLP residue and soil dissipation trials
• Crop Efficacy and Selectivity Testing
• Demo trials

Accreditations:

• GLP
• GEP

Eurofins Agroscience Services France

There are nine facilities in France, spread across many of the regions. For more details on the service portfolio, please see Group description under Eurofins Agroscience Services in the UK and Germany.

Services:

• Crop Efficacy Testing (GEP)
• Crop Residue studies (GLP)
• Ecotox studies
• GM studies
• Large Plot Efficacy
• PGW (Prospective Groundwater studies)
• Pollen and Nectar samplings
• Phytoxicity studies
• Processing studies
• Soil Dissipation and Accumulation studies
• Study Management
• Worker (Operator) Exposure
• Regulatory Affairs

GERMANY

Eurofins Agroscience Services Germany

Eurofins Agroscience Services GmbH in Germany forms part of the Eurofins Agroscience Services global network. There are six strategically based field locations in Germany offering full geographical coverage.

EAS has the following field locations in Germany:

• Stade (Niedersachsen)
• Bernau (Brandenburg)
• Osnabrück (Niedersachsen)
• Wiesloch (Baden-Württemberg)
• Markgröningen (Baden-Württemberg)
• Detmold (Nordrhein-Westfalen)
• Zwickau (Sachsen)
• Straubing (Bavaria)

We serve the agrochemical, fertiliser, biocide and seed industries. Our services include regulatory services (BAD), study management, selectivity trials, biological trials, screening trials, residue trials, soil dissipation and accumulation trials, eco-toxicological trials and different types of monitoring (groundwater, bioaccumulation).

Services:

• Crop Residue Studies (GLP)
• Crop Efficacy Testing (GEP)
• Glass House Studies
• Groundwater Monitoring
• Field Leaching Studies
• Selectivity Trials
• Rotational Crop
• Field Volatilisation
• Soil Dissipation / Accumulation
• EU and National Biological Dossier

Accreditations:

• GEP
• GLP

Eurofins Agroscience Services Ecotox

Eurofins Agroscience Services Ecotox GmbH is part of the Eurofins Agroscience Services global network, providing laboratory and field ecotoxicological studies to support the worldwide development, registration and stewardship of test substances.

The company offers all ecotoxicological studies and scientific services required for the registration of agrochemicals, chemicals, biocides, cosmetic and veterinary/human medicinal products globally. All studies are performed in compliance with GLP certified by the respective national authorities.

Services:
• Non-Target Arthropods, Honeybees, Bumble Bees, Solitary Bees, Non-Target Plant, Earthworms and Soil Organisms, Aquatic-Toxicology and microbiological testing
• Standard laboratory to field testing with NTA and soil organisms
• Aged residue and semi-field NTA studies
• Residue studies with several bee and bird food matrices
• Honeybees, bumble bees and solitary bees lab, brood, tunnel and field studies
• Predatory mite field studies
• Full fauna NTA and soil organism in-field and off-crop studies
• Earthworm and soil organism lab and field studies
• Algae & aquatic macrophytes
• Aquatic Invertebrates (Daphnia and Chironomus)
• Aquatic vertebrates: fish acute (5 species) as well as early life stage, juvenile growth and bioaccumulation studies
• Biodegradation
• Micro-cosm (indoor) and mesocosm (outdoor in co-operation with a partner) studies

Accreditations:
• GLP
• Microbiological testing

Eurofins Agroscience Services EcoChem

Eurofins Agroscience Services EcoChem GmbH is part of the Eurofins Agroscience Services global network, providing analytical studies to support the screening, development and registration of test substances in Europe, the US and beyond according to international guidelines.

The company offers all analytical studies and scientific services required for the registration of agrochemicals, chemicals, biocides and veterinary/human medicinal products globally. Every study is performed in compliance with GLP certified by the national authorities.

Services:
Physico-Chemistry:
• Determination of physico-chemical properties of Active Substances and Formulations
• Storage Stability studies
• 5-batch studies, Change Control Analytics
• Inorganic Analysis by ICP-MS

Residue Analytics:
• EFate Residue Analysis for field studies in soil, water and groundwater
• Crop Residue Analysis, multi-residue and analyte specific
• Method development and validation, including ILV
• Analytical exposure analysis for all ecotoxicological studies in laboratory and field

Environmental Fate & Metabolism:
• 14C / environmental fate and metabolism studies in water, soil, air
• Metabolism studies in plants and animals
• Leaching, persistence, accumulation

Eurofins BioPharma Product Testing Munich GmbH

is an internationally operating testing laboratory offering comprehensive capabilities in safety testing.

With more than 30 years of experience, our team of scientists offers a broad scope of biological studies, which meet the international regulatory requirements of human safety testing for plant protection products and biocides.

Besides the standard toxicology testing battery, we offer additional studies and individual advice concerning your specific project with regard to scientific and regulatory requirements. These customized test designs help to address specific safety concerns (e.g. Mode of Action studies).

Services:
• Skin irritation/corrosion
• Eye irritation/corrosion
• Dermal Absorption / Skin Penetration studies
• Sensitization
• Genetic Toxicology
• Acute Toxicity
• Repeated Dose Toxicity
• Developmental and Reproductive Toxicology (DART)
• Toxicokinetic studies
• Carcinogenicity studies
• Neurotoxicity studies
• Pathogenicity / Infectivity studies
• Acute Six Pack studies
• Endocrine Disruptor studies

Accreditations:
• Good Laboratory Practice (GLP)
• Good Manufacturing Practice (GMP)
• DIN EN ISO 17025
• FDA audited
• Listed by the World Health Organization (WHO)

HUNGARY

Eurofins Agroscience Services Hungary

Eurofins Agroscience Services Kft. in Hungary is part of the Eurofins Agroscience Services global network and offers residue, environmental and efficacy field trials for agrochemicals and soil sampling for control of fertilisation status in Hungary and Romania.

Services:
• Crop Residue studies (GLP)
• Crop Efficacy Testing (GEP)
• Large Plot Efficacy
• Selectivity Trials
• Soil Dissipation and Accumulation studies
• Groundwater studies
• Ecotoxicology studies
• Soil sampling services
• Soil sampling services and fertiliser use recommendation services
• Soiling conservation services
• Soil mapping and GIS services

Accreditations:
• MD & MV
• Residue Chemistry
• Environmental Fate
• Product Chemistry
• Aquatic Toxicology
• Terrestrial Toxicology
• Avian Toxicology
• Pollinator Testing
• Plant & Animal Metabolism
• Field Management

**Japan**

Eurofins JACC

JACC is one of the largest Japanese independent GLP pesticide residue laboratories for agrochemical registration, with more than 40 years of chemical testing experience and know-how.

JACC has accreditation from the Japanese Ministry of Agriculture, Forestry and Fisheries (MAFF), and serves chemical and agrochemical clients by offering pesticide analyses for river water, air and soil samples as well as analyses for active agrochemical ingredients and formulations.

**New Zealand**

Eurofins Agroscience Services NZ

Eurofins Agroscience Services NZ is a contract research organisation that offers a range of scientific research and development, consulting and testing services in agriculture, horticulture and animal health.

The main facility is located at Havelock North, in the southeast of the North Island. A second facility has recently been established at the Bay or Plenty on the North Island, but there is the ability to conduct field research throughout New Zealand.

Core activities include efficacy, safety and residue studies in plants and animals, crop and variety evaluation, “off-season” testing and regulatory science consulting.

Eurofins Agroscience Services NZ is the only CRO in New Zealand that is able to conduct GLP compliant research for both the field and analytical phases of crop and animal residue studies.

Services:

- Crop and animal efficacy studies
- Variety evaluation
- Regulatory science consulting
- Residue and safety studies
- Pharmacokinetic studies
- Soil dissipation/accumulation studies
- Worker exposure studies
- Field technical services
- Project and study management
- Processing studies

Accreditations:

- GLP (crops, animals)
- GCP (animals)

Eurofins Agroscience Testing NZ

Eurofins Agroscience Testing New Zealand specialises in the analysis of agrochemicals and veterinary medicines and their residues in animal tissues, crops, soil, and foodstuffs

Services:

- Residue Field studies (GLP)
- Veterinary Drug Residue studies (GLP)
- Method Development and validation
- Pesticide analysis of fruit, vegetables
- Formulation analysis (GLP)
- Storage Stability studies (GLP)
- Physical Parameter Testing (GLP)

Accreditations:

- OECD GLP
- ISO 17025
- MPI Approved facility

Eurofins Christchurch

Eurofins Christchurch provides a test offering in soil microbiology and microbial chemistry.

Services:

- Soil microbiology

Accreditations:

- ISO / IEC 17025
POLAND

Eurofins Agroscience Services Poland

Eurofins Agroscience Services sp. z. o. o. in Poland forms part of the Eurofins Agroscience Services global network, providing field and analytical studies to support the screening, development and registration of agrochemicals in Poland. In total, there are five facilities across Poland, giving access to most of the country. For more details on the service portfolio, please see Group description under Eurofins Agroscience Services.

Services:

- Crop Residue studies (GLP)
- Crop Efficacy Testing (GEP)
- Selectivity Trials
- Fertilizer Testing Trial

Accreditations:

- GEP
- GLP

PORTUGAL

Eurofins Agroscience Services Portugal

The facility at Moncao was established in 2004. Initially offering field trials, mainly GEP trials, the facility now has extensive and broad experience in field studies such as efficacy, residue, ecotoxicology, soil dissipation and ground water monitoring.

Services:

- Crop Residue studies (GLP)
- Crop Efficacy Testing (GEP)
- Ecotox Trials - earth worms
- Downy mildew and late blight trials
- Soil dissipation studies
- Ground water studies
- OPEX studies
- Post harvest studies

Accreditations:

- GEP
- GLP

ROMANIA

Eurofins Agroscience Services Romania

Eurofins Agroscience Services S.r.l in Romania forms part of the Eurofins Agroscience Services global network, providing field and analytical studies to support the screening, development and registration of agrochemicals in Romania.

We have two facilities in Romania: one located in Timisoara (west Romania) and one in Scinteia Village (south west Romania).

Services:

- Crop Residue studies (GLP)
- Crop Efficacy Testing (GEP)
• GM studies
• Crop Safety studies (GEP)
• Large Plot Demo Trials Efficacy

Accreditations:
• GEP
• GLP

Our offices are easily accessible and feature an equipment store, contamination free room, freezer, the chemical store and weighing room. On the first floor, there are offices for the staff, a meeting room and storage area for office supplies, dedicated field equipment, processing area and GM and non GM seeds storage area.

Services:
• Operator Exposure Studies
• GMO Studies (non-target organisms, composition and expression trials with maize and sugar beet)
• Study Management
• Yield trials (specialized equipment for maize, cereals and other crops)
• Greenhouse studies
• Post Harvest trials

Accreditations:
• GEP
• GLP

Eurofins Agroscience Services Seville

The facility was set up in 1996 with two staff who mainly carried out GLP trials. The site was officially recognised by the Spanish Ministry of Agriculture for efficacy trials in 1997 and in 1998 was fully accredited for GLP trials by ENAC.

Services:
• Efficacy trials, open field and greenhouse conditions.
• Biostimulants trials, open field and greenhouse condition.
• Dumping-off trials in control conditions.
• Residue trials, open field and greenhouse conditions.
• OPEX trials.
• Groundwater monitoring studies
• Soil dissipation studies
• Study Management

Trialcamp

Trialcamp is an international contract research organization (CRO) offering a comprehensive range of research and product development services. We provide services to the pharmaceutical, crop protection and chemical industry all around the world by conducting developmental research to support their global regulatory submissions. Eurofins Trialcamp rapidly adapt to the changing requirements of the regulatory authorities and will manage
your project development, closely monitoring every step. We are able to fulfil client requirements applying techniques adapted to your needs, achieving high quality standards by investing on technology, knowledge and qualified professionals.

Services:

- Efficacy trials (GEP)
- Ecotoxicology (GLP)
- Residue Trials (GLP)
- Processing studies (GLP)
- Post Harvest trials (GLP, GEP)
- Biocides studies

Accreditations:

- GEP
- GLP

**SWITZERLAND**

Eurofins Agroscience Services Switzerland

Eurofins Regulatory AG helps provide a tailored strategy for the successful worldwide registration of agrochemicals, bio-pesticides, biocides and biopharmaceuticals (ERA).

Regulatory specialists in all sections of the dossier, our team are experts in the provision of regulatory advice and cost effective regulatory strategies for the client, undertaking data gap analyses, project management, study placement & monitoring, risk assessments and advanced modelling programs. They are also experienced in dossier compilation including the CADDY format.

Comprising the largest team of Biological Assessment dossier writers in UK, Germany and France, Eurofins Regulatory AG offers the complete package of services for regulatory support globally.

Eurofins Agroscience Services UK

Eurofins Agroscience Services in the UK forms part of the Eurofins Agroscience Services global network.

There are six strategically based field locations in the UK offering full geographical coverage and a state of the art analytical laboratory in Derbyshire.
EAS has the following field locations in the UK:

- Headquarters in Wilson, Derbyshire
- Beverley, East Yorkshire
- Downham Market, Norfolk
- Colchester, Essex
- Mawdesley, Lancashire
- Willand, Devon

Services:

- Laboratory, growth room, glasshouse and field screening
- Crop Efficacy studies (GEP)
- Biological Assessment Dossiers
- Project and Study management
- Crop Residue studies (GLP)
- Full analytical services for analysis of residues in crops, water, soil, and air and other matrices
- Analytical method development
- Independent Laboratory Validations
- Import tolerance studies
- Baseline resistance monitoring
- Insect and pathogen cultures
- Effects of pesticides on rotational and replacement crops
- Soil dissipation/accumulation
- OECD 208 studies
- Varietal evaluation
- ELISA [protein expression & viral quantification]
- Real time PCR
- Nematode laboratory
- Evaluation of the rainfastness and wash-off of products
- Exposure studies including operator, worker re-entry, and dislodgeable foliar residues
- Ecotoxicology field studies
- Independent Laboratory Validations

Accreditations:

- GEP
- GLP
- ISO 9001

USA

Eurofins Agroscience Services Prospect Hill Research Facility

The Prospect Hill Research facility consists of offices and laboratories. It is the primary location for honey bee, non-target organism lab studies, urban entomology research and new formulations/products development.

Services:

- EU and EPA import tolerance studies
- Quantification of dislodgeable foliar residues
- Baseline resistance monitoring
- Effects of pesticides on rotational and replacement crops
- Quantification of dissipation/accumulation of pesticides in soil
- Evaluation of the rain fastness of products
- Ecotoxicology studies
- Independent Laboratory Validations
- Study management

Accreditations:
Eurofins Agroscience Services Jeffersonville Research Facility

The Georgia research station located in Jeffersonville has soils typical of the southern growing region. The station is located in the EPA growing region 2. The Georgia research station is located in Twiggs County and is close to the geographic center of the state of Georgia. We conduct work with all major southern crops and turf.

Services:
• GLP/Residue Studies
• Efficacy studies
• Environmental Fate Studies
• C14 Studies
• DFR Studies
• Worker Exposure Studies

Accreditations:
• GLP

Eurofins Agroscience Services Cedar Grove Research Facility

Cedar Grove Research Facility (CGRF) is located in Orange County, North Carolina and features three offices, two laboratories, a monitored freezer room for sample storage, common equipment room, two growth rooms and two greenhouses.

CGRF maintains a group of well trained research scientists with working knowledge of beekeeping. The team leads the honey bee ecotoxicity studies in the US. Currently, approximately 500 bee hives are kept across apiaries in Cedar Grove.

Field work at CGRF is comprised of several different types of studies. The most common studies are honeybee ecotoxicity studies and residue studies. GLP studies are conducted at the request of the sponsor.

The common field crops are corn, cotton, soybeans and sunflowers. Our common vegetables include tomato, pepper, potatoes, cucurbits and broccoli.

The CGRF greenhouses are used most frequently to grow crops needed for transplant in the field, or to maintain arthropod cultures. Other studies maintained in a greenhouse setting include germination studies, pollination studies, water management studies, and caged insect studies.

The laboratory houses several growth chambers used to maintain arthropod cultures in isolation. The laboratory is used for efficacy screening, bioassays, disease culture maintenance, algal cultures and germination studies. Laboratory work at Cedar Grove specializes in pesticide efficacy, including translational work with field-to-lab samples, as well as consumer products and urban entomology.

Some common arthropods used in research at Cedar Grove include honeybees, bedbugs, aphids, two-spotted spider mite, roaches, ants, mosquitoes, wasps, hornets, ticks, fleas, flies and spiders.

Eurofins Agroscience Services Sanger Research Facility

The Sanger research station located in Sanger, CA has soils typical of the Central Valley in California. Only 8 miles East of Fresno, it conducts work with all major California crops.

Services:
• GLP/Residue Studies
• Efficacy studies
• Environmental Fate Studies
• GMO studies
• Pollinator studies
• DFR Studies
• Worker Exposure Studies

Accreditations:
• GLP
Eurofins Genomics offers a wide array of products and services for the agroscience industry. We work with many companies in this industry for plant and seed related applications. Related products and services include DNA / RNA synthesis, Synthetic Biology, Next Generation Sequencing, Genotyping, Gene Expression, Microarrays, and bioinformatics for academic and industrial research.

We offer competitive prices, one of the fastest turnaround times for sequencing in the country, and the lowest error rate in the industry for oligonucleotides.

Services:

- DNA / RNA Oligonucleotides with a variety of options, purifications and modifications available.
- DNA Sequencing in tubes, plates and kits.
- Gene Synthesis & Synthetic Biology
- Gene Fragments
- Next Generation Sequencing
- qPCR and MGB-eclipse probes
- Applied Genomics: Genotyping, Gene Expression & Microarrays

Accreditations:

- CLIA accredited
- CAP accredited
- ISO 9001:2008
- ISO 13485:2003
- FDA 3005882681 for the manufacture of ASRs (Analyte Specific Reagents) for use in IVD product
Columbia, MO, about a 2 hour drive from either St. Louis, MO or Kansas City, MO. Founded in 1968, these laboratories employ over 400 scientists serving the agrochemical, crop biotechnology, pharmaceutical, biopharmaceutical and medical device industries.

Since 1968, our Columbia location has been delivering analytical expertise in support of product development. Through development know-how, cross-disciplinary technical expertise, and applied experience with multiple regulatory frameworks, we deliver a broad array of GLP and cGMP-compliant product development and analytical testing services to the pharmaceutical, biotech, animal health, crop protection, consumer products and chemical industries. This cross-industry, cross-regulatory experience adds value to the process of product development—and will become increasingly important as public scrutiny and global regulations converge on the interrelationships between human, animal and environmental health.

Our mission is to become a trusted extension of our client’s product development teams, helping them meet the global demand for safer, more effective products. Our approach to doing business promotes relationships beyond a simple transaction. It facilitates collaboration, promotes quality, makes better use of resources, and helps us develop the right talent and resources when and where our clients need them. This, in turn, improves decision-making, expedites development and reduces risk.

Services:

• Analytical MD & MV
• Stability & QC Release
• Functional Assays
• Animal Metabolism
• Impurities Analysis
• Extractables & Leachables
• Biopharma Analysis
• Biopharma Characterization
• Reference Standard Management
• Reverse Engineering
• Custom Synthesis & GMP Radiolabeling
• Protein Expression Analysis
• Nutritional Equivalency
• Assays & Bioassays
• Plant Metabolism
• Residue Analysis
• Allergenicity Profiling
• Crop MD & MV
REACH SERVICES

Eurofins is a global service provider to the chemical industry, offering a comprehensive range of testing and consulting services for REACH and its worldwide relatives.

Eurofins REACH Services covers the full testing portfolio according to Annex VII-X of the REACH directive, as required for the registration of chemicals within the EU. All studies are performed in compliance with GLP for which we have a certificate since many years. In addition, our experienced regulatory team provides support for all steps of the regulatory and registration process. This includes both phase-in and non-phase-in substances.

For clients dealing with articles or finished goods, product testing for the presence of substances of very high concern (SVHC) is also part of the comprehensive REACH services portfolio.

Services:
Physico-chemical properties

Toxicology
• Skin and eye irritation/corrosion
• Sensitisation
• Genotoxicity
• Acute and repeated dose toxicity
• Reproductive and developmental toxicity (DART)
• Carcinogenicity
• Toxicokinetic behaviour

Ecotoxicology
• Aquatic toxicology
• Terrestrial toxicology
• Environmental fate/Biodegradability

Analytical services
• Product testing for SVHC’s

Consulting services
• Advice on registration and testing
• Waiving strategies
• Literature searches, data evaluation and data gap analysis
• Technical dossier preparation & submission in IUCLID 5
• Member dossier preparation
• Risk assessments, Chemical Safety Reports (CSR), Higher tier assessments
• Post submission support

Accreditations:
• GLP
• AAALAC (Partner Laboratory)
